

Stotts Nursery- Plant catalogue

This is a catalogue of the plants we usually sell. It is not a stock availability list, please visit the nursery, email or phone to find out availability.

Email: billystott@stottsnursery.co.uk

Phone: 07542 718307

To find a particular plant, or a plant for a particular place, i.e. Hydrangea or 'shade' or 'sun' or 'moist soil', press 'CTRL' (Or Command) key and hold it down, then press the letter 'F' key and a Find box will appear. Then type the word you are looking for and press 'find next' and it will search the entire document to show you where those words appear.

Hardiness Ratings: We use the RHS Hardiness ratings to give you a guide to hardiness of plants. **In severe winters some plants, especially evergreens, may experience some damage.**

H3. -5 to 1°C. Half-hardy - unheated glasshouse/mild winter. Hardy in coastal/mild areas except in hard winters and at risk from sudden (early) frosts. Can survive with artificial winter protection.

H4. -10 to -5°C. Hardy - average winter. Hardy through most of the UK apart from inland valleys, at altitude and central/northerly locations. May suffer foliage damage and stem dieback in harsh winters in cold gardens.

H5. -15 to -10°C. Hardy - cold winter. Hardy through most of the UK even in severe winters. May not withstand open or exposed sites or central/northerly locations.

H6. -20 to -15°C. Hardy - very cold winter. Hardy throughout the UK and northern Europe. Many plants grown in containers will be damaged unless given protection.

H7. colder than -20°C. Very hardy. Hardy in the severest European continental climates including exposed upland locations in the UK.

Herbaceous Perennials (including ferns, grasses and herbs)g

notes

Most of our perennials are sold in 1 or 2 litre pots

Acanthus mollis		
Acanthus mollis 'Rue Ledan' AGM		A clump-forming, evergreen perennial with large, obovate, deeply lobed, dark green shiny leaves. White, tubular, lipped flowers with green bracts are borne on spikes are produced in late summer. Sterile, so does not self-seed like other Acanthus. Plant in full sun or partial shade, in any soil. Deep, fertile loam preferred. Mature height and spread: 1.2m x 90cm. Hardiness: H7.
Acanthus spinosus		A clump-forming, evergreen perennial with arching dark green glossy leaves which are deeply cut and spiny. Spikes of white, tubular, lipped flowers with purple bracts are produced from late spring to midsummer. Ideally plant in full sun or partial shade, in deep, fertile loamy soil, but any soil will do. Mature height and spread: 1.5m x 90cm. Hardiness: H7.
Achillea 'Credo' AGM		A clump-forming, evergreen perennial with feathery, mid-green leaves. Flat heads of creamy yellow flowers are produced from midsummer to early autumn, fading to off-white. Plant preferably in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalk. Mature height and spread: 90cm x 45cm. Hardiness: H7.
Achillea 'Moonshine'	Bright yellow flowers, silver leaves. H 60cm	
Achillea 'Summerwine' AGM		A clump-forming, evergreen perennial with feathery, dark green leaves. Flat heads of dark red flowers are produced from mid to late summer. Plant preferably in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalk. Mature height and spread: 90cm x 45cm. Hardiness: H7.
Achillea 'Terracotta'		A clump-forming, semi-evergreen perennial with feathery, grey-green leaves. Flat heads of deep yellow/orange flowers which fade to cream are produced from mid to late summer. Ideally plant in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalky soils. Mature height and spread: 1-1.5m x 45cm. Hardiness: H7.

Achillea 'Walther Funcke'		A compact clump-forming, semi-evergreen perennial with feathery, grey-green leaves. Flat heads of red-orange flowers which fade to cream are produced from mid to late summer. Ideally plant in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalky soils. Mature height and spread: 50cm x 45cm. Hardiness: H7.
Achillea filipendula 'Gold Plate'	JOP. Large golden yellow flower heads. H 1.2m	
Achillea millefolium		A spreading, mat-forming semi-evergreen perennial with feathery, mid-green leaves. Flat heads of white, cream or pale pink flowers are produced from early to late summer. Ideally plant in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalky soils. Mature height and spread: up to 50cm x 50cm. Hardiness: H7.
Achillea millefolium 'Rose Madder'		A mat-forming semi-evergreen perennial with feathery, mid-green leaves. Flat heads of rose pink flowers are produced from early to late summer. Plant preferably in full sun, in well-drained soil, but will tolerate a range of conditions. Mature height and spread: 35cm x 60cm. Hardiness: H7.
Achillea millefolium 'Cerise Queen'		A vigorous, mat-forming semi-evergreen perennial with feathery, dark green leaves. Flat heads of magenta-pink flowers which fade with age are produced from early to late summer. Ideally plant in full sun, in well-drained soil, but will tolerate a range of conditions. Good for chalky soils. Mature height and spread: 60cm x 50cm. Hardiness: H7.
Achillea millefolium 'Lilac Beauty'	JOP	
Achillea ptarmica 'Double Diamond'		An herbaceous perennial with linear, finely toothed, dark green leaves. Throughout summer, clusters of tight, pure white semi-double or double flowers are produced. Plant preferably in full sun, in well-drained soil, but will tolerate a range of conditions. Mature height and spread: 80cm x 60cm. Hardiness: H7.
Achillea ptarmica 'The Pearl'		An herbaceous perennial with linear, finely toothed, dark green leaves. Throughout summer, clusters of tight, pure white double flowers are produced. Plant preferably in full sun, in well-drained soil, but will tolerate a range of conditions. Mature height and spread: 75cm x 60cm. Hardiness: H7.
Acis autumnalis AGM	Not currently in production	A bulbous perennial with narrow, linear, dark green leaves which appear at the same time or after flowers. Small, bell-shaped, white flowers with red-tinged bases are produced in late summer and autumn. Plant in full sun, in any well-drained soil. Mature height and spread: 10-15cm x 5cm. Hardiness: H5.

Aconitum 'Newry Blue'		An upright herbaceous perennial with deeply lobed, dark green leaves. Spikes of mid-blue flowers a produced in mid to late summer. Plant in partial shade, in cool, moist soil. Mature height and spread: 1.5m x 30cm. Hardiness: H7. All parts of this plant are highly toxic.
Aconitum 'Spark's Variety'	JOP	
Aconitum 'Stainless Steel'		An upright herbaceous perennial with deeply lobed, dark green leaves. Spikes of steely, grey-blue flowers a produced in mid to late summer. Plant in partial shade, in cool, moist soil. Mature height and spread: 1.2m x 45cm. Hardiness: H7. All parts of this plant are highly toxic if ingested.
Aconitum carmichaelii 'Arendsii'		
Actaea matsumurae 'White Pearl'		
Actaea simplex 'Hillside Black Beauty'		
Actaea simplex 'Hillside Black Beauty' (Baneberry) AGM		A clump-forming herbaceous perennial with very dark purple, almost black divided leaves. Spikes of scented, pale pink, bottle-brush like flowers opening from darker pink buds are produced in early autumn. Ideally plant in partial shade, in cool, moist, fertile soil. Mature height and spread: 1.2-1.5m x 60cm. Hardiness: H7.
Actaea simplex 'Pink Spike'		A clump-forming herbaceous perennial with dark purple, divided, palmate leaves. Spikes of pale pink, bottle-brush flowers opening from darker pink buds are produced in late summer. Ideally plant in partial shade, in cool, moist, fertile soil. Mature height and spread: 1.4m x 50cm. Hardiness: H7.
Actaea simplex 'Brunette'	JOP	

Adiantum venustum (Himalayan maidenhair fern) AGM	Not currently in production	An evergreen fern (except when below -10°C) with creeping rhizomes. Mid-green fronds are made up of tiny fan-shaped segments and are held on thin black stems. New fronds emerge bright bronze-pink in late winter/spring. Ideally plant in partial shade, in moderately fertile, moist soil. Mature height and spread: 25cm x 1m. Hardiness: H7.
Agastache 'Blackadder'	Dark blue flower spikes. H 90cm	An upright, clump-forming herbaceous perennial with aromatic, blue-green leaves. Spikes of blue-black buds open to blue petals from midsummer to late autumn. This variety is one of the hardiest Agastache. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 90cm x 50cm. Hardiness: H7.
Ageratina altissima 'Chocolate' (Syn. Eupatorium rugosum 'Chocolate')	Maroon leave. Upright stems topped with clusters of white flowers in summer. H 1m	A clump-forming herbaceous perennial with and deep purple leaves. Stiff brown stems which bear flat heads of off-white flowers from midsummer to early autumn. Ideally plant in partial shade, in moist, alkaline soil. Mature height and spread: 1m x 60cm. Hardiness: H5.
Ajuga reptans BLACK SCALLOP PBR	Spikes of blue flowers. H 15cm	A creeping evergreen perennial with partly hairy stems and spoon-shaped dark maroon-purple leaves with scalloped edges. Dark blue flowers are produced on short spikes from late spring to early summer. Excellent ground cover plant. Ideally plant in partial or full shade, in any moist soil. Mature height and spread: 15cm x 60-90cm. Hardiness: H7.
Ajuga reptans 'Burgundy Glow'		A creeping evergreen perennial with partly hairy stems and spoon-shaped silvery green leaves suffused deep wine-red. Dark blue flowers are produced on short spikes from late spring to early summer. Excellent ground cover plant. Ideally plant in partial or full shade, in any moist soil. Mature height and spread: 15cm x 60-90cm. Hardiness: H7.
Ajuga reptans 'Braunherz'		A creeping evergreen perennial with partly hairy stems and spoon-shaped glossy deep purple leaves which turn darker in summer. Dark blue flowers are produced on short spikes from late spring to early summer. Excellent ground cover plant. Ideally plant in partial shade or full shade, in any moist soil. Mature height and spread: 15cm x 60-90cm. Hardiness: H7.
Ajuga reptans 'Caitlin's Giant'		
Alchemilla epipsila		
Alchemilla erythropoda	Compact. Lime green flowers. H30cm	A clump-forming perennial with blueish green, softly hairy, rounded, lobed leaves. Spikes of greenish yellow flowers are produced in summer and early autumn. More compact than A. mollis. Water droplets look exquisite on the leaves. Plant in sun or partial shade, in any soil. Mature height and spread: 20-30cm x 20cm. Hardiness: H7.

Alchemilla mollis	Lime green flowers. Soft leaves which hold water droplets. H60cm	A clump-forming perennial with pale green, softly hairy, rounded, lobed leaves. Spikes of greenish yellow flowers are produced in summer and early autumn. Water droplets look exquisite on the leaves. Plant in sun or partial shade, in any soil. Mature height and spread: 60cm x 75cm. Hardiness: H7.
Allium atropurpureum		
Allium christophii	JOP	
Allium hollandicum 'Purple Sensation' AGM		A bulbous perennial with strap-shaped, grey-green leaves 30-60cm long. Stems bearing round umbels (8cm across) of many star-shaped, deep violet flowers in summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 1m x 7cm. Hardiness: H6.
Allium possibly 'Eros'		
Allium schoenoprasum (Chives)	Pink flowers, H 45cm	A perennial with short rhizomes, usually grown for its edible cylindrical green leaves. Dense umbels (2.5cm across) of pale purple flowers are produced in summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 30-60cm x 10cm. Hardiness: H6.
Allium senescens AGM		A vigorous, bulbous herbaceous perennial with short, strap-shaped, green leaves. Dense rounded umbels of long lasting pink-lilac flowers are produced in mid and late summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 30cm x up to 50cm. Hardiness: H6.
Allium sphaerocephalon		A bulbous perennial with linear, mid-green leaves to 35cm long. Drumstick-like ovoid umbels of small tightly packed, bell-shaped, pink to dark red-brown flowers are produced in summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 50-90cm x 8cm. Hardiness: H6.
Allium stipitatum 'Mount Everest' AGM		A bulbous perennial with strap-shaped, mid-green leaves 30-60cm long, which die back at flowering time. Strong stems bear round umbels (6-8cm across) of many star-shaped, white flowers in early summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 1-1.5m x 15cm. Hardiness: H6.

Allium ursinum (Wild Garlic)	JOP	
Alstroemeria 'Majestic Chartrene'		
Alstroemesia 'Phoenix'		
Althaea cannabina (Palm-leaved Marsh Mallow)		A woody-based perennial with hairy, toothed leaves which are dark green above and paler underneath. Clusters of pink, cup-shaped flowers which sometimes have a darker pink 'eye' are produced on tall stems from midsummer to autumn. Ideally plant in full sun, in fertile, moist, but well-drained soil. Tolerant of most soils. Mature height and spread: 2m x 60cm. Hardiness: H7.
Amsonia hubrichtii	Willowy leaves, grey-blue flowers. H70cm	
Amsonia tabernaemontana		A clump-forming perennial with many stems of lance-shaped, dark green leaves. Rounded clusters of pale blue, star-shaped flowers are produced for a long period from late spring to midsummer. Ideally plant in full sun or light shade, in any moist soil. Will tolerate some drought Mature height and spread: 60cm x 45cm. Hardiness: H5.
Anemanthele lessoniana (Stipa arundinacea)		A loosely tufted, evergreen perennial grass with leathery, dark green leaves, streaked orange-brown in summer and turning fully orange-brown in winter. Pendent panicles of purplish green spikelets are produced from midsummer to early autumn. Plant in sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 1m x 1.2m. Hardiness: H4.
Anemone hupehensis var. japonica 'Prinz Heinrich'	JOP	
Anemone hupensis 'Praecox'		An upright herbaceous perennial with lobed, 3 palmate, dark green basal leaves held on long stalks. Stems bear bowl-shaped, deep pink flowers from late summer to autumn. Plant in sun or partial shade, in moist, but well-drained, fertile soil. Mature height and spread: 50cm x 40cm. Hardiness: H7.

Anemone hupensis var. Japonica ‘Pamina’		An upright herbaceous perennial with lobed, 3 palmate, dark green basal leaves held on long stalks. Smaller, lobed, pointed leaves are held on stems which bear reddish purple, semi-double flowers in mid and late summer. Plant in sun or partial shade, in moist, but well-drained, fertile soil. Mature height and spread: 75cm x 40cm. Hardiness: H7.
Anemone leveillei	JOP	
Anemone nemorosa ‘Blue Eyes’		
Anemone nemorosa ‘Bowler’s Purple’		
Anemone nemorosa ‘Robinsoniana’		
Anemone nemorosa ‘Westwell Pink’		
Anemone nemorosa 'Bowles Purple'	Not currently in production	
Anemone ranunculoides		
Anemone ranunculoides ‘Ferguson’s Fancy’		

Anemone sylvestris	Not currently in production	A spreading herbaceous perennial with a woody-based roostock. Long stalked, mid-green divided leaves. Stems bearing single, semi-pendent, white flowers are produced in spring and early summer. Plant in full sun or partial shade, in well-drained, humus-rich soil. Mature height and spread: 30-50cm x 30-50cm. Hardiness: H6.
Anemone WILD SWAN PBR		
Anemone x hybrida 'Bressingham Glow'		
Anemone x hybrida 'Honorine Jobert'	Single, white flowers on stems late summer onwards. H1.2m	An upright, vigorous herbaceous perennial with lobed, 3 palmate, mid-green basal leaves. Smaller, lobed, pointed leaves are held on stems which bear single white flowers with yellow stamens from late summer to autumn. Plant in sun or partial shade, in moist, fertile, humus-rich soil, that is not waterlogged. Mature height and spread: 1.2m x indefinite. Hardiness: H7.
Anemone x hybrida 'Queen Charlotte'		An upright, vigorous herbaceous perennial with lobed, 3 palmate, mid-green basal leaves. Smaller, lobed, pointed leaves are held on stems which bear semi-double pink flowers, with purple undersides, from late summer to autumn. Plant in sun or partial shade, in moist, fertile, humus-rich soil, that is not waterlogged. Mature height and spread: 1.5m x indefinite. Hardiness: H7.
Anemone x hybrida 'Richard Ahrens'		An upright, vigorous herbaceous perennial with lobed, 3 palmate, mid-green basal leaves. Smaller, lobed, pointed leaves are held on stems which bear single, creamy pink flowers with yellow stamens from late summer. Plant in sun or partial shade, in moist, fertile, humus-rich soil, that is not waterlogged. Mature height and spread: 80-100cm x indefinite. Hardiness: H7.
Anemone x hybrida 'Whirlwind'		
Anemone x lipsiensis 'Pallida'		

Angelica archangelica		- A robust herbaceous perennial, which is sometimes monocarpic (flowers, then dies) with large, divided, mid-green leaves. Rounded umbels of greenish yellow flowers are produced on stout stems in early and midsummer. More likely to be perennial if deadheaded before setting seed. Ideally plant in partial shade, in deep, moist, fertile soil. Tolerates drier conditions if shaded.
Angelica gigas	Divided leaves. Purple stems topped with an umbel of deep purple flowers. H 1.2-1.5m	A robust clump-forming biennial or short-lived herbaceous perennial with toothed, mid-green leaves made up of leaflets. Purple stems bear umbels of rich, dark purple flowers in late summer and early autumn. Plant in full or partial shade, in deep, moist, fertile soil. Mature height and spread: 1-2m x 1.2m. Hardiness: H6.
Anthemis 'Cally Cream'		
Anthemis tinctora 'Sauce Hollandaise'		
Anthriscus sylvestris 'Ravenswing'	Divided purple-brown leaves, white cow parsley flowers. H 1m	A clump-forming biennial or short-lived perennial with lacy, divided, dark purple-brown leaves. Umbels of tiny white flowers with pink bracts are produced on stems from late spring to summer. Self-seeds freely. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: 1m x 30cm. Hardiness: H6.
Aquilegia 'Lime Sorbet'		An upright perennial with mid-green leaves that are glaucous beneath and divided into lobed leaflets. Pale lime green flowers are produced in clusters on stiff stems in late spring and early summer. Ideally plant in full sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 75cm x 45cm. Hardiness: H7.
Aquilegia vulgaris var. stellata 'Black Barlow'		An upright perennial with mid-green leaves that are glaucous beneath and divided into lobed leaflets. Double, deep purple black flowers are produced in clusters on stiff stems in late spring and early summer. Plant in full sun or partial shade, in any reasonable, well-drained soil. Mature height and spread: 80cm x 45cm. Hardiness: H7.
Aquilegia vulgaris var. stellata 'Nora Barlow'		An upright perennial with mid-green leaves that are glaucous beneath and divided into lobed leaflets. Double pompon red and pale green petalled flowers are produced in clusters on stiff stems in late spring and early summer. Plant in full sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 90cm x 45cm. Hardiness: H7.

Aquilegia vulgaris var. stellata 'Ruby Port'	Double ruby red flowers. H 75cm	
Aquilegia vulgaris. Double Purple from Billy's Garden'		An upright perennial with mid-green leaves that are glaucous beneath and divided into lobed leaflets. Dark purple double flowers are produced in clusters on stiff stems in late spring and early summer. Ideally plant in full sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 75cm x 45cm. Hardiness: H7.
Aquilegia vulgaris. Pink from Billy's Garden		An upright perennial with mid-green leaves that are glaucous beneath and divided into lobed leaflets. Flowers with pink outer petals and white inner petals are produced in clusters on stiff stems in late spring and early summer. Ideally plant in full sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 70cm x 45cm. Hardiness: H7.
Armeria maritima 'Alba'		
Armeria maritima 'Splendens'	JOP	
Artemesia lactiflora Guizho Group (White Mugwort)		A clump-forming herbaceous perennial with deeply divided, dark green leaves flushed with purple. Spreading sprays of small white flowers are produced from late summer to autumn. Good for cut flowers. Ideally plant in full sun, in fertile, fairly moist soil. Mature height and spread: 1.5m x 60cm. Hardiness: H7.
Artemisia 'Valerie Finnis'		
Artemisia ludoviciana 'Silver Queen'		

Artemisia ludoviciana 'Valerie Finnis' (Western Mugwort)		An herbaceous perennial with silver leaves which almost look like white flowers when they are young. Spikes of tiny yellow flowers are produced from late summer. Leaves are smaller than 'Silver Queen'. This variety was given to Beth Chatto by Valerie Finnis and Beth named it after her. Good for chalk. Plant in full sun, in any reasonable, well-drained soil. Dislikes waterlogging. Approximate height and spread: 50-70cm x 60cm. Hardiness: H6, down to -20°C.
Aruncus 'Horatio'		A clump-forming herbaceous perennial with finely divided golden green leaves, which colour beautifully in autumn. Light and airy plumes of bronze-tinted, creamy cream flowers are produced on red-brown stems in summer. Good for cutting. Plant in full or partial shade, in moist, fertile soil. Mature height and spread: 80-120cm x 30cm. Hardiness: H7.
Aruncus aethusifolius AGM		A compact herbaceous perennial with deeply cut, feathery, mid-green leaves, which turn yellow in autumn. Small plumes of tiny creamy white flowers are produced in early and midsummer. Flowers are good for cutting. Plant in full or partial shade, in moist, fertile soil. Mature height and spread: 40cm x 30cm. Hardiness: H7.
Aruncus dioicus 'Kneiffii'	JOP. Creamy white flower plume. H90cm.	
Asplenium scolopendrium (Hart's Tounge Fern)	Evergreen, glossy fronds. H70cm	An evergreen fern with erect or shortly creeping rhizomes. Whole, leathery, glossy, bright green narrow fronds. Plant in partial shade, in moist, but well-drained soil. Mature height and spread: 70cm x 50cm. Hardiness: H6.
Asplenium scolopendrium 'Angustatum'		
Asplenium scolopendrium. Undulatum Group (Hart's Tounge Fern)		An evergreen fern with erect or shortly creeping rhizomes. Whole, leathery, glossy, bright green narrow fronds with irregularly wavy margins. Plant in partial shade, in moist, but well-drained soil. Mature height and spread: 30cm x 50cm. Hardiness: H6.
Asplenium trichomanes	Not currently in production	

Aster ageratoides 'Ezo Murasaki'		
Aster amellus 'Brilliant'		A clump-forming, upright herbaceous perennial with lance-shaped, mid-green leaves. Loose clusters of bright pink, daisylike flowers are produced from late summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Grows well in chalky soils. Mature height and spread: 75cm x 45cm. Hardiness: H7
Aster amellus 'King George' AGM	Violet-blue daisy-like flowers late summer onwards. H. 45-60cm	A clump-forming, upright herbaceous perennial with lance-shaped, mid-green leaves. Loose clusters of violet-blue, daisylike flowers are produced from late summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Grows well in chalky soils. Mature height and spread: 45-60cm x 45cm. Hardiness: H7
Aster amellus 'Rosa Erfüllung' ('Pink Zenith') AGM	Clusters of soft pink daisies from late summer to autumn. H60cm	A clump-forming, upright herbaceous perennial with lance-shaped, mid-green leaves. Loose clusters of soft pink, daisylike flowers are produced from late summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Grows well in chalky soils. Mature height and spread: 60cm x 45cm. Hardiness: H7.
Aster amellus 'Rudolph Goethe'		A clump-forming, upright herbaceous perennial with lance-shaped, mid-green leaves. Loose clusters of deep lavender-blue, daisylike flowers are produced from late summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Grows well in chalky soils. Mature height and spread: 55cm x 45cm. Hardiness: H7.
Aster amellus 'Veilchenkonigin' (Violet Queen)		A compact, clump-forming, upright herbaceous perennial with lance-shaped, mid-green leaves. Loose clusters of deep violet-purple, daisylike flowers are produced from late summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Grows well in chalky soils. Mature height and spread: 40cm x 45cm. Hardiness: H7.
Aster pyrenaicus 'Lutetia'		A clump-forming herbaceous perennial with stems covered in pale lilac-blue, narrow petalled, daisy-like flowers throughout midsummer and early autumn. The flowers seem to glow in evening light. Mildew resistant. Plant in full sun, in fertile soil. Mature height and spread: 50cm x 30cm. Hardiness: H6.
Aster x frikartii 'Mönch' AGM	Lilac blue flowers. H70cm	An upright herbaceous perennial with oblong, dark green leaves. Strong stems bear loose clusters of lavender-blue, daisy-like flowers are produced from late summer to autumn. Flowers for a long period and is mildew free, a great Aster! Plant in full sun, in well-drained, moderately fertile soil. Good for chalk. Mature height and spread: 70cm x 45cm. Hardiness: H7.

Aster x frikartii 'Wunder von Stafa'		- An upright herbaceous perennial with oblong, dark green leaves. Loose clusters of blue, daisy-like flowers are produced from late summer to autumn. Flowers for a long period and is mildew free, a great Aster! Almost identical to 'Mönch', but slightly shorter. - Plant in full sun, in well-drained, moderately fertile soil. - Mature height and spread: 70-80cm x 45cm. Hardiness: H7.
Astilbe 'Deutschland'		A clump-forming herbaceous perennial with bright green, divided leaves. Upright plumes of pure white flowers are produced in late spring. Plant in full sun in moist soil, or partial shade in drier soils, in fertile soil, preferably humus-rich. Mature height and spread: 50cm x 30cm. Hardiness: H7.
Astilbe 'Maggie Daley'		A clump-forming herbaceous perennial with dark green, divided leaves with bronze tinges. Upright plumes of deep pink flowers are produced in late spring. Plant in full sun in moist soil, or partial shade in drier areas, in fertile soil, preferably humus-rich. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Astilbe 'Fanal'		
Astilbe rivularis		
Astilbe 'Sprite'		A compact, clump-forming herbaceous perennial with broad, dark green, divided leaves. Upright plumes of shell-pink flowers are produced in late spring. Ideally plant in full sun in moist soil, or partial shade in drier soils, in fertile soil, preferably humus-rich. Mature height and spread: 25cm x 50cm. Hardiness: H7.
Astilbe 'Venus'		
Astrantia 'Buckland' AGM		

Astrantia 'Hadsphen Blood'		A clump-forming perennial with toothed, dark green leaves. Dark red bracts are formed around dark red flowers which are produced in umbels in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 70cm x 45cm. Hardiness: H7.
Astrantia 'Rudy Wedding'		A clump-forming perennial with toothed, dark green leaves. Purplish-red bracts are formed around purplish-red flowers which are produced in umbels in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 90cm x 45cm. Hardiness: H7.
Astrantia major		A clump-forming perennial with toothed, dark green leaves. Green-veined white-pink bracts are formed around green, pink or sometimes red-purple flowers, which are produced in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 30-90cm x 45cm. Hardiness: H7.
Astrantia major 'Gill Richardson' Group	Red flowers surrounded by red bracts, early to midsummer. H 65cm	A clump-forming perennial with toothed, dark green leaves. Prominent red-tipped bracts are formed around tiny, crimson-red flowers, which are produced in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 90cm x 45cm. Hardiness: H7.
Astrantia major 'Red Joyce'	Not currently in production	
Astrantia 'Roma' PBR	Soft pink flowers, H75cm	A choice plant. A clump-forming perennial with toothed, dark green leaves. Prominent pink bracts are formed around tiny, rose-red flowers, which are produced in umbels for a long period in summer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 75cm x 50cm. Hardiness: H7.
Astrantia major 'Sunningdale Variegated'	Not currently in production	A clump-forming perennial with toothed, dark green leaves, unevenly margined with creamy yellow. Green-veined pale pink bracts are formed around green, pink or sometimes red-purple flowers, which are produced in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 30-90cm x 45cm. Hardiness: H7.
Astrantia major 'Claret'		

Astrantia major subsp involucrata 'Shaggy'	JOP. Greenish white flowers surrounded by white bracts, early to midsummer. H 75cm	
Astrantia maxima		A clump-forming perennial with deeply divided, dark green leaves. Pale pink bracts are formed around soft pink flowers, which are produced singly or in two's or three's in early and midsummer. Plant in sun or partial shade, in moist, fertile soil. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Athyrium felix-femina	Not currently in production	
Athyrium niponicum var. pictum (painted lady fern)		A deciduous fern with creeping rhizomes producing silver-grey fronds with red stalks, often flushed purple-red. Ideally plant in shade in moist, fertile neutral to acid soil. Mature height and spread: 30cm x indefinite. Hardiness: H5.
Athyrium niponicum var.pictum 'Red Beauty'	Not currently in production	
Aubrieta. Double white with a pink tinge		A mat-forming herbaceous perennial with small, slightly hairy, green leaves. Clusters of small, double, white flowers with a pale pink tinge are produced in spring. Ideally plant in full sun, in any well-drained soil. Good for chalk. Good for walls, rock gardens or ground cover. Mature height and spread: 10cm x 60cm. Hardiness: H6.
Ballota pseudodictamnus		
Baptisia alba		

Baptisia australis (False Indigo)	JOP	
Baptisia 'Vanilla Cream' (False Indigo)	Pale yellow flowers. H 80cm	An upright herbaceous perennial with blue stems and blue-green leaves. Spikes of purple buds, opening to pale yellow pea-like flowers are produced from late spring to midsummer. Plant in full sun, in a deep, well-drained soil where deep tap roots can develop. Resents disturbance. Mature height and spread: 80cm x 70cm. Hardiness: H7, down to -20°C and below.
Bergenia 'Bach'		A clump-forming perennial with oval, leathery, deep green leaves that turn red-tinted in winter. Panicles of bell-shaped, soft pink flowers are produced in spring, maturing to white. Good for ground cover. Plant in full sun or partial shade, in moist, but well-drained soil. Poor soil is tolerated. Mature height and spread: 30cm x 30cm. Hardiness: H5.
Bergenia 'Bressingham White'		A clump-forming perennial with broadly obovate, leathery, deep green leaves. Panicles of bell-shaped, soft pure white flowers are produced in spring. Good for ground cover. Plant in full sun or partial shade, in moist, but well-drained soil. Poor soil is tolerated. Mature height and spread: 30-45cm x 45-60cm. Hardiness: H6.
Bergenia 'Bressingham Ruby'		
Bergenia 'Bressingham Ruby'		
Bergenia cordifolia		A vigorous, clump-forming evergreen, perennial with large (to 30cm long), slightly wavy, mid- to deep green leaves, which are tinted purple in winter. Upright green stems bear clusters of deep pink flowers in late winter and early spring. Ideally plant in full sun or partial shade, in moist, but well-drained soil. Poor soil is tolerated. Mature height and spread: 60cm x 75cm. Hardiness: H7.
Bergenia 'Rotblum'		A clump-forming, evergreen perennial with oval, leathery, wavy-edged green leaves which turn red-tinted in winter. Clusters of bell-shaped, rosy pink/red flowers are produced on red stems in spring. Good for ground cover. Ideally plant in full sun or partial shade, in moist, but well-drained soil. Poor soil is tolerated. Mature height and spread: 50cm x 70cm. Hardiness: H5.

Betonica officinalis 'Hummelo' (Formerly Stachys officinalis 'Hummelo')	Not currently in production	
Bidens aurea 'Hannay's Lemon Drop'	Not currently in production	A vigorous, clump-forming perennial with lance shaped, scalloped, bright green leaves, sometimes deeply divided. Slender stems bear daisy-like lemon yellow flowers with the outer petals tipped with white. Plant in full sun, in reasonably fertile, moist, but well-drained soil. Mature height and spread: 1m x 1m. Hardiness: H3.
Bistorta amplexicaulis 'Alba' (Formerly Persicaria amplexicaulis 'Alba')		A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks are branched at the top and bear long spikes of white flowers from mid-summer to early autumn. Plant in full sun or partial shade, in any average to moist soil. Mature height and spread: 1.2m x 1.2m. Hardiness: H7.
Bistorta amplexicaulis 'Atrosanguinea' (Formerly Persicaria amplexicaulis 'Atrosanguinea')		A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks are branched at the top and bear slender spikes of small, red flowers from mid-summer to early autumn. Ideally plant in full sun or partial shade, in any soil. Approximate height and spread: 1.2m x 1.2m. Hardiness: H7.
Bistorta amplexicaulis 'Blackfield' PBR (Red Bistort. Formerly Persicaria) AGM	Dark red flower spikes. H 100cm	A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks bear spikes of small, dark red flowers from August into autumn. Loved by pollinators. Plant in full sun or partial shade, in any reasonable soil. Mature height and spread: 90-100cm x 90cm. Hardiness: H7.
Bistorta amplexicaulis 'Fine Pink' (Formerly Persicaria amplexicaulis 'Fine Pink')		A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks are branched at the top and bear spikes of small, pale pink flowers from mid-summer to early autumn. Plant in full sun or partial shade, in any moist soil. Mature height and spread: 1.3m x 1.2m. Hardiness: H7.
Bistorta amplexicaulis 'Firetail' (Formerly Persicaria amplexicaulis 'Firetail')		A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks bear spikes of small, bright red flowers from mid-summer to early autumn. Plant in full sun or partial shade, in any moist soil. Mature height and spread: 1.2m x 1.2m. Hardiness: H7.
Bistorta amplexicaulis 'Golden Arrow' (Formerly Persicaria amplexicaulis 'Golden Arrow')		
Bistorta amplexicaulis 'Orange Field' (Formerly Persicaria amplexicaulis 'Orange Field' PBR)	Not currently in production	A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks bear spikes of small, orange-pink flowers from mid-summer to early autumn. Plant in full sun or partial shade, in any moist soil. Mature height and spread: 60-90cm x 60-90cm. Hardiness: H7.

Bistorta amplexicaulis 'Rosea' (Formerly Persicaria amplexicaulis 'Rosea')		
Bistorta officinalis (Formerly Persicaria bistorta)	JOP	
Blechnum chilense (Chilean Hard Fern) AGM	Not currently in production	An evergreen fern with a creeping rhizome, which has dark green, glossy, lance-shaped fronds which are simply divided (pinnate) and held on brown, scaly stalks. Fertile fronds are more erect. Ideally plant in partial shade or deep shade, in moist, humus-rich soil. Mature height and spread: 1.2m x 1.5-2.5m. Hardiness: H4.
Blechnum penna-marina	Not currently in production	
Blechnum spicant (Hard/ Deer Fern) AGM		An evergreen fern with short, creeping rhizomes, with dark green, glossy, narrow fronds which are simply divided (pinnate) or sometimes shallowly lobed. Fertile fronds are more erect and sterile fronds form a rosette around the fertile ones. Ideally plant in partial shade or deep shade, in moist, humus-rich soil. Mature height and spread: 50cm x 60cm. Hardiness: H6.
Bouteloua gracilis (Blue Grama or Mosquito Grass)	Deciduous. Light green leaves. Red-green flower spikes are held horizontally, like an eyebrow. H 30-60cm	
Brunnera macrophylla		A ground-covering perennial with softly hairy, mid-green, heart-shaped leaves. Blue, forget-me-not like flowers are produced on stalks in mid and late spring. Plant in shade or partial shade, in humus-rich, moist, but well drained soil. Mature height and spread: 45cm x 60cm. Hardiness: H6.
Brunnera macrophylla 'Emerald Mist'?		

Brunnera macrophylla 'Jack Frost' PBR	Not currently in production	
Brunnera macrophylla 'Jennifer'	Not currently in production	
Brunnera macrophylla 'Looking Glass' PBR AGM		
Brunnera macrophylla 'Silver Heart' PBR		
Brunnera macrophylla 'Betty Bowring'		
Brunnera macrophylla 'Dawson's White'		
Brunnera macrophylla 'Diane's Gold' PBR	Not currently in production	
Brunnera macrophylla 'Henry's Eyes'	Not currently in production	
Calamagrostis brachytricha (Korean Feather Reed Grass)	Smoky purple flower plumes. H1.2m	A clump-forming perennial grass with linear, hairy, mid-green leaves. Upright stems produce soft, purple plumes in late summer and early autumn, which fade and last well into winter. Ideally plant in full sun or partial shade, in moist, humus-rich soil, that does not get waterlogged. Mature height and spread: approx. 1.2m x 60cm. Hardiness: H6.

Calamagrostis x acutiflora 'Karl Foerster'	Upright, flowers age to buff. H180cm	A slowly clump-forming, perennial grass with gently arching, flat, mid-green leaves. Upright flower stems produce soft, pink-bronze seed heads in mid-late summer, which fade to pale brown and last into winter. Plant in sun or partial shade, in moist, humus-rich soil, that does not get waterlogged. Mature height and spread: 1.8m x 60cm. Hardiness: H6.
Calamagrostis x acutiflora 'Overdam'	JOP	Yellow-cream striped leaves
Calamintha nepeta	Clusters of tiny mauve-blue flowers, loved by bees, throughout summer. H. 45-60cm.	An herbaceous perennial with small, aromatic, dark green leaves that are slightly hairy. Mauve-blue, occasionally pink flowers are produced in cymes along branched stems in summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread: 45-60cm x 50-75cm. Hardiness: H5.
Calamintha nepeta 'Marvelette White'		
Calamintha nepeta subsp. glandulosa 'White Cloud'		An herbaceous perennial with small, peppermint-scented, dark green leaves that are slightly hairy. White flowers are produced in cymes along branched stems in summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread: 45cm x 50cm. Hardiness: H5.
Camassia leichtlinii subsp. Leichtlinii (C. leicht. 'Alba)		A bulbous perennial with bright green, linear leaves. Spikes bearing racemes of creamy white, star-shaped flowers are produced in late spring. Plant in sun or partial shade, in moist, humus-rich soil which does not get waterlogged. Mature height and spread: 1.2m x 10cm. Hardiness: H4.
Camassia leichtlinii subsp. sucksdorfii Caerulea Group		A bulbous perennial with bright green, linear leaves. Spikes bearing racemes of blue, star-shaped flowers are produced in late spring. Plant in sun or partial shade, in moist, humus-rich soil which does not get waterlogged. Mature height and spread: 1.2m x 10cm. Hardiness: H4.
Campanula lactiflora (Milky Bellflower)		
Campanula lactiflora 'Prichard's Variety'	Tall stems with clusters of bell-shaped violet-blue flowers. H75cm	

Campanula lactiflora 'Loddon Anna' (Milky Bellflower) AGM		An upright herbaceous perennial with toothed, mid-green leaves. Rounded clusters of soft pink flowers are produced on leafy stems in summer. Ideally plant in full sun or partial shade, in fertile neutral to alkaline, moist but well-drained soil. Good for chalk. Mature height and spread: 1.2m x 60cm. Hardiness: H7.
Campanula persicifolia		A rosette-forming, upright, evergreen perennial with narrow, bright green leaves. Spikes bearing 2 or 3 bell shaped, blue flowers are produced in early and midsummer. Forms good clumps. Good for chalky soils. Ideally plant in fertile, moist, but well-drained soil in full sun or partial shade. Mature height and spread: 90cm x 30cm. Hardiness: H7.
Campanula poscharskyana 'Stella'		
Campanula poscharskyana 'Lisduggan Variety' (Trailing/Serbian Bellflower)		A spreading semi-evergreen herbaceous perennial with green leaves. Slower spreading than other varieties. Many star-shaped lilac flowers are produced over a long period throughout summer. Great for edging a path, covering ground or spilling over a wall. Plant in full sun or partial shade, in any well-drained soil that doesn't waterlog in winter. Approximate height and spread: 10-20cm x 50cm. Hardiness: H5.
Cardamine diphylla	Not currently in production	
Cardamine quinquefolia		
Cardamine raphanifolia (Broad leaved/Greater Cuckoo Flower)		- A spreading perennial with dark green leaves divided into rounded leaflets. Stems bearing panicles of reddish violet or white flowers are produced in early summer. After flowering leaves may die back in hot summers. - Ideally plant in partial shade, in moist, humus-rich soil. Will tolerate full sun if not too dry. - Mature height and spread: 45-80cm x 60cm. Hardiness: H7.
Carex comans. Bronze-leaved		A tufted, evergreen perennial grass with tussocks of hair-like, bronze coloured leaves. Brown flower spikes are produced on stems in mid- and late summer. Plant in full sun or partial shade, in any reasonable soil that does not dry out too much or get waterlogged. Mature height and spread: 30cm x 50cm. Hardiness: H4.

Carex muskingumensis (Palm Branch Sedge)	Brown flower spikes. H75cm	A clump-forming, semi-evergreen sedge with thin, light green leaves. Spikes bearing golden brown flowers are produced in summer. Ideally plant in partial shade or full sun, in any moist soil. More sun is tolerated if the soil stays wet. Mature height and spread: 75cm x 75cm. Hardiness: H4.
Carex oshimensis 'Everest'		
Carex oshimensis 'Evergold' AGM		A tufted, evergreen, perennial grass forming a low mound of dark green leaves with a wide central creamy yellow stripe. Brown flower spikes are produced in mid and late spring. Plant in full sun or partial shade, in fertile, moist, but well-drained soil. Mature height and spread: 30cm x 35cm. Hardiness: H7.
Carex oshimensis EVEREST ('Fiwhite') PBR		
Carex testacea		A densely tufted, evergreen perennial grass with arching leaves that are pale olive-green with some orange-brown. Cylindrical, brown flower spikes are produced in midsummer. Plant in full sun or partial shade, in any reasonable soil that does not dry out too much or get waterlogged. Mature height and spread: to 1.5m x 60cm. Hardiness: H5.
Catananche caerulea (Cupid's Dary)	Narrow leaves, blue flowers	A clump forming, short-lived perennial with grass-like, hairy, greyish-green leaves. Stems carrying single blue flowers with dark centres are produced from midsummer to autumn. Flowers are good for drying. Ideally plant in any well drained soil in full sun. Good drought resistance. Shorter lived on heavier soils. Mature height and spread: 50-90cm x 30cm. Hardiness: H5.
Cenolophium denudatum AGM	Greenish white flower umbels. H to 1.2m	- A fast-growing, semi-evergreen, clump-forming perennial with finely divided, dark green leaves. Tall stems topped flat umbels of greenish white flowers are produced in summer and autumn. Attractive to insects. A lovely perennial umbellifer. - Ideally plant in sun or partial shade, in any moist, but well-drained soil. - Mature height and spread: to 1.5m x 50cm. Hardiness: H6.
Centaurea 'Jordy'	JOP	

Centaurea montana- Perennial Cornflower		
Centranthus ruber		A clump-forming perennial with lance-shaped, glaucous, deep to mid-green leaves. Dense cymes of small rose-pink to red flowers are produced throughout late spring and summer. Self-seeds freely. Plant in full sun, in poor, well-drained soil, preferably chalky. Mature height and spread: 1m x 1m. Hardiness: H5.
Cephalaria alpina	Not currently in production	
Cephalaria alpina		
Cephalaria gigantea (Giant Scabious)		A clump-forming herbaceous perennial with divided green leaves. Tall stems bearing pale yellow, scabious-like flowers are produced in summer. Ideally plant in full sun or partial shade, in any reasonable soil. Mature height and spread: up to 2.5m x 60cm. Hardiness: H7.
Cerastium tomentosum- snow in summer		
Ceratostigma plumbaginoides		A spreading, woody perennial with erect, red stems bearing small, bright green, obovate leaves with wavy margins, which are tinter red in autumn. Clusters of bright blue flowers are produced in late summer. Plant in full sun, in moderately fertile, well-drained soil. Mature height and spread: 45cm x 30cm or more. Hardiness: H5.
Chamaenerion angustifolium 'Album'	JOP	
Chasmanthium latifolium		A loosely tufted, spreading, perennial grass with broadly lance-shaped, arching mid-green leaves which turn yellow in winter. Flat, oblong spikelets are produced in late summer and autumn and age to brown. Ideally plant in full sun or partial shade, in well-drained soil. Dislikes wet soils. Mature height and spread: 1m x 60cm. Hardiness: H7.

Chasmanthium latifolium 'Little Tickler'		
Cheilanthes lanosa	Not currently in production	
Chrysanthemum 'Clara Curtis'		
Chrysanthemum 'Emperor of China'	Not currently in production	
Chrysosplenium macrophyllum- Chinese Saxifrage		
Chrysosplenium macrophyllum green flowered form		
Cichorium intybus f. abum		A clump-forming tap-rooted perennial with toothed mid-green leaves. Branched stems bear numerous white dandelion-like flowers in summer. Ideally plant in fertile, well-drained soil in full sun. Mature height and spread: 1.2m x 60cm. Hardiness: H5.
Cirsium rivulare 'Atropurpureum' AGM	JOP. Deep red thistle flowers. H90cm	
Clematis 'Floris V'	Herbaceous. Pink bell-shaped flowers. H50cm	Herbaceous Clematis, pink bell-shaped flowers.

Clematis 'Praecox'		An herbaceous clematis with scrambling stems which produce clusters of fragrant, pale blue, recurving, tubular flowers with white or yellow anthers, from midsummer to autumn. It doesn't have climbing tendrils. Plant in full sun or partial shade. Will grow in a north-facing site, but flowers best in full sun. Plant in fertile, moist but well-drained soil. Mature height and spread: 2.5m x 1.5m. Hardiness: H6.
Clematis heracleifolia 'China Purple'	Not currently in production	
Clematis x diversifolia (Syn. C. 'Hendersonii')		An herbaceous clematis with a woody base and dark green, lance-shaped leaves, which will use neighbouring plants for support. Deep indigo-blue, bell-shaped flowers are produced in late summer and autumn. Ideally plant in full sun or partial shade. Flowers best in full sun. Plant in fertile, moist but well-drained soil, with the roots in the shade. Mature height and spread: 2.5m x 1.5m. Hardiness: H6.
Convallaria majalis (Lily of the Valley)		A rhizomatous, creeping perennial with ovate-lance-shaped, mid-green leaves. Arching racemes of white, bell-like, strongly scented flowers are produced in late spring. Plant in full or partial shade, in humus-rich, moist soil. Mature height and spread: 25cm x 30cm. Hardiness: H7.
Convallaria majalis var. Rosea (Lily of the Valley)		
Coreopsis 'Fool's Gold'		
Coreopsis verticillata 'Grandiflora'	Fine leaves. Bright yellow daisies early summer. H70cm	A bushy herbaceous perennial with fine, dark green leaflets. Dark yellow flowers are produced in loose clusters in early summer. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 70cm x 45cm. Hardiness: H5.
Coreopsis verticillata 'Moonbeam'	Fine leaves. Pale yellow daisies early summer onwards. H45cm	A loosely bushy herbaceous perennial with fine, dark green leaflets. Pale yellow flowers are produced in loose clusters for a long period during late summer and autumn. Plant in full sun or partial shade, in any reasonable, well-drained soil. Approximate height and spread: 45cm x 45cm. Hardiness: H5, down to -15°C.
Cornus alba 'Nightfall'		

Cortaderia selloana 'Pink Feather' (Pampas Grass)		A clump-forming, evergreen grass with narrow, arching, green leaves which are rough to touch. Strong stems bearing plume-like, pink flowers are produced in late summer and early autumn. Forms large clumps. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: up to 2.5m x 1.5m. Hardiness: H6.
Corydalis 'Kingfisher'		
Corydalis flexuosa 'Purple Leaf'	JOP	
Corydalis 'Korn's Purple'		
Corydalis solida 'White Knight'		
Cota tinctora 'E. C. Buxton'. Formerly Anthemis tinctora 'E. C. Buxton'		
Crambe cordifolia AGM		A clump-forming perennial producing a mound of crinkled, kidney-shaped, bristly dark green leaves. Stems bear loose panicles of fragrant white flowers in late spring and summer. Plant in full sun, in deep, fertile, well-drained soil. Poorer soils are tolerated. Mature height and spread: to 2.5m x 1.5m. Hardiness: H5.
Crocsmia 'Citronella'	Not currently in production	
Crocsmia 'Citronella'		

Crocasmia 'Emberglow'		A clump-forming herbaceous perennial with sword-like leaves. Arching flower spikes with rows of dark red, star-shaped flowers are produced in summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 75cm x 8cm. Hardiness: H4.
Crocasmia 'Lucifer'		A robust, cormous perennial with sword-shaped, mid green leaves. Spikes bearing arching branches of upward facing, bright tomato-red flowers are produced in midsummer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 1.2m x will for a large clump. Hardiness: H5.
Crocasmia 'Buttercup'	Not currently in production	
Crocasmia x crocosmiiflora 'Babylon' AGM		A robust, clump-forming herbaceous perennial with sword-like leaves. Arching, branched flower spikes, with rows of orange-red star-shaped flowers with a dark ring surrounding the golden yellow throats, are produced in summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 1m x 50cm. Hardiness: H4.
Crocasmia x crocosmiiflora 'Carmin Brilliant'		A robust, clump-forming herbaceous perennial with sword-like, pale green leaves. Arching, branched flower spikes, with rows of carmine-pink star-shaped flowers, 3cm across, are produced in summer. Ideally plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 60cm x 8cm. Hardiness: H4.
Crocasmia x crocosmiiflora 'Castle Ward Late'		A robust, clump-forming herbaceous perennial with sword-like leaves. Arching, branched flower spikes, with rows of orange star-shaped flowers, flushed with yellow, are produced in summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 90cm x 50cm. Hardiness: H5.
Crocasmia x crocosmiiflora 'Coleton Fishacre'		A robust, clump-forming herbaceous perennial with bronze-green, sword-like leaves. Arching, branched flower spikes, with rows of soft orange, star-shaped flowers are produced in summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 1.2m x 8cm. Hardiness: H5.
Crocasmia x crocosmiiflora 'Emily McKenzie' AGM		A robust, clump-forming herbaceous perennial with green, sword-like leaves. Arching, branched flower spikes of large, bright orange star-shaped flowers with a dark red ring in the centre. Produced in late summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 60-80cm x 80cm. Hardiness: H4.
Crocasmia x crocosmiiflora 'George Davison'		A robust, clump-forming herbaceous perennial with sword-like leaves. Arching, branched flower spikes, with rows of orange-yellow, star-shaped flowers are produced in summer. Plant in moderately fertile, well-drained soil, in full sun or partial shade. Mature height and spread 1m x 80cm. Hardiness: H5.

Crocus tommasinianus		A bulb with slender, silvery-lilac to purple flowers, produced in late winter and early spring. Will seed freely. Narrow leaves are produced as the flowers fade. Plant in full sun, in well-drained, poor to moderate soil. Height 8-10cm. Hardiness: H6.
Cyclamen coum		A tuberous perennial with rounded, deep green leaves, sometimes marked with silver. Pink, white or carmine-red flowers are produced on short stems in winter and spring. Can spread naturally by seed. Ideally plant in partial shade, in well-drained, moderately fertile soil. Mature height and spread: 5-8cm x 10cm. Hardiness: H5.
Cyclamen coum album		
Cyclamen hederifolium	JOP	
Cyclamen hederifolium 'Album'		
Cyclamen hederifolium 'Silver Leaf'		
Cyclamen repandum		
Cynara cardunculus		
Delphinium 'Percival'		An herbaceous, clump-forming perennial with green, deeply lobed and toothed leaves. Spikes of white flowers with black eyes are produced in early and midsummer. Plant in full sun, in fertile, well-drained soil. Mature height and spread: 1.7m x to 75cm. Hardiness: H5.

Delphinium Black Knight Group		
Delphinium 'Galahad'		
Deschampsia cespitosa 'Bronzeschleier'		A dense, tussock-forming, evergreen grass with linear, mid-green leaves. Airy, arching panicles of bronze coloured flowers are produced on stems from early to late summer, then fade to a pale straw colour. Plant in sun or partial shade, in well-drained, neutral to acid soil. Does well on our clay. Mature height and spread: 1m x 1m. Hardiness: H6.
Deschampsia cespitosa 'Goldtau' AGM	Airy, silvery-green plumes	A dense, tussock-forming, evergreen grass with linear, mid-green leaves. Airy, arching panicles of silvery-green coloured flowers, which age to golden yellow, are produced on stems from early to late summer. Ideally plant in sun or partial shade, in well-drained, neutral to acid soil. Mature height and spread: 75cm x 75cm. Hardiness: H6.
Dianthus 'Devon Dove' PBR	Not currently in production	A tufted perennial with narrow, grey-green leaves. Fragrant, double, creamy white flowers are produced on short stems in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 45cm x 45cm. Hardiness: H6.
Dianthus 'Devon Wizard'		
Dianthus 'Dora'		A tufted perennial with narrow, grey-green leaves. Single, pink flowers with a dark pink eye are produced on short stems in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 20cm x 20cm. Hardiness: H6.
Dianthus 'Doris'		An evergreen perennial with lance-shaped, grey-green leaves. A 'modern pink' type dianthus which has scented, double, pale pink flowers with darker pink centres produced in 2 or 3 flushes from early summer to autumn. Ideally plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 40cm x 40cm. Hardiness: H6.
Dianthus 'Fenbow Nutmeg Clove'		

Dianthus 'Haytor White' AGM		An evergreen perennial with lance-shaped, grey-green leaves. A 'modern pink' type dianthus which has scented, double white flowers produced in 2 or 3 flushes from early summer to autumn. Ideally plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 40cm x 40cm. Hardiness: H6.
Dianthus 'Little Jock'		A cushion-forming, evergreen perennial with narrow, grey-green foliage. Clove-scented, semi-double, pale pink flowers with a maroon eye are borne on short stems in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 12cm x 20cm. Hardiness: H6.
Dianthus 'Mrs Sinkins'	Very highly scented double white flowers. H35cm.	An evergreen perennial with lance-shaped, grey-green leaves. An 'old fashioned pink' type dianthus which has very highly scented, shaggy double white flowers in early summer. Ideally plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 30cm x 30cm. Hardiness: H6.
Dianthus carophyllus 'King of Blacks'		
Dianthus carthusianorum (German Pink)		A tufted perennial with thin green leaves. Clusters of single, magenta flowers are produced in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 40cm x 20cm. Hardiness: H7.
Dianthus carthusianorum 'Rupert's Pink'	Narrow green leaves. Clusters of single rose pink flowers. H 15-20cm	A compact, tufted perennial with thin green leaves. Clusters of single, rose pink flowers are produced in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 20cm x 20cm. Hardiness: H7.
Dianthus cruentus		A tufted perennial with narrow, blue-green leaves. Long thin stems bear clusters of red flowers in late spring and summer. Plant in full sun, in very well-drained soil. Good for chalky soils. Mature height and spread: 60cm x 20cm. Hardiness: H7.
Dianthus deltoides 'Leuchtfunk' ('Flashing Light')		A mat-forming perennial with narrow, dark green leaves. Numerous cerise red single flowers are produced in summer on stems. Plant in full sun, in well-drained soil. Good for chalky soils. Mature height and spread: 20cm x 30cm. Hardiness: H6.
Dianthus knappii	Narrow green leaves. Slender stems topped with pale yellow flowers. H 40cm	A tufted perennial with thin green leaves. Clusters of small, single, pale yellow flowers are produced on thin stems in summer. Plant in full sun, in well-drained soil. Good for chalky soils. Drought tolerant. Mature height and spread: 40cm x 20cm. Hardiness: H7.

Dianthus 'Laced Monarch'		
Dianthus 'Little Jock'		
Diascia 'Emma'		A loosely bushy semi-evergreen herbaceous perennial with dark green leaves. Deep pink flowers are produced on spikes for a long period throughout summer. Great for the front of a border or a pot. Plant in full sun, in any reasonable, well-drained soil. Approximate height and spread: 20-30cm x 50cm. Hardiness: H3, down to -5°C.
Diascia barberae 'Fisher's Flora'		A spreading, semi-evergreen perennial with dark heart-shaped, dark green leaves. Loose spikes of deep pink flowers are produced in from summer to autumn. Deadhead regularly to prolong flowering. Ideally plant in full sun, in moist, but well-drained soil. Mature height and spread: approx. 25cm x 50cm. Hardiness: H4.
Diascia personata 'Hopleys'		
Dicentra 'Luxuriant'		
Dicentra 'Aurora'		A spreading herbaceous perennial with fern-like blue-green leaves. Arching stems bear creamy white, heart-shaped flowers from spring to late summer. Ideally plant in partial shade, in moist, fertile, humus-rich soil. Good for alkaline soils. Mature height and spread: 45cm x 50cm. Hardiness: H5.
Dicentra formosa		
Dictamnus albus		

Dierama pendulum		
Dierama pulcherrimum		A cormous perennial with tufts of thin, grass-like, green-grey leaves. Dense, pendent spike of tubular, bell-shaped pink, flowers are produced in summer. Flowers may occasionally be white or purple-red. Plant in full sun, in humus-rich, well-drained soil. Mature height and spread: 1-1.5m x 60cm. Hardiness: H4.
Digitalis ferruginea AGM		A rosette-forming, robust herbaceous perennial with lance-shaped, glossy, dark green leaves. Tall, upright racemes of golden brown flowers with red-brown veins inside are produced in midsummer. Plant in any well-drained soil, although preferably humus rich soil, in partial shade. Mature height and spread 1.5m x 45cm. Hardiness: H6.
Digitalis grandiflora	Not currently in production	A clump-forming biennial or perennial Foxglove with finely toothed, hairless, mid-green leaves. Upright racemes of pale yellow flowers, with brown veining on the insides, are produced in early summer. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 1-2m x 60cm. Hardiness: H7.
Digitalis lanata (D. Cafe Creme)	Not currently in production	A clump-forming perennial with oblong-lance-shaped, mid green leaves, which are slightly toothed. Upright racemes of cream white and brown tubular flowers are produced from mid to late summer. Plant in any well-drained soil, although preferably humus rich soil, in partial shade. Mature height and spread 80cm x 30cm. Hardiness: H5.
Digitalis lutea (Straw Foxglove)	A perennial Foxglove. Slender spikes of pale yellow flowers. Toxic. H 60-90cm	A clump forming perennial with glossy, pointed, dark green leaves. Spikes of pale yellow flowers are produced in early and midsummer. Is a perennial Foxglove. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 60-90cm x 30cm. Hardiness: H6.
Digitalis parviflora		
Digitalis purpurea	Native Foxglove. Toxic	A rosette-forming, biennial or short lived herbaceous perennial with finely toothed, dark green leaves. Upright racemes of pink, purple or white flowers are produced in summer. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 1-2m x 45cm. Hardiness: H7.
Digitalis purpurea 'Pam's Choice' AGM	Spikes of white flowers with deep red/purple spotting. Toxic. H 1.2-1.5m	A rosette-forming biennial or short lived herbaceous perennial with finely toothed, dark green leaves. Upright racemes of white flowers with deep red throats are produced in summer. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 1.2-2.5m x 45cm. Hardiness: H7.

Digitalis purpurea 'Sutton's Apricot'		A rosette-forming, short lived herbaceous perennial with finely toothed, dark green leaves. Upright racemes of apricot-pink flowers are produced in summer. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 1m-1.5m x 45cm. Hardiness: H6.
Digitalis purpurea f. albiflora		A rosette-forming, short lived herbaceous perennial with finely toothed, dark green leaves. Upright racemes of white flowers are produced in summer. Plant in any soil, although preferably humus rich soil, in partial shade. Mature height and spread 1m x 45cm. Hardiness: H7.
Digitalis x mertonensis (Strawberry Foxglove)	Semi-evergreen, perennial. Spikes of pink flowers tinged copper. Toxic. H 70-80cm	A robust clump-forming perennial with glossy, dark green leaves which are slightly hairy on the undersides. Spikes of pinkish tubular flowers tinged with copper are produced in spring and early summer. More perennial than most Digitalis. Hybrid of D. purpurea and D. grandiflora. Plant in any well-drained soil, although preferably humus rich soil, in partial shade. Mature height and spread: to 90cm x 30cm. Hardiness: H5. TOXIC.
Disoropsis pernyi		
Disporum longistylum 'Night Heron'		A choice plant. A clump-forming, rhizomatous perennial with lance-shaped leaves which emerge deep bronze, turning green. Creamy white, pendent, tubular flowers are produced in late spring and early summer. Plant in partial shade, in cool, moist, humus-rich soil. Mature height and spread: 1.8m x 1m. Hardiness: H6.
Disporum longistylum 'Green Giant'	Not currently in production	
Disporum megalanthum	Not currently in production	
Disporum sessile 'Variegatum'		

Doellingeria umbellata (Aster umbellatus)		An herbaceous perennial with green leaves, which turn yellow in autumn. Upright stems bearing masses of white, aster-type flowers with yellow centres over a long period during late summer and autumn. Mildew resistant and a good cut flower. Plant in full sun or partial shade, in any reasonable soil. Mature height and spread: 1.5m x 80cm. Hardiness: H7.
Dryopteris affinis 'Cristata'		A virtually evergreen fern producing a shuttlecock of wide, lance-shaped dissected, arching fronds which are pale green as they unfurl in spring, maturing to dark green. Midribs are golden brown and scaly. Plant in partial shade, in moist, humus-rich soil. Mature height and spread: 90cm x 90cm. Hardiness: H5.
Dryopteris erythrosora (Japanese Shield Fern) AGM	Coppery new growth. H75cm	A semi-evergreen fern which slowly increases by creeping rhizomes. New triangular shaped fronds emerge in spring and are coppery-bronze when young, turning dark green as they age. Ideally plant in partial shade, in moist soil. Mature height and spread: 75cm x 40cm. Hardiness: H4.
Dryopteris filix-mas (Male Fern/Shield Fern) AGM		A robust deciduous fern forming a shuttlecock base. Mid-green, lance-shaped fronds are produced from the shuttlecock in spring. Ideally plant in partial shade, in moist soil, but it is tolerant of dry shade and will grow in full sun if kept moist. Mature height and spread: 1.2m x 1m. Hardiness: H7.
Dryopteris filix-mas 'Linearis Polydactyla'	Not currently in production	
Dryopteris wallichiana		
Echinacea 'Green Twister'		
Echinacea pallida	Narrow pale pink petals	- A clump-forming, upright herbaceous perennial with toothed, hairy, oval green leaves. Tall stems bear gracefully reflexed/drooping, narrow pale pink petals and a large central orange-brown cone in summer. - Ideally plant in full sun, in well drained, humus-rich soil, which is not too wet in winter.
Echinacea paradoxa		An upright herbaceous perennial with narrow, hairy, dark green leaves. Tall stems bear narrow, linear, golden-yellow drooping petals around a large central brown cone in summer and early autumn. Ideally plant in full sun, in well drained, humus-rich soil, which is not too wet in winter. Mature height and spread: 1m x 45cm. Hardiness: H5.

Echinacea purpurea	Purple/pink flowers. H1-1.2m	
Echinacea purpurea 'Baby Swan White'		An upright herbaceous perennial with toothed, hairy, oval dark green leaves. Stems bearing wide flowers of white petals with a large central orange-brown cone are produced from midsummer to early autumn. Plant in full sun, in well drained, humus-rich soil. Mature height and spread: 50cm x 45cm. Hardiness: H5.
Echinacea purpurea 'Magnus Superior'	Purple stems topped with deep pink flowers with a central cone. H 90cm	An upright herbaceous perennial with toothed, hairy, oval dark green leaves. Purple stems bearing wide flowers of dark carmine-red petals with a large central cone are produced from midsummer to early autumn. Plant in full sun, in well drained, humus-rich soil. Mature height and spread: 90cm x 45cm. Hardiness: H5.
Echinacea purpurea 'Magnus'		An upright herbaceous perennial with toothed, hairy, oval dark green leaves. Stem bearing wide flowers of deep purple petals with a large central cone are produced from midsummer to early autumn. Plant in full sun, in well drained, humus-rich soil. Mature height and spread: 90cm x 45cm. Hardiness: H5.
Echinacea purpurea 'Rubinstern'		An upright herbaceous perennial with toothed, hairy, oval dark green leaves. Stems bearing wide flowers of red-pink petals with a large central cone are produced from midsummer to early autumn. Plant in full sun, in well drained, humus-rich soil. Mature height and spread: 90cm x 45cm. Hardiness: H5.
Echinacea purpurea 'White Swan'	Large white daisies. H65cm.	An upright herbaceous perennial with toothed, hairy, oval dark green leaves. Stems bearing wide flowers of white petals with a large central orange-brown cone are produced from midsummer to early autumn. Plant in full sun, in well drained, humus-rich soil. Mature height and spread: 60cm x 45cm. Hardiness: H5.
Echinacea purpurea 'Mellow Yellows'		A clump-forming, upright herbaceous perennial with toothed, hairy green leaves. From midsummer to autumn tall stems bear daisy-like flowers in shades from cream to dark yellow, each with a large central brown cone. Plant in full sun, in well drained, humus-rich soil, which is not too wet in winter. Mature height and spread: 75-80cm x 45cm. Hardiness: H5.
Echinacea simulata (Glade Coneflower)		A clump-forming, upright herbaceous perennial with toothed, hairy, linear green leaves. Tall stems bear graceful flowers with narrow, reflexed pale pink petals and a large central brown cone in summer. Similar to E. pallida, but this species has yellow pollen grains. Ideally plant in full sun, in well drained, humus-rich soil, which is not too wet in winter. Mature height and spread: 80cm x 45cm. Hardiness: H4.
Echinops ritro 'Veitch's Blue'	JOP	

Echinops bannaticus 'Taplow Blue'	JOP	
Echinops ritro		A compact, clump-forming perennial with spiny, dark green leaves which have white-downy undersides. Spikes bearing spherical flower heads of metallic-blue flower which age to a brighter blue. Seedheads are great for winter structure and wreath making! Ideally plant in full sun or partial shade, in any poor, well-drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H7.
Echinops ritro 'Veitch's Blue'	Blue spherical flowers. H 90cm.	
Echinops sphaerocephalus 'Arctic Glow'	Grey green spiny leaves. Reddish stems topped with spheres of white flowers. H 1m	A vigorous, clump-forming herbaceous perennial with oblong, spiny grey-green leaves. Spherical, white flower heads are produced on red-brown stems in mid-late summer. Plant in full sun or partial shade, in any poor, well-drained soil. Mature height and spread: 1m x 90cm. Hardiness: H7.
Epimedium 'Pink Elf'	Evergreen. Pale pink flowers, reddish centre. H 30cm	
Epimedium 'Pretty in Pink'	Evergreen. Pink flowers. H 45cm	
Epimedium 'Spine Tinger'		
Epimedium 'Akebono'	JOP	

Epimedium pinnatum subsp. colchicum	JOP	
Epimedium x perralchicum 'Frohnleiten'		
Epimedium x rubrum AGM		A slowly spreading herbaceous perennial with toothed heart-shaped, red-tinted young leaves, which turn green, then red again in autumn. Crimson flowers with pale-yellow spurs are produced in spring. Ideally plant in in any reasonable, well-drained soil, with shelter from cold, drying winds. Will tolerate sun when established. Mature height and spread: 30cm x 30cm. Hardiness: H7.
Epimedium x rubrum 'Galadriel'		
Epimedium x warleyense 'Ellen Willmott'		
Epimedium x youngianum 'Niveum'		A clump-forming herbaceous perennial with wavy margined, narrowly heart-shaped leaves which are bronze when young, turning mid-green with age. Pure white flowers, sometimes with spurs, are produced in spring. Ideally plant in partial shade, in fertile, moist, but well-drained soil, with shelter from cold, drying winds. Mature height and spread: 25cm x 30cm. Hardiness: H5.
Eranthis hyemalis AGM (Winter Aconite)		A clump-forming tuberous perennial with bright green dissected leaves. Bright yellow cup-shaped flowers are produced in late winter and early spring. Will form large colonies. Ideally plant in full sun or dappled shade, in fertile, humus rich soil that does not dry out in summer. Mature height and spread: 5-8cm x 5cm. Hardiness: H6.
Erigeron 'Quakeress'		

Erigeron 'Wayne Roderick'		
Erigeron annuus (Tall Fleabane)	Tall, white daisies. H 1.2m	An upright, short-lived herbaceous perennial with mid-green leaves and tall stems bearing a profusion of white daisy-like flowers with yellow centres from early summer until autumn. Will self-seed freely and is good for pollinators. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 1.2m x 50cm. Hardiness: H5.
Erigeron 'Dignity'		A clump-forming herbaceous perennial with lance-shaped to spoon-shaped dark green leaves. Stems bearing violet-mauve daisy-like flowers with yellow centres are produced in early and midsummer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 50cm x 45cm. Hardiness: H6.
Erigeron karvinskianus		A carpeting perennial with lax stems bearing small, elliptic-lance-shaped, grey-green leaves. In summer, a profusion of white-pink daisy-like flower heads with yellow centres are produced. Will grow in cracks and crevices. Plant in full sun, in fertile, well-drained soil. Mature height and spread: 30cm x 1m. Hardiness: H5.
Erigeron karvinskianus 'Lavender Lady'		
Erigeron 'White Quakeress'		A clump-forming herbaceous perennial with narrow, dark green leaves. Stems bearing pure white, narrow petalled daisy-like flowers with yellow centres are produced from early to late summer. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 40-50cm x 45cm. Hardiness: H6.
Erigeron. Pink Form		A carpeting perennial with lax stems bearing small, elliptic-lance-shaped, grey-green leaves. In summer, a profusion of pink daisy-like flower heads with yellow centres are produced. Will grow in cracks and crevices. Plant in full sun, in fertile, well-drained soil. Mature height and spread: 40cm x 1m. Hardiness: H5.
Erinus alpinus		
Eryngium agavifolium		

Eryngium bourgatii	Not currently in production	
Eryngium bourgatii 'Picos Amethyst'	Not currently in production	
Eryngium giganteum 'Miss Willmott's Ghost'	JOP	
Eryngium planum	JOP	
Eryngium planum 'Blue Cap' (Blaukappe)		A clump-forming perennial with toothed, dark green leaves. Steel-blue flowers, surrounded by blue-green bracts are formed on branching stems from midsummer to early autumn. Plant in full sun, in any well-drained, poor-moderately fertile soil that is not waterlogged. Mature height and spread: 90cm x 45cm. Hardiness: H5.
Eryngium x oliverianum BIG BLUE ('Myersblue') PBR	Electric blue flowers. H75cm	
Eryngium x zabelii 'Jos Elking'		
Erysimum 'Bowe's Mauve' (Perennial Wallflower)	Mauve/purple flowers. H 75cm	A vigorous, subshrubby perennial with narrow, lance-shaped, grey-green leaves. Mauves flowers are borne in long spikes from late winter to summer. Plant in in full sun, in poor or moderate, well-drained soil. Good for chalk. Mature height and spread: up to 75cm x 60cm. Hardiness: H4.
Erysimum cheiri 'Harpur Crewe'	Sub shrubby perennial wallflower. Spikes of double bright yellow flowers. H 40-50cm	

Erysimum 'Red Jep'		
Erysimum 'Jacob's Jacket'	Not currently in production	
Erythronium 'Pagoda' AGM		A vigorous bulbous perennial with elliptic, dark green leaves which are mottled with bronze. Sulphur yellow flowers, with a brown ring at the base of each, are produced in spring. Plant in partial or dappled shade, in fertile, humus-rich, well-drained soil. Mature height and spread: 15-35cm x 10cm. Hardiness: H5.
Erythronium 'White Beauty'		
Erythronium californicum 'White Beauty' AGM (Dog's-tooth Violet)		A bulbous perennial with elliptic, dark green leaves which are slightly mottled. Creamy white flowers, with a red ring at the base of each, are produced in spring. Plant in partial or dappled shade, in fertile, humus-rich, well-drained soil. Mature height and spread: 30cm x 10cm. Hardiness: H5.
Euphorbia amygdaloides 'Purpurea'	Not currently in production	A bushy, softly hairy, evergreen perennial with reddish stems bearing spoon-shaped to obovate, dark reddish purple, leathery leaves. Acid yellow 'flowers' are produced in mid-spring to early summer. Sap is a skin irritant. Plant in light or dappled shade, in moist, humus-rich soil. Mature height and spread: 75cm x 30cm or more. Hardiness: H6.
Euphorbia amygdaloides var. robbiae	Lime green flowers. Skin irritant. H60cm	A bushy, softly hairy, evergreen perennial with reddish stems bearing spoon-shaped to obovate, dark green, leathery leaves, which can be red on the undersides in winter. Greenish yellow 'flowers' are produced in mid-spring to early summer. Sap is a skin irritant. Plant in light or dappled shade, in moist, humus-rich soil. Mature height and spread: 60cm x 30cm or more. Hardiness: H6.
Euphorbia characias 'Black Pearl'		

Euphorbia characias subsp. Wulfenii (Mediterranean Spurge)	Shrubby. Lime green flowers. Skin irritant. H120cm	An upright, evergreen shrubby perennial with purple-tinged stems bearing linear, grey-green leaves. Yellow-green bracts are produced in dense cylindrical cymes from early spring to early summer. Sap is a skin irritant. Plant in full sun, in light, well-drained soil. Drought tolerant. Mature height and spread: 1.2m x 1.2m. Hardiness: H4.
Euphorbia cyparissas 'Fens Ruby'		A spreading herbaceous perennial with slender stems bearing feathery, green-purple leaves and clusters of greenish-yellow flowers from late spring. Sap is a skin irritant. Plant in full sun, in light, well-drained soil. Mature height and spread: 40cm x 1.5m. Hardiness: H7.
Euphorbia dulcis 'Chamaeleon'- Sweet Spurge		
Euphorbia epithymoides 'Senior'		
Euphorbia epithymoides 'Senior'		
Euphorbia griffithii	JOP	
Euphorbia myrsinites		
Euphorbia palustris (Marsh Spurge) AGM		A clump-forming herbaceous perennial with upright pale green stems and bright green lance-shaped leaves, which turn yellow and orange in autumn. Flat heads of yellow flowers are produced in late spring on top of stems. Sap is a skin irritant. Ideally plant in full sun, in permanently moist soil. Mature height and spread: 90cm x 90cm. Hardiness: H7.

Euphorbia schillingii (Schilling Spurge) AGM	Narrow leaves with a white midrib. Greenish yellow flowers and bracts atop stems. H90cm.	An upright herbaceous perennial with narrow dark green leaves with a white midrib along the stems. Clusters of yellow flowers surrounded by greenish yellow bracts are produced at the tops of stems from midsummer to autumn. Plant in dappled shade, in humus-rich soil with some moisture. Approximate height and spread: 80-100cm x 35cm. Hardiness: H5.
Euphorbia seguieriana		
Euphorbia x martini		
Euphorbia x pseudovirgata		
Eurybia divaricata (Aster divaricatus) (White Wood Aster)		A clump-forming herbaceous perennial with arching, wiry black-purple stems with green leaves which are heart-shaped lower down the stem and more lance-shaped further up. Clusters of starry, white flowers with yellow centres are produced on the tops of stems from midsummer to mid-autumn. Ideally plant in full sun or partial shade in fertile, moist, humus-rich soil. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Eurybia macrophylla		
Eutrochium fistulosum 'Bartered Bride' (Formerley Eupatorium)		Plant in full sun or partial shade, in any average to moist soil.
Eutrochium fortunei 'Pink Elegance' (Formerley Eupatorium)	Not currently in production	An herbaceous perennial with upright stems of mid-green leaves with cream variegation on the edges. Heads of purple-pink flowers are produced on tall stems in late summer. Plant in full sun or partial shade, in any average to moist soil. Mature height and spread: 1.5m x 90cm. Hardiness: H7.

Eutrochium maculatum 'Purple Bush' AGM (Formerley Eupatorium)		A clump-forming herbaceous perennial with lance-shaped/oval leaves which are dark green flushed with purple. Domed flower heads with dusky pink flowers are produced over a long period from summer to autumn. Good for pollinators. A relatively compact Eupatorium. Plant in full sun or partial shade, in any average to moist soil. Mature height and spread: 1.5m x 1.1m. Hardiness: H7.
Eutrochium maculatum Atropurpureum Group (Formerley Eupatorium)		Plant in full sun or partial shade, in any average to moist soil.
Eutrochium maculatum 'Riesenschirm' (Formerley Eupatorium)		Plant in full sun or partial shade, in any average to moist soil.
Festuca glauca 'Elijah Blue'	Fine blue leaves. H30cm	A densely tufted evergreen grass with ice-blue leaves. Spikes of violet-flushed, blue-green flowers are produced in early and midsummer. Plant in full sun, in poor to moderately fertile, dry soil. Mature height and spread: 30cm x 25cm. Hardiness: H5.
Filipendula rubra 'Venusta' (Meadowsweet) AGM		A spreading herbaceous perennial which forms large clumps in moist soil. Leaves are green, deeply cut and toothed. Reddish stems bear flattened heads of tiny rose-pink flowers, which become paler with age. Ideally plant in full sun or partial shade, in moderately fertile, moist soil. Mature height and spread: 1.5-2m x 1m. Hardiness: H5.
Filipendula vulgaris 'Multiplex'		
Foeniculum vulgare 'Purpureum' (Bronze Fennel)		An upright perennial with fine, airy, bronze-purple young foliage, ageing to green. Umbels of yellow flowers are produced atop stems in mid and late summer, followed by seeds. Often used as a culinary herb. Plant in full sun, in fertile, well-drained soil. Mature height and spread: to 1.8m x 45cm. Hardiness: H5.
Foeniculum vulgare 'Smoky'		
Fragaria vesca (Alpine/Wild Strawberry)		An herbaceous perennial which spreads via stolons, with rosettes of bright green, 3-palmate leaves with toothed edges. Cymes of white, 5 petalled flowers with yellow centres are produced, followed by small strawberries. Ideally plant in full sun or dappled shade, in fertile, moist, but well-drained neutral or alkaline soil. Mature height and spread: 30cm x 30cm. Hardiness: H6.

Fritillaria meleagris (Snake's Head Fritillary)		Nodding, bell-shaped purple, pink or white, slightly spotted flowers are produced in spring. Plant in light shade, in moist, but not waterlogged soil. Naturalises well. Height: 30cm.
Fritillaria persica	JOP	
Galanthus 'Curly'		
Galanthus ikariae		
Galatella sedifolius subsp. acris		
Galium odoratum (Sweet Woodruff)	Clusters of small white flowers in late spring. Leaves arranged around stem. Shade. H30cm	A vigorous, spreading herbaceous perennial with square stems bearing whorls of dark green leaves arranged around the stem like a 'ruff'. Rounded clusters of tiny white, scented flowers are produced from late spring to midsummer. Smells like hay when dried. Ideally plant in partial or full shade, in any soil. Mature height and spread: 30cm x indefinite. Hardiness: H7.
Geranium 'Ann Folkard'		A spreading herbaceous perennial with scrambling stems of 5 lobed, toothed, yellow-green leaves, which age to green. A profusion of saucer shaped, magenta flowers with black veins are produced from midsummer to mid-autumn. Good for ground cover. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Geranium 'Brookside' AGM		A spreading herbaceous perennial with 7 lobed, divided, yellow-green leaves. Violet-blue flowers with white centres are produced in spring. Slightly paler blue and smaller flowers than G.'Orion'. Good for ground cover. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 60cm x 60cm. Hardiness: H7.

Geranium 'Dusky Crûg'		A clump-forming, spreading herbaceous perennial with 5-7 lobed purplish green leaves. Pale pink flowers with purple veins are produced from in summer and autumn. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 30cm x 1m. Hardiness: H7.
Geranium 'Orion'		A mound-forming herbaceous perennial with deeply cut, mid-green leaves. Masses of large, violet-blue flowers with dark veins are produced in spring and summer. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 1m x 2m. Hardiness: H7.
Geranium 'Philippe Vapelle'	JOP	
Geranium 'Red Admiral' (Cranesbill)		A compact herbaceous perennial with deeply divided, mid-green leaves which turn red in autumn. Bright magenta flowers with black veins and a black centre are produced throughout summer. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 60cm x 50cm. Hardiness: H7.
Geranium 'Blue Cloud'	JOP	
Geranium DREAMLAND 'Bremdream' PBR		
Geranium 'Dusky Crug'		
Geranium incanum	Not currently in production	
Geranium macrorrhizum	JOP	Good for dry shade.

Geranium macrorrhizum 'Bevan's Variety'		Good for dry shade.
Geranium macrorrhizum 'White Ness'	JOP	Good for dry shade.
Geranium nodosum		A clump-forming herbaceous perennial with 3 or 5 lobed, shallow-toothed, glossy green leaves. Purple-pink flowers with pale centres are produced from spring, through to autumn. Good for ground cover. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Good for dry shade. Mature height and spread: 40cm x 50cm. Hardiness: H5.
Geranium nodosum 'Fielding's Folly'		
Geranium nodosum 'Silverwood'		A clump-forming herbaceous perennial with 3 or 5 lobed, shallow-toothed, glossy green leaves. Pure white flowers with pale centres are produced from spring through to autumn. GComes into leaf early in spring, good for ground cover. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Good for dry shade. Mature height and spread: 45cm x 50cm. Hardiness: H5.
Geranium nodosum Bright Purple- same as 'Fielding's Folly'sum 'Fieldielding'sdn Folyly"		
Geranium phaeum		A clump-forming herbaceous perennial with 7-9 lobed, soft green basal leaves, with purple-brown marks. Branched groups of pendent flowers with a white centre and reflexed petals in shades of purple-black, deep maroon, mauve or sometimes white are produced in late spring and early summer. Good in damp shade. Ideally plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 80cm x 45cm. Hardiness: H7.
Geranium phaeum 'Album'		A clump-forming herbaceous perennial with 7-9 lobed, soft green basal leaves. Branched groups of pendent, white flowers with reflexed petals are produced in late spring and early summer. Lights up a shady spot beautifully. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Good in damp shade. Mature height and spread: 80cm x 45cm. Hardiness: H7.

Geranium phaeum 'Joseph Green'		
Geranium phaeum 'Lily Lovell'		
Geranium phaeum 'Raven'		
Geranium phaeum 'Samobor'		
Geranium pratense 'Marshmallow'		
Geranium pratense 'Mrs Kendall Clark' AGM		A clump-forming herbaceous perennial with 7-9 lobed, deeply divided and toothed green leaves on hairy stems. Upright, pearl-grey flowers flushed with pale rose-pink are produced in groups on stems in early and midsummer. Seeds freely. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Full shade is tolerated. Mature height and spread 60cm x 60cm. Hardiness H7.
Geranium pratense 'Plenum Album'		
Geranium pratense 'Silver Queen'		
Geranium pratense var. Pratense f. albiflorum	JOP	

Geranium psilostemon		
Geranium pyrenaicum 'Bill Wallis'		A clump forming, evergreen perennial with scalloped, 7-9 lobed, mid-green leaves. Star shaped, rich purple flowers are produced from spring, through to autumn. Self seeds freely and comes true from seed. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 50cm x 30cm. Hardiness: H6.
Geranium renardii	JOP	
Geranium 'Rozanne'	JOP. Blue flowers, white centres. H60cm	
Geranium sanguineum 'Album'	White flowers, spreading. H 30cm	A dense, clump-forming herbaceous perennial. Dark green, deeply cut leaves emerge in spring. White, cup-shaped flowers are borne profusely over many weeks during summer. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 30cm x 40cm. Hardiness: H7.
Geranium sanguineum 'Glenluce'		A dense, clump-forming herbaceous perennial. Dark green, deeply cut leaves emerge in spring. Rose-pink, cup-shaped flowers with dark veins are borne profusely over many weeks during summer. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 20cm x 30cm. Hardiness: H7.
Geranium sanguineum 'Elke'	JOP	
Geranium sanguineum var. striatum		A dense, clump-forming herbaceous perennial. Dark green, deeply cut leaves emerge in spring. Pale pink, cup-shaped flowers with dark veins are borne profusely over many weeks during summer. Plant in any moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread: 10cm x 30cm. Hardiness: H5.
Geranium sylvaticum 'Album' AGM		A clump-forming herbaceous perennial with 7-lobed, deeply cut, mid-green leaves. Stems bear dense cymes of white saucer-shaped flowers in late spring. Plant in any moderately fertile, moist soil in full sun or partial shade. Good for light shade. Mature height and spread: 70cm x 60cm. Hardiness: H7.

Geranium sylvaticum 'Ice Blue'	Not currently in production	
Geranium wlassovianum		A clump-forming herbaceous perennial with softly hairy, 7 lobed, dark green leaves, which are tinged with brown and turn red in autumn. Long-lasting purple-pink flowers with dark veins are produced in loose clusters from midsummer to early autumn. Plant in any moderately fertile soil in full sun or partial shade. Prefers moist soil. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Geranium x cantabrigiense 'Intense'		
Geranium x magnificum		
Geranium x magnificum 'Rosemoor'		A vigorous, clump-forming herbaceous perennial with lobed, divided, mid-green leaves. Blueish mauve flowers with dark veins and pink stamens are produced in dense clusters in one burst in midsummer. Plant in any moderately fertile, well-drained soil in full sun. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Geranium x oxonianum f. thurstonianum	JOP	
Geum 'Alabama Slammer'		An upright herbaceous perennial with a mat of mid green leaves. Slender stems bear semi-double flowers which are golden yellow with orange at the edges and backs of the petals, produced late spring to late summer. Plant in fertile, well drained soil, with some moisture, in full sun or partial shade. Mature height and spread: 30-40cm x 30cm. Hardiness: H5.
Geum 'Banana Daiquiri'		An upright herbaceous perennial with a mat of mid green, toothed leaves. Slender stems bear lemon-yellow, double flowers, in late spring to late summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 50cm x 50cm. Hardiness: H5.
Geum 'Hannay's'		

Geum 'Lady Stratheden'		An upright herbaceous perennial with hairy leaves. Stems bearing, semi-double, rich yellow flowers are produced throughout summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 40-60cm x 60cm. Hardiness: H7.
Geum 'Lisanne' (Avens)		An upright, semi-evergreen herbaceous perennial with a mat of mid green. Slender, branched stems bear nodding, open, lemon yellow flowers in late spring to midsummer. Plant in fertile, well drained soil, with some moisture, in full sun or partial shade. in full sun. Mature height and spread: 30cm x 35cm. Hardiness: H7.
Geum 'Moonlight Serenade'	Not currently in production	An upright herbaceous perennial with hairy leaves. Stems bearing open, creamy yellow flowers are produced from late spring to summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 30cm x 40cm. Hardiness: H6.
Geum 'Mrs J. Bradshaw'	Semi-double red flowers. H50cm	An upright herbaceous perennial with hairy leaves. Stems bearing large, semi-double, red flowers are produced from early to late summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 40-60cm x 60cm. Hardiness: H7.
Geum 'Prinses Juliana'		An upright herbaceous perennial with mid green, hairy leaves. Slender stems bear semi-double orange-red flowers in late spring to midsummer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 50cm x 50cm. Hardiness: H7.
Geum 'Savanna Sunset'		An upright herbaceous perennial with mid green, hairy leaves. Slender red stems bear semi-double, apricot flowers in late spring to midsummer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 30cm x 40cm. Hardiness: H7.
Geum 'Sunrise'		An upright herbaceous perennial with mid green, toothed leaves. Slender green stems bear bright orange flowers with prominent yellow stamens in late spring to late summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 40cm x 30cm. Hardiness: H7.
Geum 'Tequila Sunrise'		An upright herbaceous perennial with a mat of mid green leaves. Slender stems bear apricot-yellow flowers, tinged with red, in late spring to late summer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 35cm x 30cm. Hardiness: H5.
Geum 'Blazing Sunset'	Not currently in production	

Geum 'Can-can'		
Geum coccineum 'Koi'	Not currently in production	An upright herbaceous perennial with mid green, hairy, toothed leaves. Slender green stems bear golden yellow flowers in late spring to midsummer. Plant in fertile, well drained soil, in full sun. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Geum 'Emory Quinn'		
Geum 'Mai Tai'		
Geum rivale 'Bell Bank'		A clump-forming herbaceous perennial with mid green, toothed leaves. Slender brown stems bear pink, frilly double flowers, nodding at first, then becoming horizontal, in late spring to midsummer. Ideally plant in partial shade, in fertile, reasonably moist soil. Mature height and spread: 45cm x 40cm. Hardiness: H7.
Geum rivale 'Lemon Drops'		- A clump-forming herbaceous perennial with mid green, scalloped leaves. Slender brown stems bear slightly nodding, single lemon-yellow flowers in late spring to midsummer. - Ideally plant in partial shade, in fertile, reasonably moist soil. - Mature height and spread: 25cm x 25cm. Hardiness: H7.
Geum 'Totally Tangerine' PBR	Soft orange flowers on thin stems. Sterile, long flowering. H90cm	
Gillenia trifoliata (Bowman's Root)	JOP. Sprays of white starry flowers. Red/black stems. Orange autumn leaf colour. H100cm	

Hakonechloa macra	JOP	
Hakonechloa macra 'All Gold'		
Hakonechloa macra 'Aureola' AGM		A spreading, mound-forming perennial with arching, linear, bright yellow leaves with green stripes, which is flushed red in autumn. Plant in partial shade for best colour, in fertile, humus-rich, moist but well-drained soil. Will grow in dry shade too. Mature height and spread: 35cm x 40cm. Hardiness: H7.
Helenium 'Amber'		
Helenium 'Kupferzwerg'		An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Brownish red flowers with brown central cones are produced in top of stems from mid to late summer. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 70cm x 60cm. Hardiness: H7.
Helenium 'Loysder Weick'		
Helenium 'Loysder Wieck'	Not currently in production	
Helenium 'Moerheim Beauty'		An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Dark copper-red flowers with a dark brown central disc are produced on top of stems from early to later summer. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 90cm x 60cm. Hardiness: H7.
Helenium 'Riverton Beauty'		An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Golden yellow flowers with brown flecks and brown central disc are produced on top of stems from midsummer to early autumn. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 90-120cm x 60cm. Hardiness: H7.

Helenium 'Rubinzweg' AGM	Not currently in production	An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. 5cm wide, dark red flowers with a maroon central disc, are produced on top of stems in midsummer. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 75cm x 60cm. Hardiness: H7.
Helenium 'Ruby Tuesday'		An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Deep ruby red flowers with a red and saffron central disc and fluted petals are produced on top of stems in midsummer. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 60cm x 50cm. Hardiness: H7.
Helenium 'Sahin's Early Flowerer'	Orange-red flowers changing to orange-yellow, early summer onwards. H90cm	An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Flowers are produced on top of stems from early summer to autumn, starting orange-red and maturing to orange-yellow. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 90cm x 60cm. Hardiness: H7.
Helenium 'Short and Sassy' PBR	JOP	
Helenium 'The Bishop'		
Helenium 'Wesergold'		
Helenium 'Wyndley'	Not currently in production	
Helenium autumnale 'Helena Gold'		An upright herbaceous perennial with sturdy stems of mid-green, lance-shaped leaves. Golden yellow flowers are produced in top of stems from early to later summer. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 1.2m x 60cm. Hardiness: H7.

Helenium autumnale 'Dunkel Pracht'	JOP	
Helenium 'Betty'		
Helenium 'Chelsey'		
Helenium 'Marion Nickig'	Not currently in production	
Helenium 'Rouge Fonce'	Not currently in production	
Helenium 'Waltraut'	Not currently in production	
Helianthemum 'Ben More'	JOP. Compact, evergreen sub-shrub. Orange flowers. H 25-30cm	Orange flowers
Helianthemum 'Bunbury'	Compact, evergreen sub-shrub. Single deep pink flowers. H 20-25cm	
Helianthemum 'Wisley Pink' ('Rodanthe Carneum') AGM		A spreading, alpine sub-shrub with small, silver-grey leaves. Pale pink, saucer-shaped flowers with yellow centres are produced over a long period from late spring to midsummer. Plant in full sun, in any moderately fertile, well-drained soil. Good for chalk. Mature height and spread: 30cm x 45cm. Hardiness: H4.

Helianthemum 'Ben Fhada'	JOP. Compact, evergreen sub-shrub. Golden yellow flowers. H 20cm	Golden Yellow
Helianthemum 'Ben Ledi'	JOP	Red
Helianthemum 'Cerise Queen'	Compact, evergreen sub-shrub. Double deep cerise pink flowers. H 25-30cm	
Helianthemum 'Henfield Brilliant'	Deep orange flowers. H30cm	
Helianthemum 'Rose of Leeswood'	Compact, evergreen sub-shrub. Double pink flowers. H 20cm	Double pink
Helianthemum 'The Bride'	Compact, evergreen sub-shrub. White flowers. H 20-25cm	Cream/white
Helianthemum 'Wisley Primrose'	Compact, evergreen sub-shrub. Pale primrose yellow flowers. H 25-30cm	Primrose yellow
Helianthus 'Gullick's Variety' AGM		A vigorous, spreading perennial with hairy stems and narrow mid-green leaves which are slightly toothed. Yellow flowers with brownish purple centres are produced from late summer to mid-autumn. Plant in full sun, in moist, well-drained soil. Good for chalk. Mature height and spread: 1.7m x 1.2m. Hardiness: H5.
Helianthus 'Lemon Queen' AGM	Soft yellow perennial sunflower. H1.7m	A rhizomatous perennial with ovate, dark green leaves which are slightly toothed. Pale yellow flowers with darker centres are produced from late summer to mid-autumn. Ideally plant in full sun, in moist, well-drained soil. Good for chalk. Mature height and spread: 1.7m x 1.2m. Hardiness: H4.

Helianthus giganteus 'Sheila's Sunshine'	Not currently in production	
Helianthus salicifolius (Willow Leaved Sunflower)		A vigorous herbaceous perennial with tall stems tinged blue at the tip with narrow, willow-like leaves. Clusters of yellow daisy flowers are produced on top of stems. Cut back in late spring to encourage compact growth. Plant in full sun, in fertile, well-drained soil. Mature height and spread: up to 2.5m x 1m. Hardiness: H5.
Helictotrichon sempervirens		
Helleborus argutifolius		
Helleborus niger (Christmas Rose)		A clump-forming perennial with leathery, dark green leaves that over-winter. Purple marked stems bear saucer-shaped, white flowers in groups of 2 or 3 from early winter to late spring. Flowers age to pinkish white. Plant in dappled shade, in heavy, neutral to alkaline soil. Mature height and spread: 30cm x 45cm. Hardiness: H7.
Helleborus x hybridus		
Helleborus x hybridus 'Double White Spotted'	Double white flowers with maroon spots. H35cm	
Helleborus x sternii		A clump-forming perennial with stems bearing spiny green leaves, but sometimes non-spiny, made up of 3 leaflets, with creamy veins. Creamy green flowers, flushed with pink-purple, are produced from late winter to mid spring. Plant in full sun or dappled shade, in heavy, neutral to alkaline soil. Mature height and spread: 30cm x 30cm. Hardiness: H4.
Hepatica nobilis	Not currently in production	

Hepatica nobilis		
Hesperantha coccinea 'Wilfred H. Bryant' (Synonym: 'Pink Princess')		
Hesperantha coccinea 'Major'		
Hesperantha pale pink		
Heuchera 'Blackberry Jam' AGM		
Heuchera 'Fire Chief' PBR		A clump-forming, evergreen perennial with rounded, slightly lobed, bright red leaves. In early summer, spikes of small, pink and white flowers are produced on red stems. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 45cm x 40cm. H6.
Heuchera 'Green Spice'	Evergreen, red veined. H70cm	A clump-forming, evergreen perennial with rounded, slightly lobed, green leaves that are darker at the edges and veined beetroot-red. In early summer, spikes of small, cream flowers are produced. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 70cm x 40cm. H6.
Heuchera 'Lime Marmalade'	Lime green-yellow leaves, spikes of small white flowers in spring. H40cm	A vigorous, clump-forming perennial with rounded, slightly lobed lime-green leaves. Spikes of small white flowers are produced from late spring to early summer. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 40cm x 60cm. H6.
Heuchera 'Marmalade'		A vigorous, clump-forming perennial with rounded, slightly lobed yellowish-bronze leaves with purple undersides. Spikes of reddish brown flowers are produced in summer. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 40cm x 45cm. H6.

Heuchera 'Obsidian'		
Heuchera 'Plum Pudding' PBR		A compact, clump-forming semi-evergreen perennial with heart-shaped, lobed, plum-purple leaves flushed with silver, with dark purple veins. Panicles of small white flowers are produced in late spring and early summer. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 65cm x 40cm. H6.
Heuchera americana 'Dale's Strain'	JOP	
Heuchera cylindrica 'Greenfinch'	JOP	
Heuchera sanguinea 'White Cloud'		A mat or clump-forming, evergreen perennial with rounded, slightly lobed dark green leaves with white marbling. Panicles of small white flowers are produced in summer. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 30cm x 30cm. H6.
Heuchera 'Silver Gum Drop'		
Heuchera villosa 'Autumn Bride'		A clump forming, semi-evergreen perennial with large rounded to kidney-shaped, lobed leaves which are mid-green and downy. Panicles of ivory white flowers are produced in late summer! Larger leaved than many Heuchera. Plant in sun or partial shade, in any reasonably fertile, well-drained soil. Chalky soils are tolerated. Hot sun can scorch leaves. Mature height and spread: 45-60cm x 45-60cm. Hardiness: H6.
Heuchera villosa 'Palace Purple'	Semi-evergreen. Greeny-cream flowers. Sun/part shade. H. 60cm	A clump forming, semi-evergreen perennial with rounded to kidney-shaped, lobed leaves which are bronze-red, almost metallic. Panicles of greenish cream flowers with red anthers are produced in late summer, followed by rose pink seed heads. Plant in sun or partial shade, in moist, fertile soil. Chalky soils are tolerated. Mature height and spread: 45-60cm x 45-60cm. Hardiness: H6.

Heucherella 'Kimono' PBR		A vigorous, compact, evergreen, clump-forming perennial with deeply lobed, silver-green leaves with dark purple veins. Stems with clusters of tiny pale pink flowers are produced from late spring to early summer. Plant in sun or partial shade, in light, moist but well-drained, fertile soil. Tolerates full shade. Mature height and spread: 40cm x 30cm. Hardiness: H7.
Hosta 'August Moon'		A vigorous, clump forming herbaceous perennial with rounded- heart-shaped, cupped, pale green leaves, which turn golden yellow. Greyish white flowers are produced in midsummer. Plant in partial, with some sun to make the golden colour come out, in moist, but well-drained soil. Mature height and spread: 50cm x 75cm. Hardiness: H7.
Hosta 'Blue Cadet'		A vigorous, clump forming herbaceous perennial with heart-shaped, wavy, blue-green leaves. Lavender-blue flowers are produced in midsummer. Plant in partial of full shade, in moist, but well-drained soil. Mature height and spread: 25cm x 30cm. Hardiness: H7.
Hosta 'Devon Green'		
Hosta 'El Nino' PBR	Not currently in production	
Hosta 'Gold Standard'		A clump forming herbaceous perennial with heart-shaped leaves that start green-yellow, fading to cream, with dark green edges. Lavender-blue flowers are produced in midsummer. Plant in partial, with some sun to make the golden colour come out, in moist, but well-drained soil. Mature height and spread: 65cm x 1m. Hardiness: H7.
Hosta 'Golden Tiara'	JOP	
Hosta 'Patriot' AGM		A vigorous, clump forming herbaceous perennial with heart-shaped to ovate, olive green leaves with irregular white margins. Lavender-blue flowers are produced in midsummer. Plant in partial shade, with some sun to make the colour come out, in moist, but well-drained soil. Mature height and spread: 55cm x 1m. Hardiness: H7.
Hosta 'Purple Heart'		

Hosta 'Reversed'		A clump forming herbaceous perennial with heart-shaped to ovate, dark green leaves with white centres. Lavender-blue flowers are produced in midsummer. Plant in partial shade, with some sun to make the colour come out, in moist, but well-drained soil. Mature height and spread: 45cm x 1m. Hardiness: H7.
Hosta sieboldiana	Large blue-green leaves. White flowers.	
Hosta 'Sum and Substance' AGM		A clump forming herbaceous perennial with heart-shaped, yellow-green to yellow leaves, which pucker when mature. Pale lilac flowers are produced from mid to late summer. Plant in full sun or partial shade, in moist but well-drained soil. Mature height and spread: 75cm x 1.2m. Hardiness: H7.
Hosta 'Wide Brim'		A clump-forming perennial with heart-shaped, slightly cupped, puckered dark green leaves with creamy-white margins. Pale lavender-blue flowers are produced on stalks in mid to late summer. Plant in full sun or partial shade, in moist but well-drained soil. Mature height and spread: 45cm x 1m. Hardiness: H7.
Hosta 'Blue Mouse Ears'		
Hosta 'Halcyon'	JOP	
Hosta sieboldiana var. Elegans	Not currently in production	
Hosta undulata var. Undulata (Synonym Hosta 'Mediovariagata')	JOP	
Hyacinthoides non-scripta (English Bluebell)	Not currently in production	A traditional woodland favourite. English Bluebells add spring time colour and sweet scent to any garden. Plant in part-shade in moist, free draining soil and they will multiply. Bulbs are lifted sustainably from managed growing areas and are supplied carefully packaged in moist compost to keep them healthy during transit.

Hyacinthus orientalis 'Delft Blue' AGM		A bulbous perennial with lance-shaped, bright green leaves. Upright racemes of tubular soft blue, highly fragrant flowers are produced in early spring. Specially prepared bulbs may be forced for earlier flowering. Ideally plant in full sun or partial shade, in any well-drained, moderately fertile soil. Mature height and spread: 20-30cm x 8cm. Hardiness: H4.
Hylotelephium x mottramianum 'Herbstfreude' (Syn. Indian Chief) (Sedum)	Large heads of dark pink-red flowers, late summer. H60cm.	A clump-forming, bushy herbaceous perennial with glaucous, mid-green stems and dark green leaves. Large flat heads of pink flowers are produced in late summer and autumn, ageing to dark red. Flower heads look good into winter and are attractive to bees. Plant in full sun, in well-drained soil. Does well on chalky soils. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Hylotelephium 'Matrona' AGM (Sedum)	Upright. Grey-green leaves tinged purple. Flat clusters of soft pink flowers. H60cm.	A clump-forming, bushy herbaceous perennial with dark grey-green leaves tinged purple. Large flat heads of fragrant pink-red flowers are produced in late summer and autumn. Flower heads look good into winter and are attractive to bees. Plant in full sun, in well-drained soil. Does well on chalky soils. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Hylotelephium 'Vera Jameson'	Green leaves tinged purple. Flat clusters of pink/red flowers. H 25cm	
Hylotelephium 'Jose Aubergine' PBR		
Hylotelephium spectabile 'Iceberg' (Sedum)	Light green leaves, flat heads of tiny white flowers. H45cm	A clump-forming herbaceous perennial with green stems and slightly toothed leaves. Large flat heads of pure white flowers are produced late summer and autumn. Flower heads look good into winter and are attractive to bees. Plant in full sun, in well-drained soil. Does well on chalky soils. Mature height and spread: 45cm x 35cm. Hardiness: H7.
Hylotelephium telephium 'Purple Emperor' AGM (Sedum)		A clump-forming, bushy herbaceous perennial with deep purple held on red stems. Large flat heads of fragrant purplish-pink flowers are produced in late summer and autumn. Flower heads look good into winter and are attractive to bees. Plant in full sun, in well-drained soil. Does well on chalky soils. Mature height and spread: 50cm x 60cm. Hardiness: H7.
Hypericum olympicum 'Citrinum'		

Imperata cylindrica 'Rubra'	JOP. Red tipped leaves. H45cm	
Iris 'Benton Caramel'		
Iris 'Benton Daphne'		
Iris 'Benton Deidre'		
Iris 'Benton Lorna'		
Iris 'Benton Menace'		
Iris 'Benton Pearl'		
Iris 'Benton Susan'		
Iris 'Caesar's Brother'		A clump-forming perennial Siberian iris with narrow, grass-like green leaves. Dark purple, beardless flowers with white markings are produced in groups on stems in late spring. Plant in full sun, in neutral to slightly acidic, moist but not water-logged soil. Mature height and spread: 90cm x 50cm. Hardiness: H7.

Iris 'Jane Phillips' AGM		A rhizomatous, tall bearded iris with sword-shaped, mid-green leaves. Pale blue flowers with deep blue veining and white beards are produced in late spring and early summer. Plant in full sun or light dappled shade with rhizomes on surface, in any reasonable, well-drained soil. Good for chalk. Mature height and spread: 90cm x 60cm. Hardiness: H7.
Iris 'Ruffled Velvet' AGM		A clump-forming perennial Siberian iris with narrow, grass-like green-grey leaves. Velvety red-purple flowers with darker falls (lower petals) with a yellow blotch are produced in groups on stems in early summer. Plant in full sun, in neutral to slightly acidic, moist but not water-logged soil. Mature height and spread: 70cm x 50cm. Hardiness: H7.
Iris 'Sparkling Rose'		
Iris 'Tamberg'		A clump-forming perennial Siberian iris with narrow, grass-like green leaves. Pale blue, beardless flowers are produced in groups on stems in early summer. Plant in full sun, in neutral to slightly acidic, moist but not water-logged soil. Mature height and spread: 60cm x 50cm. Hardiness: H7.
Iris chrysophrages	JOP	
Iris danfordiae		
Iris pseudacorus		A virgorous perennial with sword-shaped, grey-green leaves. Bright yellow flowers with brown or violet markings are produced in stems in mid and late summer. Plant in full sun or partial shade, in wet or moist, humus rich soils. Thrive next to ponds or streams. Mature height and spread: to 1.5m x 1m+. Hardiness: H7.
Iris sibirica 'Perry's Blue'		A clump-forming perennial Siberian iris with narrow, grass-like green-grey leaves. Striking sky blue, beardless flowers with white markings are produced in groups on stems in early summer. Plant in full sun, in neutral to slightly acidic, moist but not water-logged soil. Mature height and spread: 85cm x 50cm. Hardiness: H7.
Iris sibirica 'Yellowtail'		

Iris 'Silver Edge'		
Iris 'Summer Sky'		
Iris unguicularis		A vigorous, rhizomatous, bearless iris with tough grass-like, evergreen leaves. Fragrant, pale lavender blue flowers with a central band of yellow are produced on short stems in late winter and early spring . Plant in full sun or light dappled shade, in any reasonable, well-drained soil. Good for chalk. Mature height and spread: 30cm x 60cm. Hardiness: H7.
Iris x robusta 'Gerald Darby'		
Iris. Bearded light purple from Aunty Freda		
Jovibarba sobolifera		An evergreen, rosette forming perennial with glossy, bright green leaves with are flushed with red at the tips as they age. Greenish yellow bell-shaped flowers are produced in summer. After flowering, the main rosette is replaced by many small offsets around the edge. Plant in full sun, in poor, gritty, very well-drained soil. Mature height and spread: 20cm x 30cm. Hardiness: H4.
Kirengeshoma palmata		
Knautia macedonica 'Red Knight'		

Knautia macedonica	Deep crimson 'pincushion' flowers on long stems from mid to late summer. H80cm	
Kniphofia 'Bee's Lemon'		A semi-evergreen perennial with narrow, strap-shaped, mid-green leaves. Spikes topped with racemes of lemon-yellow flowers which are green when in bud, are produced in late summer and early autumn. Plant in full sun or partial shade, in deep-fertile, well-drained soil. Mature height and spread: 90cm x 60cm. Hardiness: H5.
Kniphofia 'Firey Fred'		
Kniphofia 'Green Jade'		A robust, clump-forming, semi-evergreen perennial with strap-shaped dark green leaves. Spikes topped with racemes of pale green buds open to cream, then white flowers from late summer to early autumn. Plant in full sun or partial shade, in deep-fertile, well-drained soil. Mature height and spread: 1.5m x 60-75cm. Hardiness: H6.
Kniphofia 'Jenny Bloom'		
Kniphofia 'Mango Popsicle'		
Kniphofia 'Toffee Nosed'		A semi-evergreen perennial with narrow, strap-shaped, mid-green leaves. Spikes topped with racemes of brownish orange buds open to white flowers from late summer to early autumn. Plant in full sun or partial shade, in deep-fertile, well-drained soil. Mature height and spread: 1.2m x 60cm. Hardiness: H5.
Lamium galeobdolon	JOP	
Lamium maculatum 'Beacon Silver'	JOP. Silver markings, pink flowers.H20cm	

Lamium maculatum 'Pink Pearls'		
Lamium maculatum 'White Nancy'		
Lamium maculatum from Rosemary		
Lamium maculatum 'White Nancy'		
Lamium orvala (Balm-leaved Deadnettle/Archangel)	Large pink/red flowers. H 45cm	
Lamprocapnos (Dicentra) spectabilis AGM		A clump-forming herbaceous perennial with pale green, divided leaves. Heart-shaped flowers with rose pink outer petals and white inner petals, are produced along arching stems from late spring to midsummer. Plant in partial shade, in moist, fertile, humus-rich soil. Good for alkaline soils. Mature height and spread: to 1.2m x 45cm. Hardiness: H6.
Lamprocapnos (Dicentra) spectabilis f. alba		A clump-forming herbaceous perennial with pale green, divided leaves. White heart-shaped flowers are produced along arching stems from late spring to midsummer. Plant in partial shade, in moist, fertile, humus-rich soil. Good for alkaline soils. Mature height and spread: to 1.2m x 45cm. Hardiness: H6.
Leucanthemella serotina		An erect herbaceous perennial with lance-shaped, toothed, green leaves. Tall stems bearing white, daisy-like flowers with yellow centres are produced from early to late autumn. Flowers turn towards the sun. Plant in full sun or partial shade, in any moist soil. Mature height and spread: up to 1.5m x 90cm. Hardiness: H7.
Leucanthemum 'Phyllis Smith'?		

Leucanthemum 'Sunny Side Up' PBR		A clump-forming herbaceous perennial with glossy, dark green, toothed leaves. Tall stems of white, flowers with uneven, yellow centres are produced from early summer to early autumn. Plant in full sun or partial shade, in moist, but well-drained soil. Mature height and spread: 75cm x 45cm. Hardiness: H5.
Leucanthemum x superbum 'Aglia'		A clump-forming herbaceous perennial with glossy, dark green, toothed leaves. Tall stems of white, frilly, semi-double flowers are produced from early summer to early autumn. Plant in full sun or partial shade, in moist, but well-drained soil. Mature height and spread: 60cm x 60cm. Hardiness: H4.
Leucanthemum x superbum 'Silver Princess'		
Leucorum aestivum		A robust, bulbous perennial with erect, strap-shaped, glossy dark green leaves. Lightly scented, white bell-shaped flowers with green tips are produced on long stems in spring. Plant in full sun, in moist soil. Mature height and spread: 50cm x 8cm. Hardiness: H7.
Leucorum verum		
Leucorum verum var. vagen	Not currently in production	
Levisticum officinale (Lovage)	Lovage. Celery/curry tasting leaves. H 2m	
Liatris spicata 'Floristan Violett'		An upright herbaceous perennial with linear leaves. Tall, long-lasting, purple flower spikes are produced in late summer and early autumn. Plant in full sun, in well drained soil. Mature height and spread, 70cm x 45cm. Hardiness: H7.
Liatris spicata 'Floristan Weiss'		An upright herbaceous perennial with linear leaves. Tall, long-lasting, white flower spikes are produced in late summer and early autumn. Plant in full sun, in well drained soil. Mature height and spread, 90cm x 45cm. Hardiness: H7.

Ligularia dentata 'Desdemona'	Leaves, maroon underneath. Clusters of orange daisy flowers late summer. H 1m	A clump-forming herbaceous perennial with large, rounded leaves that are brownish green above and maroon underneath. Red leaf stalks. Flat corymbs of many deep orange flowers are produced from midsummer to early autumn. Plant in full sun, with some midday shade, in fertile, deep, moist soil. Mature height and spread: 1m x 1m. Hardiness: H6.
Limonium platyphyllum	JOP	
Linaria purpurea (Purple Toadflax)		An erect, slender herbaceous perennial with linear, mid-green leaves. Racemes of small, 2-lipped, violet-purple flowers are produced from early summer to early autumn. Self-seeds freely. Plant in full sun, in any moderately fertile, well-drained soil. Mature height and spread: 90cm x 30cm. Hardiness: H6.
Linaria purpurea 'Canon Went' (Purple Toadflax)		An erect, slender herbaceous perennial with linear, mid-green leaves. Racemes of small, 2-lipped, pale pink flowers are produced from early summer to early autumn. Self-seeds true if isolated from other Linaria. Plant in full sun, in any moderately fertile, well-drained soil. Mature height and spread: 90cm x 30cm. Hardiness: H6.
Linaria purpurea 'Springside White'		
Linaria purpurea 'Springside White' (White-flowered Purple Toadflax)		An erect, slender evergreen herbaceous perennial with narrow, grey-green leaves. Spikes of small, 2-lipped white flowers are produced from early summer to early autumn. Self-seeds true if isolated from other Linaria. Plant in full sun, in any moderately fertile, well-drained soil. Mature height and spread: 60-90cm x 30cm. Hardiness: H6.
Linaria vulgaris (Yellow Toadflax)	Spikes of small pale yellow and orange 'snpdragon' type flowers. H 20-60cm.	JOP.
Liriope muscari 'Big Blue'	Violet-purple flower spikes. H40cm	

Liriope muscari 'Monroe White'	Spikes of small pale yellow and orange 'snpdragon' type flowers. H 20-60cm.	
Liriope muscari 'Kindi Pink'		
Liriope muscari		A tufted, evergreen perennial with clumps of strap-shaped, dark green leaves. Purple-green stems bear spikes of violet-mauve flowers in throughout autumn. Plant in partial or full shade, in light, moist, but well drained soil. Will grow in dry shade too. Mature height and spread; 30cm x 45cm. Hardiness: H5.
Liriope muscari 'Variegata'		A tufted, evergreen perennial with clumps of strap-shaped, green leaves with creamy-yellow edges. Purple-green stems bear spikes of violet-mauve flowers in throughout autumn. Plant in partial or full shade, in light, moist, but well drained soil. Mature height and spread; 45cm x 45cm. Hardiness: H5.
Lobelia x speciosa 'Russian Princess'		
Luzula nivea	JOP. Evergreen grass-like, dark green leaves. Clusters of white flowers. H60cm	
Lunaria rediviva (Perennial Honesty)	Perennial Honesty, pale pink flowers	
Lychnis coronaria	JOP	

Lychnis coronaria 'Alba' AGM		An upright short-lived perennial with woolly silver-grey leaves. Branched stems produce white salverform flowers in long succession throughout summer. Will self-seed freely. Plant in full sun or partial shade, in any moderately fertile, well-drained soil. Mature height and spread: 80cm x 45cm. Hardiness: H7.
Lychnis flos cuculi 'White Robin'	JOP. Finely divided white flowers	
Lysimachia atropurpurea 'Beaujolais'	Not currently in production	A compact, upright, clump-forming perennial which can be short-lived and has narrowly oblong, grey-green leaves, which are wavy edged and turn red in autumn. Racemes of saucer-shaped, burgundy-red flowers are produced in midsummer. Good as a cut flower. Plant in full sun or partial shade, in humus rich, preferably moist, but well-drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H6.
Lysimachia ciliata 'Firecracker' AGM		An erect, rhizomatous herbaceous perennial with hairy, rich purple, ovate-lance shaped leaves. Star-shaped yellow flowers are produced in midsummer. Plant in full sun or partial shade, in humus rich, preferably moist, but well-drained soil. Mature height and spread: 50-90cm x 60cm. Hardiness: H6.
Lysimachia clethroides		A spreading, softly hairy, herbaceous perennial with erect stems of narrowly ovate-lance-shaped, pointed mid-green leaves that are pale green underneath. Racemes of small, white flowers are produced in mid to late summer, arching at first and becoming more upright as the flowers open. Plant in full sun or partial shade, in humus rich, preferably moist, but well-drained soil. Mature height and spread: 50-80cm x 60cm. Hardiness: H6.
Lysimachia ephemerum		
Lysimachia ephemerum (replacement)		
Lysimachia fortunei	JOP	White flower spikes
Lysimachia nummularia 'Aurea'- Creeping Jenny		

Lysimachia nummularia 'Aurea'- Creeping Jenny		
Lysimachia punctata		An erect, rhizomatous herbaceous perennial with softly hairy, whorled, elliptic to lance-shaped, dark green leaves. Stalks bearing whorls of small, cup-shaped yellow flowers are produced in mid and late summer. Plant in full sun or partial shade, in humus rich, preferably moist, but well-drained soil. Mature height and spread: 1m x 60cm. Hardiness: H6
Lythrum salicaria 'Blush'	JOP	Pale pink flowers
Lythrum salicaria 'Robert'		
Lythrum virgatum 'Dropmore Purple'	JOP. Upright. Narrow green leaves. Spikes of purple-red flowers. H80-120cm	Pink/purple flowers
Lythrum virgatum 'Rosy Gem'	JOP	Rosy pink flowers
Malva moschata		
Malva moschata alba		
Matteuccia pensylvanica	Not currently in production	

Matteuccia struthiopteris		A rhizomatous fern with shuttlecocks of lance-shaped, pinnate, pale green fronds with narrowly lance-shaped pinnae (leaflets). Shorter, dark brown fronds are produced in late summer. Plant in dappled shade, in moist, but well-drained, humus-rich soil. Mature height and spread: 1.7m x to 1m. Hardiness: H5.
Melica altissima 'Alba'	White flower spikelets. H 90cm.	A tufted, perennial grass with linear pale green leaves with rough surfaces. Pale greenish white spikelets of 'flowers' are produced from late spring to late summer. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: to 60cm-1.5m x 40-80cm. Hardiness: H6.
Melica altissima 'Atropurpurea'	JOP	
Melica ciliata (Silky Spike Melick)		A tufted, perennial grass with linear, pointed, greyish green leaves. White or cream spikelets are produced on stems in summer. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: to 1m x 30cm. Hardiness: H6.
Melica uniflora f. albida (Wood Melick)		A perennial grass which forms loose tufts of bright green, linear leaves which are hairy on the upper sides. Sparsely branched purple-brown spikelets of 'flowers' are produced in summer. Plant in partial or deep shade, in fertile, well-drained soil. Good for dry shade. Mature height and spread: to 20-60cm x 60cm. Hardiness: H5.
Melissa officinalis (Lemon Balm)	JOP	
Melissa officinalis 'Aurea' (Variegated Lemon Balm)	JOP	
Mentha spicata (Garden Mint)		
Mentha spicata 'Tashkent' (Spear-mint)	Curled Spear-mint, pale purple flowers. H 80cm	A spreading herbaceous perennial with green, oval, slightly crinkled, spearmint scented leaves which are hairy on the undersides and borne on purple flushed stems. Spikes of small, tubular, lilac flowers are produced in summer. Plant in full sun, in poor, moist soil. Mature height and spread: 80cm x indefinite. Hardiness: H7.

Mentha suaveolens (Apple Mint)	JOP	
Mentha suaveolens 'Variegata' (Apple Mint)	JOP	
Mentha x piperita f. citrina Eau de Cologne Mint	JOP	
Milium effusum 'Aureum' AGM	Yellow leaves, golden arching flower spikes. Light shade. H60cm	A slowly spreading, loosely tufted, semi-evergreen, perennial grass with smooth strap-shaped leaves which are golden yellow, especially in spring. Tiny nodding, golden spikelets are produced on stems from late spring to midsummer. Ideally plant in partial shade, in moist, but well drained soil. Will tolerate full sun if soil is reliably moist. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Miscanthus sinensis 'Flamingo'		
Miscanthus sinensis 'Kleine Silberspinne'	JOP	
Miscanthus sinensis 'Strictus'	JOP	
Miscanthus sinensis 'Yakushima Dwarf'		

Miscanthus sinensis 'Ferner Osten'	JOP	
Miscanthus sinensis 'Gracillimus'	JOP	
Miscanthus sinensis 'Kleine Fontane'	JOP	
Miscanthus sinensis 'Malepartus'	JOP. Dark purple-red flower plumes, drying to pink and buff. H2m	
Miscanthus sinensis 'Morning Light'	JOP	
Molinia caerulea 'Strahlenquelle'	Upright. Airy, purple flowers. Yellow/orange autumn leaves. H95cm	An upright, see-through grass forming dense clumps of flat, mid-green leaves which turn golden yellow in autumn. Plumes of purple tinted bronze flowers are produced on upright stems from spring to autumn. The autumn colour is especially good. Plant in full sun or partial shade, in any moist, but well-drained soil, preferably acid-neutral. Mature height and spread: 1m x 40cm. Hardiness: H7.
Molinia caerulea subsp. arundinacea 'Bergfreund'	JOP	
Molinia caerulea subsp. Caerulea 'Heidebraut' (Purple Moor Grass)	Upright. Airy, purple flowers. H1.2-1.5m	An upright, see-through grass forming dense arching clumps of flat, mid-green leaves. Plumes of purple tinted flowers are produced up upright or slightly, deep purple almost black stems from summer to autumn. Turns golden yellow orange in autumn. Plant in full sun or partial shade, ideally damp acid-neutral soil. Will tolerate drier soil once established. Mature height and spread: 120-150cm x 40cm. Hardiness: H7.

Molinia caerulea subsp. arundinacea 'Karl Foerster'		An upright, see-through grass forming dense clumps of flat, mid-green leaves. Plumes of gently arching, open and airy golden brown flowers, which start greenish purple, are produced from summer to autumn. Turns golden yellow in autumn. Plant in full sun or partial shade, in any moist, but well-drained soil, preferably acid-neutral. Mature height and spread: 180-210cm x 40cm. Hardiness: H7.
Molinia caerulea subsp. caerulea 'Edith Dudsus' (Purple Moor Grass) AGM		An upright, see-through grass forming dense clumps of flat, mid-green leaves. Plumes of purple tinted flowers are produced on arching, deep purple almost black stems from summer to autumn. Turns golden yellow/orange in autumn. Plant in full sun or partial shade, ideally damp acid-neutral soil. Will tolerate drier soil once established. Mature height and spread: 90-120cm x 40cm. Hardiness: H7.
Monarda 'Aquarius'		A clump-forming perennial with lance-shaped to oval, green-bronze, aromatic leaves on square stems. Pale lilac, tubular flowers with pinkish bracts are produced atop stems from midsummer to early autumn. Plant in full sun or dappled shade, in fertile, moist, but well-drained soil that is not waterlogged in winter. Mature height and spread: 90cm x 45cm. Hardiness: H5.
Monarda 'Gardenview Scarlet'	JOP	
Monarda 'Gardenview Scarlet'		
Monarda 'Croftway Pink'	JOP	
Monarda 'Westacre Purple'	Purple flowers with dark purple bracts. Mildew resistant. H1m	A clump-forming perennial with green, aromatic leaves on square stems. Dark purple, tubular flowers with dark bracts are produced atop stems from midsummer to early autumn. Mildew resistant. Ideally plant in full sun or dappled shade, in fertile, moist, but well-drained soil that does not dry out in summer. Approximate height and spread: 1m x 45cm. Hardiness: H5/H4.
Muscari 'Peppermint'		

Muscari 'Valerie Finnis'		
Muscari latifolium		
Nectaroscordum siculum		Stout stems bear umbels of nodding, bell-shaped, creamy white flowers flushed pink-purple and pale green at the base. Seed pods become erect as flowers fade. Height: up to 1.2m.
Nepeta 'Hill Grounds' (Catmint)		A bushy herbaceous perennial with small, hairy, silvery green, aromatic leaves. Spikes of violet blue flowers are produced throughout summer if deadheaded. The bluest of all the Nepetas we grow and flowers for a long period (near to Christmas one year). Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 55cm x 60cm. Hardiness: H7.
Nepeta gowaniana	Tall stems with loose spikes of pale yellow lipped flowers. Light shade. H. 1m	An upright herbaceous perennial, with softly hairy green aromatic leaves. Long stems with loose spikes of pale yellow flowers are produced from approximately June to October. Comes from woodland edges. Plant in full sun or partial shade, in cool, well-drained soil. Mature height and spread: 100cm x 50cm. Hardiness: H6.
Nepeta 'Six Hills Giant'		
Nepeta grandiflora 'Dawn to Dusk' (Catmint)	Pale pink flowers. Upright. H75cm	A clump-forming, upright herbaceous perennial with small, scalloped, hairy mid-green-blue leaves which are aromatic. Spikes of groups of pale pink flowers are produced in summer. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Mature height and spread: 75cm x 30cm. Hardiness: H6.
Nepeta grandiflora 'Bramdean' (Catmint)	Upright. Spikes of blue-purple flowers from midsummer. H75cm.	A clump-forming, upright herbaceous perennial with small, scalloped, hairy green-blue leaves which are aromatic. Spikes of blue/purple flowers are produced from midsummer. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 75cm x 30cm. Hardiness: H6.

Nepeta racemosa 'Walker's Low' (Catmint)		A neat, mound-forming herbaceous perennial with small, scalloped, hairy mid-green-blue leaves which are aromatic. Spikes of purple-blue flowers are produced throughout summer, if deadheaded. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Mature height and spread: 30cm x 45cm, Can be up to 90cm tall in richer soil. Hardiness: H7.
Nepeta racemosa 'Amelia' (Catmint)		A neat, mound-forming herbaceous perennial with small, scalloped, hairy silvery green, aromatic leaves. Spikes of pale pink flowers are produced throughout summer, if deadheaded. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 60cm x 45cm. Hardiness: H7.
Nepeta racemosa 'Little Titch' (Catmint)		A neat, dwarf mound-forming herbaceous perennial with small, scalloped, hairy silvery green, aromatic leaves. Spikes of lavender-blue flowers are produced throughout summer, if deadheaded. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 30cm x 30cm. Hardiness: H7.
Nepeta racemosa 'Snowflake' (Catmint)	Mounding, white flowers. H 35cm	A neat, dwarf mound-forming herbaceous perennial with small, scalloped, hairy silvery green, aromatic leaves. Spikes of pure white flowers are produced throughout summer, if deadheaded. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 30-45cm x 30cm. Hardiness: H7.
Nepeta sibirica 'Souvenir d'Andre Chaudron' AGM		An upright herbaceous perennial with toothed, lance-shaped, aromatic green leaves flushed with red. Long, upright racemes of lavender-blue flowers are produced in mid and late summer. Plant in full sun or partial shade, in any well drained soil. Mature height and spread: 45cm x 45cm. Hardiness: H6.
Nepeta transcaucasica	Upright. Spikes of small violet-blue flowers throughout summer. H to 1m	
Nerine bowdenii		
Oenothera lindheimeri 'Whirling Butterflies' (Formerly Gaura)	JOP. Formerly Gaura. Pink buds, white flowers. H 80cm	

Oenothera (Gaura) lindheimeri 'Chiffon'		An elegant upright herbaceous perennial with narrow green leaves and slender flower stems which wave in the breeze and have mid-pink flowers over a long period throughout summer. Good for a dry spot. Ideally plant in full sun, in any well-drained soil. Good for chalk and drought tolerant. Approximate height and spread: 75cm x 50cm. Hardiness: H4.
Oenothera (Gaura) linheimeri 'The Bride'	JOP	
Oenothera lindheimeri PAPILLON ('Nagaupapil') PBR		Pure white flowered
Omphalodes cappadocia 'Cherry Ingram'		A clump-forming evergreen perennial with ovate to heart-shaped, pointed, hairy leaves. Loose racemes of deep blue flowers are produced in early spring. Plant in partial shade, in humus-rich soil. Mature height and spread: 25cm x 40cm. Hardiness: H5.
Omphalodes cappadocia 'Starry Eyes'		A clump-forming evergreen perennial with ovate to heart-shaped, pointed, hairy leaves. Loose racemes of pale blue flowers, with a white stripe down the center of each petal, are produced in early spring. Plant in partial shade, in humus-rich soil. Mature height and spread: 25cm x 40cm. Hardiness: H5.
Omphalodes verna 'Alba'		A clump forming herbaceous perennial with heart-shaped, light green leaves. Groups of white flowers on stems are produced in spring. Plant in partial shade, in humus-rich soil. Mature height and spread: 20cm x 30cm. Hardiness: H6.
Ophiopogon planiscapus 'Nigrescens'		A clump-forming, spreading, evergreen perennial with strap-shaped almost black, curving leaves. Short racemes of small, bell-shaped pale purplish white flowers are produced in summer, followed by dark blue-black fruit. Plant in full sun or partial shade, in moist but well-drained, humus-rich soil. Mature height and spread: 30cm x 20cm. Hardiness: H5.
Origanum 'Rosenkuppel' (Oregano/Marjoram)	Dark green leaves. Dark purple buds opening to pink flowers. H to 60cm	A clump-forming, woody-based perennial with upright stems and dark green, purple flushed leaves. Clusters of dark purple buds open to reveal small pink/purple flowers. Loved by bees and butterflies. Ideally plant in full sun or partial shade, in any well drained soil, good for chalk. Dislikes wet soil. Drought tolerant. Approximate height and spread: 60cm x 40cm. Hardiness: H7.
Origanum 'Bristol Cross'		

Origanum laevigatum 'Herrenhausen' AGM		A clump-forming, woody-based perennial with upright stems and dark green, purple flushed leaves. Small pink flowers are surrounded by purple bracts. Loved by bees. A more upright variety than 'Rosenkuppel'. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 45-50cm x 40cm.
Origanum vulgare 'Thumble's Variety' (Oregano/ Wild Marjoram)		A bushy, woody perennial with small, rounded, aromatic, golden leaves. Loose clusters of white flowers are produced in midsummer to early autumn. Can be used in cooking. Loved by bees. Plant in full sun, in poor or moderately fertile, well-drained, preferably alkaline soil. Mature height and spread: 50cm x 30cm. Hardiness: H4.
Origanum vulgare (Oregano, Wild Marjoram)	Clusters of pale pink flowers on stems throughout summer. H50cm	A bushy, woody perennial with small, aromatic green leaves. Loose clusters of pink flowers are produced in midsummer to early autumn. Loved by bees. Ideally plant in full sun or partial shade, in any well drained soil. Dislikes wet soil. Drought tolerant. Approximate height and spread: 50cm x 90cm. Hardiness: H6.
Origanum vulgare 'Aureum' AGM		A bushy, woody perennial with small, rounded, aromatic, golden leaves. Loose clusters of pink flowers are produced in midsummer to early autumn. Loves by bees. Plant in full sun, in poor or moderately fertile, well-drained, preferably alkaline soil. Mature height and spread: 50cm x 30cm. Hardiness: H6.
Osmunda regalis		
Osmunda regalis 'Purpurascens' (Royal Fern)		A deciduous fern with soft, purple flushed fronds in spring, which turn green later and are bipinnate. In summer tall fronds with tassel-like tips are produced. Good for a damp site. Ideally plant in moist, fertile soil in dappled shade. Will tolerate full sun if soil is wet. Approximate height and spread: 1.2m x 1.2m. Hardiness: H6.
Pachyphragma macrophyllum	Clusters of white flowers. H 40cm	Clusters of white flowers in spring. Good for dry shade
Pachysandra terminalis		A spreading, evergreen shrublet with obovate, toothed, dark green leaves in clusters on short stems. Small white flowers are produced on spikes in early summer. Good for ground cover. Plant in full or partial shade, in any soil, except dry soils. Mature height and spread: 20cm x indefinite. Hardiness: H5.
Pachysandra terminalis 'Green Carpet'		

Pachysandra terminalis 'Variegata' AGM		A spreading, evergreen subshrub with toothed, dark green leaves with white edges in clusters on short stems. Small white flowers are produced on spikes in early summer. Good for ground cover. Plant in full shade or partial shade, in any soil, except very dry soils. Approximate height and spread: 25cm x 60. Hardiness: H5.
Paeonia 'Agida'		
Paeonia 'Bowl of Beauty' AGM		An herbaceous perennial with dissected, deep green leaves. Large, anemone-form, carmine-red, pink-tinted flowers with dense, creamy-white centres with many small petals are produced in early summer. Plant in deep, fertile, humus-rich soil in full sun or partial shade. Mature height and spread: 80-100cm x 80-100cm. Hardiness: H6.
Paeonia 'Bunker Hill'		An herbaceous perennial with dissected, deep green leaves. Large, double, bright red flowers with ruffled petals are produced in early summer. Plant in deep, fertile, humus-rich soil in full sun or partial shade. Mature height and spread: 70-75cm x 70-75cm. Hardiness: H6.
Paeonia 'Coral Charm'		
Paeonia 'Edulis Superba'		
Paeonia 'Felix Crousse'		
Paeonia 'Flame'		
Paeonia 'Sarah Bernhardt'		A robust herbaceous perennial with erect stems of mid-green, dissected leaves. Very large, fragrant, double rose-pink flowers, the inner petals ruffled and silver edged, are produced in early summer. Plant in deep, fertile, humus-rich soil in full sun or partial shade. Mature height and spread: 90-100cm x 90-100cm. Hardiness: H6.

Paeonia delavayi	Not currently in production	
Paeonia Festiva Maxima'		An herbaceous perennial with strong, erect stems of mid-green, dissected leaves. Very large, fragrant, double white flowers are produced in early summer, with crimson bases to the inner petals. Plant in deep, fertile, humus-rich soil in full sun or partial shade. Mature height and spread: 90-100cm x 90-100cm. Hardiness: H6.
Paeonia 'Kelway's Glorious'		
Paeonia lactiflora 'Baroness Schroder'		
Paeonia lactiflora 'Lotus Queen'		
Panicum virgatum 'Heavy Metal'	JOP. Metallic blue-grey leaves. Spikelets of purple-green flowers late summer. H 1.2m	
Panicum virgatum 'Shenandoah' (Switch Grass)	JOP. Green-blue leaves with tinges of red. Tiny purplish flowers on airy spikes. H90cm	
Patrinia aff. punctiflora		An upright herbaceous perennial with a dome of green, divided basal leaves. Tall stems bearing clusters of tiny pale yellow flowers are produced from mid to late summer, with attractive seeds forming afterwards. Ideally plant in partial shade or full sun, in any reasonably fertile soil. Approximate height and spread: 1-1.2m x 60cm. Hardiness: H4.

Patrinia scabiosifolia (Eastern or Golden Valerian)	Yellow flower sprays, like Verbena bonariensis. H. 1m	A gently spreading perennial with dark green leaves and tall branched stems topped with sprays of yellow flowers in late summer and autumn. Like a yellow Verbena bonariensis. Ideally plant in partial shade or full sun, in any reasonably fertile soil. Approximate height and spread: 100cm x 60cm. Hardiness: H5.
Patrinia triloba	Carpeting. Stems topped with clusters of tiny bright yellow flowers late summer and autumn. Shade H25-50cm	
Penstemon 'Alice Hindley' (Beardtongue)		A vigorous, bushy woody perennial with narrow green leaves which can be evergreen. Large tubular, lilac/mauve flowers with white insides (throats) are produced from midsummer to autumn. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: 75-100cm x 60cm. Hardiness: H4.
Penstemon 'Andenken an Friedrich Hahn' (P. 'Garnet')AGM (Beardtongue)		A vigorous, bushy woody perennial with narrow green leaves which can be evergreen. Tubular, deep pink-red flowers are produced from midsummer to autumn. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 75cm x 60cm. Hardiness: H5.
Penstemon 'Evelyn' (Beardtongue)		A compact, bushy woody perennial with very narrow green leaves which can be evergreen. Slim tubular, rose pink flowers with white insides(throats)marked with darker pink stripes are produced from midsummer to autumn. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: 55-70cm x 60cm. Hardiness: H4.
Penstemon 'Geoff Hamilton'		
Penstemon 'Pensham Laura' (Beardtongue)		
Penstemon 'Pensham Victoria Plum'		
Penstemon 'Pensham Wedding Day' (Beardtongue)		A vigorous, upright, bushy woody perennial with narrow green leaves which can be evergreen. Tubular pure white flowers from ivory buds are produced from midsummer to well into autumn. Named by Edward Wilson (breeder of the Pensham Penstemons) in honour of his daughter Sally's wedding. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: 80-90cm x 60cm. Hardiness: H4.

Penstemon 'White Bedder' (Beardtongue)		A vigorous, bushy perennial with lance-shaped green leaves. Tubular, white flowers, which become pink tinged, are produced from midsummer to autumn. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H3.
Penstemon 'Blackbird' (Beardtongue)		A vigorous, upright, bushy woody perennial with narrow green leaves which can be evergreen. Large tubular deep purple flowers with white insides (throat) are produced from midsummer to well into autumn. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: 80-90cm x 60cm. Hardiness: H4.
Penstemon digitalis 'Husker Red' (Beardtongue)		A vigorous perennial with semi-evergreen basal leaves and stems and leaves which are maroon-red when young. Tubular-bell-shaped white flowers tinged with pink are produced along stems from early to late summer. Loved by bees. Ideally plant in full sun or partial shade, in any reasonably fertile, well-drained soil. Approximate height and spread: 75cm x 30cm. Hardiness: H4.
Penstemon heterophyllus 'Heavenly Blue' (Beardtongue)		
Penstemon 'Hewell Pink Bedder' AGM (Beardtongue)		A vigorous, bushy perennial with lance-shaped green leaves. Tubular, pink flowers with white throats streaked with red, are produced from midsummer to autumn. Ideally plant in full sun or partial shade, in any well-drained soil. Approximate height and spread: 80cm x 45cm. Hardiness: H4.
Penstemon 'Pensham Arctic Fox' (Beardtongue)		A vigorous, upright semi-evergreen perennial with lance-shaped green leaves. Spikes of small tubular white flowers, are produced from midsummer to autumn. Ideally plant in full sun or partial shade, in well-drained soil. Approximate height and spread: 60cm x 45cm. Hardiness: H4.
Penstemon 'Sour Grapes' (Beardtongue)		
Penstemon 'Stapleford Gem' (Syn. P. 'Sour Grapes') (Beardtongue)	JOP	

Persicaria affinis 'Darjeeling Red'	JOP	
Persicaria affinis 'Superba'		A spreading evergreen perennial with pointed, dark green leaves that turn red-brown in autumn. Spikes of pale pink flowers, which turn red, are produced from mid summer into autumn. Plant in full sun or partial shade, in any moist soil. Mature height and spread: 25cm x 60cm or more. Hardiness: H7.
Persicaria bistorta 'Superba'		
Persicaria campanulata	JOP	
Persicaria microcephala 'Red Dragon'		
Persicaria runcinata	Triangular green leaves with a maroon V marking. Bobbles of tiny pale pink flowers. H 60-100cm	An upright herbaceous perennial with hairy stems and triangular green leaves with a maroon 'V' shape. Roundish heads of small pale pink flowers are produced in summer. Will spread by creeping along the ground. Ideally plant in light shade in a moist soil. Approximate height and spread: 60-100cm x 50cm or more. Hardiness: H6.
Persicaria filiformis 'Brushstrokes' (Formerly P. virginiana 'Brush Strokes')	Green leaves with red/maroon markings. Spikes of tiny red flowers late summer. H 80cm	
Persicaria virginiana var. filiformis (Thread-like Virginian Knotweed)		An upright herbaceous perennial with large, hairy green leaves with striking purple/burgundy V shaped markings. Very fine spikes of tiny red flowers are produced in late summer. Seeds freely. Plant in partial shade in any reasonably moist soil. Will tolerate more sun if the soil is moist. Approximate height and spread: 60-80cm x 50cm. Hardiness: H6.
Persicaria wallichii		A robust, clump-forming, semi-evergreen perennial with ovate-lance-shaped, pointed, mid-green leaves. Long stalks bear spikes of small, highly fragrant, white flowers from mid-summer to early autumn. Plant in full sun or partial shade, in any moist soil. Mature height and spread: 1.5m x 1.2m. Hardiness: H7.

Phalaris arundinacea- variegated grass from Zelda		
Philadelphus coronarius 'Variegatus'		
Phlox divaricata 'White Perfume'		
Phlox divaricata 'Blue Moon' (Sweet William)	Blue flowers in spring. H 30cm	
Phlomis italica		
Phlomis italica		
Phlomis purpurea		
Phlomis russeliana		An upright herbaceous perennial with large, furry, mid-green, heart-shaped leaves. Pale yellow flowers are produced in clusters, spaced out on long stems, from late spring to early autumn. Seedheads are attractive on the plant throughout winter. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 90cm x 75cm. Hardiness: H6
Phlomis tuberosa	Not currently in production	

Phlox carolina 'Miss Lingard' AGM		An upright, spreading herbaceous perennial with thick, lance-shaped, dark green leaves. Cymes of fragrant white flowers are produced in early summer. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 90cm x 45cm. Hardiness: H6.
Phlox paniculata 'Bright Eyes'	JOP	
Phlox paniculata 'Elizabeth Campbell'		
Phlox paniculata 'Franz Schubert' AGM	Tall stems topped with clusters of lavender and white flowers. H1.1m	An erect herbaceous perennial with ovate green leaves. Panicles of fragrant lavender-pink flowers, with petal edges fading to white, are produced from summer to autumn. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 1.1m x 50cm. Hardiness: H7.
Phlox paniculata 'Herbstwalzer'		
Phlox paniculata 'Lichstspel'?		
Phlox paniculata 'Monica Lynden Bell'	JOP	
Phlox paniculata 'Mount Fuji'		An erect herbaceous perennial with ovate green leaves. Panicles of fragrant white flowers are produced from summer to autumn. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 75m x 50cm. Hardiness: H7.
Phlox paniculata 'Othello'		

Phlox paniculata 'Red Feelings'	Green leaves flushed maroon. Tiny red flowers, hardly opening at all. H 75cm	An erect herbaceous perennial with ovate green leaves. Clusters of small, inconspicuous red flowers are surrounded by deep red/purple bracts in mid to late summer. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 75cm x 50cm. Hardiness: H5.
Phlox paniculata 'Starfire'		
Phlox paniculata 'Tenor'		An erect herbaceous perennial with pointed dark green leaves and deep purple tips to the shoots. Clusters of fragrant deep pink-red flowers are produced over a long period throughout summer. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 90cm x 70cm. Hardiness: H7.
Phlox paniculata 'Blue Paradise'	JOP	
Phlox paniculata 'David'	Tall stems topped with clusters of pure white flowers. Mildew resistant. H. 1-1.2m	An erect herbaceous perennial with narrow dark green leaves. Stems bearing clusters of fragrant white flowers are produced from summer to autumn. A more mildew resistant variety. Plant in full sun or partial shade, in any fertile, average to moist soil. Mature height and spread: 100-120cm x 50cm. Hardiness: H7.
Phlox paniculata 'Eventide'	JOP	
Phlox paniculata wild form 'Margery Fish'	Pale lilac flowers. H75cm	
Phlox paniculata. Mauve from Nanny		
Phlox subulata 'Amazing Grace' (Moss Phlox)	JOP	

Phlox subulata 'Emerald Cushion' (Moss Phlox)		A dense, evergreen, mound-forming perennial with thin, bright green leaves. Pale violet, salverform flowers are produced in late spring and early summer, with a notch in each petal. Good for rockeries. Plant in full sun, in well-drained, fertile soil. Mature height and spread: 10cm x 50cm. Hardiness: H6.
Phlox subulata 'McDaniel's Cushion' (Moss Phlox)	JOP	
Phlox subulata 'White Delight' (Moss Phlox)	JOP	
Phuopsis stylosa	JOP	
Physostegia virginiana 'Alba' (Synonym Physostegia virginiana 'White Queen')		A dense, spreading herbaceous perennial with toothed, mid-green leaves. Racemes of white flowers are produced from midsummer to early autumn and individual flowers will stay in position if moved, hence the name 'Obedient plant'. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 60-90cm x 60cm. Hardiness: H7.
Physostegia virginiana 'Vivid' (Obedient Plant)		A dense, spreading herbaceous perennial with toothed, mid-green leaves. Racemes of bright pink-purple flowers are produced from midsummer to early autumn and individual flowers will stay in position if moved, hence the name 'Obedient plant'. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Physostegia virginiana var. Speciosa 'Bouquet Rose' (Obedient Plant)		A dense, spreading herbaceous perennial with coarsely toothed, mid-green leaves. Racemes of pale lilac-pink flowers are produced from midsummer to early autumn and individual flowers will stay in position if moved, hence the name 'Obedient plant'. Plant in full sun or partial shade, in fertile, moist soil. Mature height and spread: 75-90cm x 50cm. Hardiness: H7.
Pimpinella major 'Rosea'		
Polemonium 'Lambrook Mauve'		A clump-forming herbaceous perennial with mounds of neat green leaves composed of leaflets. Branched stems bear lax clusters of bell-shaped, lilac-blue flowers in late spring and early summer. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 45cm x 45cm. Hardiness: H7.

Polemonium 'Northern Lights'		A mound-forming herbaceous perennial with green variegated leaves, formed of long, leaflets. Green stems bearing groups of pale blue flowers are produced from spring to mid summer. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 45cm x 30cm. Hardiness: H6.
Polemonium 'Purple Rain Strain'	JOP	
Polemonium 'Stairway to Heaven' PBR		A mound-forming herbaceous perennial with green and cream variegated leaves, formed of long, leaflets. Green stems bearing groups of pale blue flowers with yellow middles are produced in mid-late summer. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 40cm x 40cm. Hardiness: H6.
Polemonium caeruleum subsp. caeruleum f. album		A mound-forming herbaceous perennial with green leaves, formed of long, leaflets. Groups of white, bell-shaped flowers are produced in mid-late summer. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 75cm x 30cm. Hardiness: H7.
Polemonium yezoense 'Bressingham Purple'		A mound-forming herbaceous perennial with purple leaves, formed of long, leaflets. Purple stems bearing groups of bright blue flowers are produced in mid-late summer. Plant in full sun or partial shade, in any fertile, well-drained soil. Mature height and spread: 40cm x 40cm. Hardiness: H7.
Polygonatum biflorum	JOP	
Polygonatum curvistylum		
Polygonatum hookeri	Not currently in production	
Polygonatum odoratum f. pluriflorum 'Variegatum'	Not currently in production	

Polygonatum odoratum 'Red Stem'		
Polygonatum odoratum 'Silver Wings'	Not currently in production	
Polygonatum odoratum 'Striatum'?	Not currently in production	
Polygonatum sibiricum DJHC600		
Polygonatum verticillatum	Not currently in production	
Polygonatum x hybrida 'Striatum'	Not currently in production	
Polygonatum x hybridum (Solomon's Seal)		A rhizomatous herbaceous perennial with arching stems bearing oval, green leaves. Pendent, tubular, creamy white flowers with green tips hang along the branches and look stunning with water droplets on. Plant in full or partial shade, in fertile, moist, humus-rich soil. Mature height and spread: to 1.5m x 30cm. Hardiness: H7.
Polypodium vulgare		
Polystichum andersonii	Not currently in production	

Polystichum polyblepharum	Evergreen. Glossy fronds. H75cm	An evergreen fern bearing shuttlecocks of spreading, lance-shaped, 2-pinnate shiny dark green fronds which are covered in golden hairs when they unfurl. Fronds have toothed margins. Plant in deep or partial shade, in fertile, humus-rich, well-drained soil. Can tolerate drier soils when established. Mature height and spread: 60-80cm x 90cm. Hardiness: H7.
Polystichum setiferum AGM		An evergreen fern with soft, lance-shaped, 2-pinnate, dark green fronds produced in shuttlecocks. Fronds have leaflets which are bristle-toothed and stalked. Plant in deep or partial shade, in fertile, humus-rich, well-drained soil. Can tolerate drier soils when established. Mature height and spread: 1.2m x 90cm. Hardiness: H7.
Polystichum setiferum Plumosomultilobum Group	Not currently in production	
Potentilla 'Blazeaway'		A clump forming herbaceous perennial with green leaves, composed of leaflets. Clusters of single, bright orange-red flowers are produced in summer. Plant in full sun, in poor or moderate fertile, well-drained soil. Mature height and spread: 30-50cm x 50cm. Hardiness: H7.
Potentilla atrosanguinea var. agrophylla 'Scarlet Starlit'		
Potentilla nepalensis 'Miss Willmott'	Clusters of single, pink flowers with a darker eye, throughout summer. H40cm	A clump forming herbaceous perennial with mid-green leaves on red stems, composed of hairy leaflets. Clusters of single, cherry-pink flowers with darker centres are produced throughout summer. Plant in full sun, in poor or moderate fertile, well-drained soil. Mature height and spread: 40cm x 60cm. Hardiness: H7.
Potentilla thurberi 'Monarch's Velvet'	Deep red flowers. H50cm.	A clump forming herbaceous perennial with green leaves, composed of leaflets. Clusters of single, raspberry-red flowers with dark centres are produced in summer. Plant in full sun, in poor or moderate fertile, well-drained soil. Mature height and spread: 50cm x 60cm. Hardiness: H7.
Potentilla 'Volcan'		
Primula 'Snow Cushion'		

Primula 'Wanda'		An evergreen or semi-evergreen perennial with small, inversely lance-shaped to obovate, dark green leaves. Dark claret-red, salverform flowers are produced from winter to mid-spring. Plant in full sun or partial shade, in moderately fertile, moist, but well-drained soil. Mature height and spread: 8-10cm x 15cm. Hardiness: H4.
Primula auricula		A rosette-forming, evergreen perennial with obovate-spoon-shaped, pale green leaves. Salverform flowers are produced in spring. There are many varieties with colours including deep yellow, rusty red, purple, red. Plant in full sun or partial shade, in moderately fertile, moist, but well-drained soil. Can be grown in an alpine house. Mature height and spread: 20-25cm x 15cm. Hardiness: H5.
Primula beesiana		A rosette-forming herbaceous perennial with crinkled green leaves. Stems covered in mealy white bear whorls (clusters all round stem) of pale purple flowers with yellow/orange centres, arranged in 2 or more layers spaced out up the stem. Plant in partial shade, in deep, humus-rich, moist soil. Can tolerate full sun if soil is moist. Mature height and spread: 20-30cm x 60cm. Hardiness: H7.
Primula bulleyana		A rosette-forming, semi-evergreen perennial with ovate to ovate-lance shaped, mid green leaves. Stout stems produce groups of around 5 orange-yellow flowers, in clusters along the stem. Plant in partial shade, in deep, humus-rich, moist soil. Mature height and spread: 60cm x 60cm. Hardiness: H7.
Primula denticulata		A robust, rosette-forming, deciduous perennial with mid-green leaves that are finely toothed and white-mealy underneath. Stout stems bear spherical umbels of purple flower with yellow eyes from mid-spring to summer. Plant in full sun or partial shade, in moderately fertile, moist, but well-drained soil. Mature height and spread: 45cm x 45cm. Hardiness: H6.
Primula denticulata. White	JOP	
Primula elatior		
Primula 'Guinevere'		
Primula 'Hall Barn Blue'		

Primula japonica 'Miller's Crimson'	JOP	
Primula japonica 'Alba'	JOP	
Primula japonica 'Appleblossom'		A rosette-forming, herbaceous perennial with pale green, wrinkled green leaves. Stout stems hold 2-6 clusters of pale pink flowers along the stem from late spring to early summer. Ideally plant in full sun or partial shade, in humus-rich, moist soil. Approximate height and spread: 45-60cm x 60cm. Hardiness: H6.
Primula pulverulenta	JOP	
Primula veris (Cowslip)		A rosette-forming, evergreen or semi-evergreen perennial with oblong-ovate, mid-green leaves. Clusters of small salverform, nodding, deep yellow flowers are produced on short stems in mid and late spring. Plant in full sun or partial shade, in moderately fertile, moist, but well-drained soil. Mature height and spread: 25cm x 25cm. Hardiness: H5.
Primula vialii	JOP	
Primula vialii		
Primula vulgaris (Primrose)		A rosette-forming, evergreen or semi-evergreen perennial with inversely lance-shaped to obovate, veined, bright green leaves. Clusters of salverform, often fragrant, pale yellow flowers are produced from early to late spring. Plant in sun or partial shade, in humus-rich, moist soil. Mature height and spread: 20cm x 35cm. Hardiness: H7.
Primula vulgaris 'Francisca'	Not currently in production	

Primula vulgaris subsp. sibthorpii		
Pulmonaria 'Blue Ensign' (Lungwort)		A clump-forming, deciduous perennial with ovate, dark green leaves. Large funnel-shaped, blue-violet flowers are produced in spring. Plant in full or partial shade, in humus-rich, moist, but not water-logged soil. Mature height and spread: 35cm x 45cm. Hardiness: H6.
Pulmonaria 'Opal' (Lungwort)		A clump-forming, semi-evergreen perennial with ovate, dark green leaves heavily blotched with silver. Funnel-shaped, clear pale blue flowers that open from pink buds and fade to white are produced in spring. Plant in full or partial shade, in humus-rich, moist, but not water-logged soil. Mature height and spread: 35cm x 30-45cm. Hardiness: H6.
Pulmonaria rubra		
Pulmonaria 'Sissinghurst White' (Lungwort)		An open, clump-forming herbaceous perennial with hairy, ovate, mid-green leaves that are spotted with silver. Small, pure white, tubular flowers are produced from early to late spring. A perfect ground-cover plant for a shady spot. Plant in full or partial shade, in moist, but not waterlogged soil. Mature height and spread: 30cm x 45cm. Hardiness: H6.
Pulmonaria 'Diana Clare' (Lungwort) AGM		A dense, clump-forming semi-evergreen perennial with hairy pointed green leaves specked with silver when young, ageing to almost purely silver. Short stems bear violet-purple tubular flowers which age to dark blue are produced from late winter to late spring. A perfect ground-cover plant for a shady spot. Plant in partial or full shade, in moist, but not waterlogged soil. Approximate height and spread: 30cm x 45cm. Hardiness: H6, down to -20°C.
Pulmonaria longifolia (Lungwort)		A dense, clump-forming herbaceous perennial with narrow, hairy, dark green leaves with silvery white spots. Funnel-shaped blue-purple flowers are produced from late winter to spring. Plant in full or partial shade, in moist, but not waterlogged soil. Mature height and spread: 30cm x 45cm. Hardiness: H6.
Pulmonaria saccharata 'Dora Bielefield' (Lungwort)		A clump-forming, evergreen perennial with elliptic, mid-green leaves spotted with silver. Funnel-shaped, clear pink flowers that open from coral pink buds are produced from late winter to late spring. Plant in full or partial shade, in humus-rich, moist, but not water-logged soil. Mature height and spread: 30cm x 60cm. Hardiness: H6.

Rodgersia 'Bronze Peacock'	JOP	
Rodgersia 'Irish Bronze'	Not currently in production	
Rodgersia aesculifolia	Plumes of creamy white-pink flowers. Moist soil. H1.2-1.5m	
Roscoea x beesiana	Short stems topped with 2-lipped cream/white flowers. H30-40cm	
Rudbeckia fulgida var. deamii	JOP. Golden yellow daisies. Slightly later and taller than 'Goldsturm' H75cm.	
Rudbeckia fulgida var. Sullivantii 'Goldsturm'	Golden yellow daisies. Slightly earlier than R. deamii. H 60cm	An upright herbaceous perennial with oblong, pointed, toothed leaves. Large golden yellow flower heads are produced on tall stems in late-summer and autumn. Starts flowering slightly earlier than var. deamii and is more dense in habit. Plant in full sun or partial shade, in fertile soil that does not dry out. Mature height and spread: 60cm x 45cm. Hardiness: H6.
Rudbeckia lanciniata		
Rudbeckia subtomentosa 'Henry Eilers'		A clump-forming herbaceous perennial with hairy, lance to oval-shaped, toothed, green leaves that have a sweet scent when rubbed. Quill-like, narrow yellow flowers are produced from a central cone on sturdy stems from late summer to early autumn. Plant in full sun or partial shade, in fertile soil that does not dry out. Mature height and spread: 1.5m

Salvia (Perovskia) 'Blue Spire' AGM		A deciduous,upright sub-shrub with grey-white stems bearing deeply divided, silver-grey leaves. Tubular, violet-blue flowers are produced in panicles in profusion in late summer and early autumn. Plant in full sun, in any poor or moderately fertile, well-drained soil. Chalky, dry soils are tolerated. Mature height and spread: 1.2m x 1m. Hardiness: H5.
Salvia (Perovskia) 'Filigran'		A deciduous,upright sub-shrub with grey-white stems bearing very deeply divided, silver-grey leaves. Tubular, violet-blue flowers are produced in panicles in profusion in late summer and early autumn. Plant in full sun, in any poor or moderately fertile, well-drained soil. Chalky, dry soils are tolerated. Mature height and spread: 1.2m x 1m. Hardiness: H5.
Salvia (Perovskia) 'Little Spire' PBR		A deciduous, compact, upright sub-shrub with grey-white stems bearing ovate, cut, silver-grey leaves. Tubular, lavender-blue flowers are produced on long spikes in profusion in late summer and mid-autumn. Plant in full sun, in any poor or moderately fertile, well-drained soil. Chalky, dry soils are tolerated. Mature height and spread: 75cm x 50cm. Hardiness: H5.
Salvia 'Angel Wings'		
Salvia 'Blue Note'		
Salvia CHERRY LIPS ('Dysceri')	Cherry red-purple and white bi coloured flowers from summer to autumn. H90cm	
Salvia 'Clotted Cream'		
Salvia 'Clotted Cream'		
Salvia 'Courson Pink'		

Salvia 'Dyson's Joy'	JOP	
Salvia 'Javier'	JOP	
Salvia 'Javier'		
Salvia 'Mulberry Jam'		
Salvia 'Nachtvlinder' AGM		A bushy, woody, semi-evergreen perennial with small, pointed leaves. Racemes of very dark maroon-purple flowers are produced over a long period in summer and autumn. Leaves emit sulphur compounds which reduce blackspot on Roses. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Mature height and spread: 75cm x 50cm. Hardiness: H5.
Salvia 'Peach Cobbler'		
Salvia 'Penny's Smile'		
Salvia 'Phyllis Fancy'		
Salvia 'Royal Bumble'		A compact, bushy, woody semi-evergreen perennial with small, mid-green leaves. Long racemes of red flowers are produced in red-black stems. Protect from winter wet and cold winds. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 60cm x 40cm. Hardiness: H4.

Salvia 'Royal Velours'		
Salvia x jamensis 'Shell Dancer'	Two tone pink and peach. H 55cm	
Salvia 'Stormy Pink'		
Salvia 'Velvet Gem'		
Salvia AMETHSY LIPS PBR		
Salvia 'Amistad'		
Salvia atriplicifolia 'Taiga' (Syn. Perovskia atriplicifolia 'Taiga')		An upright, deciduous sub-shrub with finely divided, aromatic grey-green leaves. Spikes of small, tubular deep sky blue flowers are produced in late summer and autumn. This variety is more compact than others. Ideally plant in full sun, in any poor or moderately fertile, well-drained soil. Chalky, dry soils are tolerated. Mature height and spread: 60cm x 60cm. Hardiness: H5.
Salvia x jamensis BELLE DE LOIRE	Bicoloured flowers, earlier yellow and orange, later cream and salmon. H. 70cm	

Salvia 'Cerro Potosi'	JOP	
Salvia 'Dyson's Crimson'		A bushy, woody, semi-evergreen perennial with small, dark green leaves. Stems bearing spikes of large-lipped crimson flowers are produced over a long period in summer and autumn. Plant in full sun in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Chalk tolerant. Approximate mature height and spread: 80cm x 50cm. Hardiness: H4.
Salvia gregii 'Emperor'		A bushy, woody, semi-evergreen perennial with small, pointed leaves. Racemes of very dark maroon-purple flowers are produced over a long period in summer and autumn. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Shorter than 'Nachtvlinder'. Approximate mature height and spread: 60cm x 50cm. Hardiness: H4.
Salvia gregii 'Icing Sugar'	Not currently in production	A woody herbaceous perennial with small, mid-green leaves. Long racemes of deep pink flowers with white centres are produced in summer and autumn. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Mature height and spread: 40cm x 40cm. Hardiness: H4.
Salvia gregii 'Lipstick'	Not currently in production	A woody herbaceous perennial with small, mid-green leaves. Long racemes of pink-red flowers with white throats are produced in summer and autumn. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Mature height and spread: 60cm x 50cm. Hardiness: H4.
Salvia jamensis 'Lemon Light'		
Salvia lavandulifolia	Not currently in production	
Salvia 'Lemon Pie'		A bushy, woody, semi-evergreen perennial with small, pointed leaves. Stems bearing creamy yellow flowers are produced over a long period in summer and autumn. More compact than some varieties. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Chalk tolerant. Approximate mature height and spread: 60cm x 50cm. Hardiness: H4.

Salvia microphylla 'Blue Monrovia'		
Salvia microphylla 'Delice Aquamarine'		
Salvia nemorosa 'Caradonna'	JOP. Purple flower spikes. H 60cm	
Salvia nemorosa 'Ostfriesland' AGM		An erect, many-branched perennial with ovate, wrinkled mid-green leaves. Spikes of deep violet-blue flowers are produced from summer to autumn. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 45cm x 60cm. Hardiness: H7.
Salvia nemorosa 'Pink Beauty'		An erect, many-branched perennial with ovate, wrinkled mid-green leaves. Spikes of mauve-pink flowers are produced from summer to autumn. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 40cm x 60cm. Hardiness: H7.
Salvia nemorosa 'Schwellenburg'		
Salvia nemorosa 'Sensation Rose'	Pink flower spikes. H 45cm	
Salvia officinalis (Sage)	Purple/blue flowers if hot. H 80cm	A upright sub-shrubby herb with hairy grey-green, oblong-ovate, aromatic leaves. Lilac-blue flowers are produced in early and midsummer. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 80cm x 1m. Hardiness: H5. A purple leaved form is also available, Salvia officinalis 'Purpurascens'.
Salvia officinalis 'Berggarten' (Sage)	Larger, rounder leaved Sage. H 60cm	

Salvia officinalis 'Purpurascens' (Purple Sage)	Purple Sage. H60cm	
Salvia officinalis 'Purpureum'		
Salvia officinalis 'Tricolour' (Tricoloured Sage)		
Salvia officinalis 'Icterina' (Golden Sage)		
Salvia 'Pink Pong'		
Salvia pratensis 'Indigo'		
Salvia rosmarinus 'Capri' (Prostratus Group) (Rosemary. Formerly Rosmarinus)		A spreading, evergreen shrub with small, linear, aromatic, dark green leaves. Small, pale blue, lipped flowers are produced from mid-spring to early summer. Plant in full sun, in any well-drained poor or moderate soil. Mature height and spread: 15cm x 1m. Hardiness: H4.
Salvia rosmarinus 'Foxtail' (Rosemary. formerly Rosmarinus)		
Salvia rosmarinus 'Green Ginger' (Ginger Rosemary. Formerly Rosmarinus)		An upright, evergreen shrub with narrow dark gently green ginger scented leaves. Small light-blue, lipped flowers are produced from mid-spring to early summer. Plant in full sun, in any well-drained poor or moderate soil. Mature height and spread: 2m x 2m. Hardiness: H4.

Salvia rosmarinus 'Miss Jessop's Upright' (Rosemary. Formerly Rosmarinus)	Upright habit	An upright, evergreen shrubby herb with small, linear, aromatic, dark green leaves. Small, blue, lipped flowers are produced from mid-spring to early summer. Plant in full sun, in any well-drained poor or moderate soil. Avoid cold windy spots. Mature height and spread: 60-100cm x 80cm. Hardiness: H4.
Salvia rosmarinus Prostrata Group (Rosemary. Formerly Rosmarinus)	Not currently in production	
Salvia rosmarinus 'Whitewater Silver' (Rosemary. Formerly Rosmarinus)	Not currently in production	A spreading and prostrate evergreen shrub with small narrow dark green leaves with silver undersides. Small, pale blue, lipped flowers are produced from mid-spring to early summer. Plant in full sun, in any well-drained poor or moderate soil. Drought tolerant and good for chalk. Avoid cold windy spots. Mature height and spread: 15-30cm x 90cm. Hardiness: H4.
Salvia 'Trellisick'		
Salvia uliginosa (Bog Sage)	Not currently in production	
Salvia verticillata 'Purple Fairy Tale'	Not currently in production	
Salvia Walsingham White'		
Salvia x jamensis 'Hot Lips'		A bushy, woody perennial with small, pointed leaves. Racemes of bicoloured red and white flowers are produced in summer and autumn. Sometimes flowers are all white or all red. Plant in full sun or light shade, in moderately fertile, well-drained soil. Protect from winter wet and cold winds. Mature height and spread: 75cm x 50cm. Hardiness: H5.
Salvia x sylvestris 'Blauhugel'		A clump-forming, upright herbaceous perennial with pointed oval shaped, softly hairy mid-green leaves. Spikes of pure blue flowers are produced in early and midsummer. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 50cm x 45cm. Hardiness: H7.

Salvia x sylvestris 'Mainacht'		
Salvia x sylvestris 'Rose Queen'	Spikes of rose pink flowers throughout summer. H60cm	A clump-forming, upright herbaceous perennial with pointed oval shaped, softly hairy grey-green leaves. Spikes of rose-pink flowers are produced throughout summer. Plant in full sun or light shade, in moderately fertile, well-drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H7.
Salvia x sylvestris 'Schneehügel'		
Salvia x sylvestris 'Blaukonigin'		
Salvia x sylvestris 'Schneehugel'		
Sanguisorba 'Cangshan Cranberry' AGM (Burnet)		A tall, upright herbaceous perennial with divided, green leaves. Thin, sturdy stems are topped with short rounded spikes of burgundy-red flowers which bob in the breeze from late summer to autumn. Later flowering than many other Sanguisorba. Plant in full sun or partial shade, in any reasonable soil which doesn't dry out completely. Approximate height and spread: 2m x 60cm. Hardiness: H7, down to -20°C and below.
Sanguisorba 'Blackthorn'		
Sanguisorba menzesii	Not currently in production	A clump-forming herbaceous perennial with hairy, deeply cut feathery, blue-green leaves. Tall stems with bottle brush-like maroon-red flowers are produced throughout summer and autumn. Seedheads are attractive during winter. Plant in full sun or partial shade, in moderately fertile, well-drained soil that doesn't dry out. Mature height and spread: 75cm x 60cm. Hardiness: H7.

Sanguisorba obtusa		
Sanguisorba officinalis (Greater Burnet)		A clump-forming, herbaceous perennial with green leaves divided into leaflets. Red stems bear small red-brown to maroon flowers in dense spikes that are oval-shaped, from early summer to mid-autumn. Plant in full sun or partial shade, in any moderately fertile soil with some moisture, but not waterlogged in winter. Mature height and spread: 1.2m x 60cm. Hardiness: H7. 'Tanna' is a shorter variety, 50-60cm tall.
Sanguisorba officinalis 'Tanna' (Burnet)		
Sanguisorba 'Pink Tanna'		A clump-forming, herbaceous perennial with green leaves divided into leaflets. Thin stems bear pink bobbles which open to rounded spikes/bottlebrushes of pale pink flowers from midsummer to mid-autumn. Plant in full sun or partial shade, in any moderately fertile soil with some moisture, but not waterlogged in winter. Approximate height and spread: 60-80cm x 60cm. Hardiness: H7.
Sanguisorba tall white		
Sanguisorba tenuifolia var. alba		
Santolina etrusca		
Santolina rosmarinifolia subsp. Rosmarinifolia (synonym S. virens)		

Saxifraga x urbium (London Pride)		
Saxifraga x urbium 'Variegata' (Variegated London Pride)	Variegated, evergreen leaves. Clusters of tiny pink flowers in spring. H30cm	
Scabiosa 'Pink Mist'	Compact. Divided foliage, 'pincushion' domes of pink flowers atop stems. H40cm	
Scabiosa caucasica 'Clive Greaves'		
Scabiosa caucasica 'Miss Willmott'		A clump-forming perennial with lance-shaped grey-green basal leaves and stems bearing dissected leaves. Solitary, white flowerheads are produced in mid and late summer. Plant in full sun, in moderately fertile, well-drained, neutral to alkaline soil. Mature height and spread: 90cm x 60cm. Hardiness: H4.
Scabiosa caucasica 'Perfecta Blue'		A clump-forming perennial with lance-shaped grey-green basal leaves and stems bearing dissected leaves. Solitary, pastel blue flowerheads are produced in mid and late summer. Plant in full sun, in moderately fertile, well-drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 50cm x 60cm. Hardiness: H4.
Scabiosa 'Little Cracker'	'Pincushion' domes of creamy white flowers on thin stems. H.60cm	A mound-forming semi-evergreen herbaceous perennial with divided grey-green mature leaves. Thin stems bear domed heads of creamy white flowers from mid-summer onwards, for up to 4 months. Plant in full sun, in any reasonable well-drained soil which doesn't dry out completely in summer. Good for chalk. Approximate height and spread: 60cm x 50cm. Hardiness: H5.
Hylotelephium 'Ruby Glow' (Formerly Sedum)	Low, spreading red stems. Flat clusters of dark red flowers. H25cm.	A low-growing herbaceous perennial with spreading red stems with green-purple leaves. Clusters of star-shaped, dark red flowers are produced from summer into autumn. Plant in full sun, in moderately fertile, well drained soil. Grows well on chalky soils. Mature height and spread: 25cm x 45cm. Hardiness: H7.

Sedum spurium 'Dragon's Blood'	Mat-forming. Clusters of deep pink flowers. H10cm	A vigorous, mat-forming, evergreen perennial with branching red stems bearing purple-tinted green leaves. Star-shaped, deep pink flowers are produced in late summer. Plant in full sun, in well-drained, alkaline soil. Mature height and spread: 10cm x 60cm. H7.
Ligusticopsis wallichianum (Formerly Selinum wallichianum)	White umbels of flowers. H1.2m	
Selinium wallichianum		
Semiaquilegia 'Sugar Plum Fairy'		An erect perennial with divided, mid-green leaves held on long stalks. Loose panicles of bell-shaped, purple-pink flowers are produced in early summer. Plant in dappled or partial shade, in moderately fertile, moist, but well-drained soil. Mature height and spread: 40cm x 30cm. Hardiness: H5.
Semiaquilegia ecalcarata	Not currently in production	
Sempervivum		Mat-forming succulents which are available in a range of different colours, with fleshy leaves and sometimes cobweb-like hairs. Flower spikes are produced with star-shaped, white, yellow or red flowers. The main rosette will die after flowering, but be replaced by the offshoots produced. Plant in full sun, in poor or moderately fertile, very well-drained soil. Additional information: Mat-forming and spread 10cm x 30cm. Hardiness: H7.
Sempervivum 'Rubin'		An evergreen, rosette forming perennial with fleshy, succulent, burgundy-red leaves which are flushed with olive green in the centre. Spikes of pink star-shaped flowers may be produced in summer. The main rosette will die after flowering, but be replaced by the offshoots produced. Plant in full sun, in poor or moderately fertile, very well-drained soil. Additional information: Mat-forming and spread 15cm x 30cm. Hardiness: H5.
Sempervivum 'Silver Thaw'		
Sempervivum 'Standard Green'		

Sesleria autumnalis (Autumn Moor Grass) AGM	Spikes of white flowers. H50cm	An evergreen mounded grass with narrow yellowish-green leaves. Tall stems with slender spikes of creamy white flowers are produced in summer. Ideally plant in full sun or partial shade, in any reasonable soil that doesn't waterlog. Mature height and spread: 40-60cm x 50cm. Hardiness: H7.
Sidalcea 'Sussex Beauty'		
Silene chalcedonica (Maltese/Jerusalem Cross) (Formerly Lychnis chalcedonica)		An upright herbaceous perennial with mid-green, slightly hairy leaves. Domed clusters of single, bright scarlet/vermillion flowers are produced on tall stems from mid to late summer. Each petal has a notch at the end. Plant in full sun or partial shade, in any reasonable, well-drained soil which doesn't dry out completely in summer. Approximate height and spread: 60-90cm x 50-60cm. Hardiness: H7.
Silene chalcedonica Apricot (Maltese Cross) (formerly Lychnis chalcedonica)	Upright. Domed clusters of apricot flowers on tall stems. H 60-90cm	An upright herbaceous perennial with mid-green, slightly hairy leaves. Domed clusters of single, apricot flowers are produced on tall stems from mid to late summer. Each petal has a notch at the end. Plant in full sun or partial shade, in any reasonable, well-drained soil which doesn't dry out completely in summer. Approximate height and spread: 60-90cm x 50-60cm. Hardiness: H7.
Silene dioica (Red Campion)	JOP	
Silene flos-cuculi (Formerly Lychnis flos-cuculi. Ragged Robin)		A slender, branched herbaceous perennial with bright green, lance-shaped leaves. Pink flowers with finely divided petals are produced in loose clusters on top of tall stems in late spring and early summer. Will seed freely and is good for a wild garden. Ideally plant in full sun or partial shade, in any moist, boggy soil. Mature height and spread: 75cm x 80cm. Hardiness: H7.
Silene flos-cuculi JENNY (Formerly Lychnis)		
Silene fimbriata (Fringe flowered Campion)	Finely divided white petals. H 60cm	A herbaceous perennial with mid-green leaves and stems bearing clusters of single white flowers with finely divided, frilly petals and a puffy green calyx at the base. Great for dry shade. Plant in full sun, partial shade or full shade, in any well-drained soil. Spreads less in drier soils. Approximate height and spread: 70cm x 60cm. Hardiness: H5.

Sisyrinchium 'Janet Denman'		
Sisyrinchium striatum (Pale yellow-eyed Grass, Aunt May)	Clusters of pale yellow flowers up stems. Full sun. H90cm	A clump-forming, evergreen perennial with sword-like greyish green leaves. Pale yellow, cup-shaped flowers are produced in clusters along stems in early and midsummer. Seeds freely. Plant in full sun, in poor or moderate, very well-drained soil. Good for chalk and drought tolerant. Mature height and spread: to 90cm x 25cm. Hardiness: H4.
Sisyrinchium. Dwarf blue alpine type		
Sium sisarum		
Soleirolia soleirolii (Mind Your Own Business, Baby's Tears)		A carpeting evergreen herbaceous perennial with tiny green leaves which forms a dense mat of green. Very small pinkish white flowers can be produced in summer. Cold winters can cause it to die back to the ground. Grows best in damp places. Plant in partial shade, sheltered from hot sun, in any soil which holds some moisture. Approximate height and spread: 10cm x 60cm. Hardiness: H4. Drought tolerant: 100%
Solidago rugosa 'Loysder Crown'		
Sporobolus heterolepis		
Stachys byzantina (Lamb's Ear)		A mat-forming, woolly perennial with rosettes of thick, grey-green, softly hairy leaves. Woolly spikes of small, tubular, pink-purple flowers are produced from early summer to early autumn. The Wool Carder Bee collects the hairs of this plant to make it's nests! Plant in full sun, in moderately fertile, well-drained soil. Mature height and spread: 45cm x 60cm. Hardiness: H7.
Stachys byzantina 'Big Ears'		

Stachys byzantina 'Silver Carpet'		
Stipa gigantea	Oat-like golden flowers. H 2m	A densely tufted, evergreen or semi-evergreen grass with lax, mid-green leaves. Bristled, silvery, purplish green, spikelets, turning gold when ripe, in oat-like clusters, are produced in summer. Plant in full sun, in moderately fertile, well-drained soil. Mature height and spread: 2.5m x 1.2m. Hardiness: H4.
Stipa ichu AGM		A deciduous, clump-forming, perennial grass with fine, bright green leaves and arching feathery silver-white plumes In summer. Flowers will dry to white and foliage ages to a buff colour, staying on the plant all winter. Ideally plant in full sun, in moderately fertile, well-drained soil. Mature height and spread: 90cm x 30cm. Hardiness: H4.
Stipa pseudoichu	Not currently in production	
Stipa tenuissima (Mexican Feather Grass)	Fine leaves, fluffy fine green-white flower and buff seedheads. H60cm	A densely tufted deciduous grass with erect, fine, bright green leaves. Stems of nodding, green-white flowers and seedheads are produced turning buff. Will self-seed if happy. Plant in full sun, in moderately fertile, very well-drained soil. Good for chalk or sandy soils. Mature height and spread: 60cm x 30cm. Hardiness: H4.
Succisa pratensis		
Succisella inflexa		
Succisella inflexa 'Frosted Pearls'		A vigorous clump-forming herbaceous perennial with narrow green leaves. Small silver-blue bobble-like flowers are produced on top of branched stems in summer and early autumn. Gives a lovely airy effect. Ideally plant in full sun or partial shade, in any reasonably moist soil. Approximate height and spread: 80cm x 50cm. Hardiness: H6.
Symphyotrichum 'Little Carlow' (Formerly Aster)	Violet-blue flowers. H 90cm	A clump-forming herbaceous perennial with ovate to heart-shaped, toothed, dark green leaves. Loose panicles of violet-blue flowers with yellow centres are produced in early and mid-autumn. Plant in full sun or partial shade, in well-drained, moderately fertile soil. Mature height and spread: 90cm x 45cm. Hardiness: H7.

Symphyotrichum 'Coombe Fishacre' (Aster. Michaelmas Daisy) AGM		A clump-forming upright herbaceous perennial with slender, dark green stems and narrow dark green leaves. Airy clusters of pale pink daisy-like flowers with brownish yellow centres are produced from late summer to autumn. Plant in full sun, in any well-drained, moderately fertile soil. Mature height and spread: 90cm x 60cm. Hardiness: H7.
Symphyotrichum ericoides 'Pink Cloud' (Formerly Aster)		
Symphyotrichum ericoides var. Prostratum 'Snow Flurry' (Formerly Aster. Heath Aster)		A prostrate, spreading herbaceous perennial with small dark green leaves. Stiff branches bearing an abundance of tiny white flowers in late summer to autumn. Plant in full sun, in any well-drained, moderately fertile soil. Tolerates drier soils. Mature height and spread: 20cm x 60cm. Hardiness: H7, down to -20°C.
Symphyotrichum laeve 'Les Moutiers' (Formerly Aster)		A clump-forming herbaceous perennial with open, willowy, dark red stems and small, dark green leaves. Pale pink daisies are produced in late summer and autumn, fading to white, with bright yellow centres which age to red. Plant in full sun, in well-drained, moderately fertile soil. Mature height and spread: 1.5m x 90cm. Hardiness: H6.
Symphyotrichum lateriflorum 'Chloe' (Formerly Aster)		
Symphyotrichum lateriflorum var. Horizontale (Formerly Aster)		A clump-forming perennial with slender, spreading, hairy stems bearing small, oblong-lance-shaped, mid-green leaves. Corymbs of small, white, sometimes pink-tinged, flowers with brown centres, are produced from midsummer to mid-autumn. Plant in full sun or partial shade, in moist, well-drained, moderately fertile soil. Mature height and spread: 60cm x 30-45cm. Hardiness: H7.
Symphyotrichum novae-angliae 'Barr's Purple' (Formerly Aster)		
Symphyotrichum novae-angliae 'Harrington's Pink' (Formerly Aster)	Upright, pink flowers. H 1.2m	
Symphyotrichum novae-angliae 'Herbstschnee' (Formerly Aster)		A clump-forming herbaceous perennial with small, lance-shaped, mid-green leaves. Strong stems bear heads of large, daisy-like, white flowers, with yellow centres. Plant in full sun, in well-drained, moderately fertile soil. Mature height and spread: 1.2m x 60cm. Hardiness: H7.

Symphyotrichum novae-angliae 'Purple Dome' (Formerly Aster)		
Symphyotrichum novi-belgii 'Freda Ballard' (Formerly Aster)		A clump-forming herbaceous perennial with small, lance-shaped, mid-green leaves. Branched stems bear rich, rose-red, semi-double flowers with yellow centres, from late summer to mid-autumn. Plant in full sun, in well-drained, moderately fertile soil. Mature height and spread: 90cm x 90cm. Hardiness: H7.
Symphyotrichum novi-belgii 'Marie Ballard' (Formerly Aster. Michaelmas Daisy)		A clump-forming herbaceous perennial with green leaves. Tall stems bear clusters of double, soft blue-lilac flowers from late summer to mid-autumn. Plant in full sun, in well-drained, moderately fertile soil with some moisture in summer. Approximate height and spread: 90cm x 75cm. Hardiness: H6, down to -20°C.
Symphyotrichum novi-belgii 'White Wings' (Formerly Aster)		A clump-forming herbaceous perennial with small, lance-shaped, mid-green leaves. Branched stems bear shaggy white, daisy like flowers with yellow centres, from late summer to mid-autumn. Plant in full sun, in well-drained, moderately fertile soil. Mature height and spread: 90cm x 90cm. Hardiness: H7.
Symphyotrichum novi-belgii 'Winston Churchill' (Formerly Aster)		
Symphyotrichum novi-belgii 'Mary Spiller' (Formerly Aster)		An upright herbaceous perennial with dark green leaves and dark purple-red stems. Lilac-mauve flowers are produced on top of tall stems from late summer into autumn. Named after Mary Spiller, lecturer at Waterperry Gardens and the first female presenter of Gardeners' World. Plant in full sun, in well-drained, moderately fertile soil with some moisture in summer. Approximate height and spread: 1m x 75cm. Hardiness: H6, down to -20°C.
Symphyotrichum novi-belgii. 'Appleblossom' (Formerly Aster)		
Symphyotrichum 'Ringdove' (Formerly Aster)	Large clusters of tiny mauve-lavender flowers late summer. H 1m	

Symphytotrichum turbinellum AGM (Formerly Aster)		A clump-forming herbaceous perennial with slender dark green, almost black stems and lance-shaped, mid-green leaves. Airy panicles of pale violet daisy-like flowers are produced in early and mid-autumn. From dry prairies, open woods and ridges in the USA. - Plant in full sun or partial shade, in well-drained, moderately fertile soil. - Mature height and spread: 1.2m x 60cm. Hardiness: H7.
Symphytotrichum novae-angliae 'Helen Picton' AGM (Formerly Aster)	Deep purple daisy flowers with many petals. H.1m	A clump-forming herbaceous perennial with small, lance-shaped, mid-green leaves. Strong stems bear heads of large, daisy-like, rich purple flowers, with yellow to dark orange centres. Ideally plant in full sun, in moist, fertile soil. Mature height and spread: 1m x 60cm. Hardiness: H7.
Symphytum 'Hidcote Blue'		
Symphytum 'Hidcote Pink'		
Symphytum x uplandicum 'Moorland Heather'		
Symphytum x uplandicum 'Variegatum' or x uplandicum 'Axminster Gold' or 'Denford Variegated', 'Hidcote Variegated', 'Goldsmith'-from Zelda		
Synthyris missurica subsp. stellata	Not currently in production	A clump-forming herbaceous perennial with rounded, heart-shaped, leathery, hairy dark green leaves. Racemes of bell-shaped violet-blue flowers are produced from early spring to summer. Plant in partial or deep shade, in fertile, moist but well-drained, humus-rich soil. Mature height and spread: 15cm x 25cm. Hardiness: H5.
Tellima grandiflora		A rosette-forming perennial with hairy, lobed, heart-shaped green leaves. Spikes of greenish white flowers which age to pink are produced from late spring to midsummer. Good for shade groundcover. Plant in partial shade, in moist soil, although will tolerate dry soil and full sun. Mature height and spread: to 80cm x 30cm. Hardiness: H6.

Tellima grandiflora 'Forest Frost'	Not currently in production	A rosette-forming perennial with hairy, lobed, heart-shaped green leaves that are overlaid with silver and age to bronze. Spikes of small white or greenish white flowers are produced from late spring to midsummer. Plant in partial shade, in moist soil, although will tolerate dry soil and full sun. Mature height and spread: to 80cm x 30cm. Hardiness: H6.
Teucrium x lucidrys (Syn. T. chamaedrys) Germander		A low-growing, woody-based evergreen perennial with small, toothed, aromatic, dark green leaves. Spikes bearing clusters of rose pink flowers are produced in mid to late summer. Ideally plant in full sun, in any well-drained, alkaline soil. Mature height and spread: 30cm x 50cm. Hardiness: H4.
Thalictrum 'Black Stockings' (Meadow Rue)	Purple/black stems. Bright purple flowers. H1.8m	An erect, clump-forming herbaceous perennial with black-purple stems bearing green leaves made up of leaflets. Panicles of lavender-purple flowers are produced in early and midsummer. Plant in partial shade, in preferably moist, humus-rich soil. Mature height and spread: 2m x 50cm. Hardiness: H7.
Thalictrum 'Elin' AGM		
Thalictrum 'Splendide'		An erect, clump-forming herbaceous perennial with slender stems bearing green leaves made up mounds of rounded, lobed leaflets. Clusters of cup-shaped, lilac flowers are produced on long stems from midsummer to early autumn. Plant in partial shade, in preferably moist, humus-rich soil. Mature height and spread: 1.5m x 90cm. Hardiness: H7.
Thalictrum aquilegiifolium 'Thundercloud'	Not currently in production	An erect, clump-forming herbaceous perennial with green-glaucous leaves made up mounds of rounded, wavy-edged leaflets. Clusters of fluffy, dark purple flowers are produced on long stems summer. Plant in partial shade, in preferably moist, humus-rich soil. Grows well in cool, damp British summers! Mature height and spread: 1m x 45cm. Hardiness: H5.
Thalictrum aquilegiifolium 'Purpureum'		
Thalictrum delavayi 'Album'	Bright green leaves. Clusters of white flowers. H1.2m	An erect, clump-forming herbaceous perennial with bright green, finely divided leaves. Clusters of fluffy, long-stalked, white flowers are produced on long stems from midsummer to early autumn. Smaller than some other Thalictrum. Plant in partial shade, in preferably moist, humus-rich soil. Mature height and spread: 1.2m x 60cm. Hardiness: H7.
Thalictrum delavayi 'Hewitt's Double'		

Thalictrum Splendide White ('Fiwhite') PBR	Clusters of white flowers. H1.7m	Lacey, bright green leaves. White flowers
Thermopsis lanceolata		
Thymus 'Doone Valley'		A matforming sub-shrub with small, lance-shaped, dark olive green leaves with yellow spots, which are lemon scented. Lavender-pink flowers, opening from red heads, are produced in rounded heads in summer. Loved by bees. Plant in full sun, in well-drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 12cm x 35cm. Hardiness: H5.
Thymus 'Jekka'		
Thymus 'Silver Posie'	Not currently in production	A bushy sub-shrub with elliptic, finely hairy, scented, grey-green leaves with white margins. Heads of lilac-pink flowers are produced in late spring and early summer. Loved by bees. Plant in full sun, in well-drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 30cm x 40cm. Hardiness: H5.
Thymus Coccineus Group (T. serpyllum coccineus)		
Thymus polytrichum subsp. britannicus (Woolly Thyme)		
Thymus pulegioides (Broad-leaved Thyme)	Broadleaf creeping Thyme. Evergreen glossy leaves, pink flowers. H to 25cm	A spreading sub-shrub with semi-erect stems bearing small, rounded, dark green, very aromatic leaves. Racemes of pink-purple flowers are produced from late spring to late summer. Loved by bees. Ideally plant in full sun, in well-drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 5-25cm x 40cm. Hardiness: H5.
Thymus pulegioides 'Foxley'		

Thymus 'Snowdrift'	Not currently in production	
Thymus vulgaris (Common Thyme)		
Tiarella 'Pink Bouquet'		A mound forming, evergreen perennial with vine shaped, deeply cut leaves which start bronze when young and turn dark green with maroon centres. Spikes of pale pink flowers that age to white are produced in spring and summer. Plant in full or partial shade, in moist, but well-drained soil. Mature height and spread: 30cm x 35cm. Hardiness: H7.
Tiarella 'Sugar and Spice' PBR	Not currently in production	A mound forming, evergreen perennial with dark green, vine shaped, deeply cut leaves with dark red centres. Spikes of pale pink flowers that age to white are produced in spring and early summer. Plant in full or partial shade, in moist, but well-drained soil. Mature height and spread: 35cm x 35cm. Hardiness: H7.
Tiarella cordifolia AGM		A vigorous, rhizomatous, spreading perennial with lobed, hairy, pale green leaves which are bronze-red tinted in autumn. Spikes of small, creamy white flowers are produced in summer. Plant in full or partial shade, in moist, but well-drained soil. Will grow in drier soils too. Mature height and spread: 20cm x 30cm. Hardiness: H5.
Tricyrtis formanosa 'Gilt Edge'	Not currently in production	
Tricyrtis hirta (Toad Lily)		A clump-forming herbaceous perennial with hairy stems and pale green, often heart-shaped leaves. Upright, purple-spotted white flowers are produced singly or in clusters from midsummer to autumn, starting funnel-shaped and then opening out. Plant in partial or deep shade, in humus-rich, moist but well-drained soil. Mature height and spread: 80cm x 60cm. Hardiness: H7.
Tricyrtis hirta 'Albomarginata'		
Tricyrtis hirta 'Miyazaki'		

Tricytris 'White Towers'		
Trollius chinensis 'Golden Queen'		A clump-forming, herbaceous perennial with 5-lobed, sharply toothed, dark-green basal leaves. Stout stems with small leaves produce orange-yellow, bowl-shaped leaves in midsummer which are held well above foliage. Plant in full sun or partial shade, in moist, deep, fertile soil which does not dry out. Mature height and spread: 60cm x 45cm. Hardiness: H7.
Trollius cultorum 'Alabaster'		
Trollius x cultorum 'New Moon'		A clump-forming herbaceous perennial with glossy, mid-green, divided leaves. Bowl-shaped, double, creamy-yellow flowers are produced on stems in late spring and early summer. Plant in full sun or partial shade, in moist, deep, fertile soil which does not dry out. Mature height and spread: 55cm x 35cm. Hardiness: H7.
Tulips from Matt		
Umbilicus oppositifolium		
Uvularia grandiflora	Not currently in production	
Uvularia grandiflora 'Pallida'	Not currently in production	
Valeriana officinalis		

Verbascum 'Cotswold Beauty'		A semi-evergreen perennial with rosettes of large dark green leaves. Spikes of pink-buff coloured flowers with purple centres are produced from early to late summer. Plant in full sun, in poor, alkaline, well-drained soils. Good for chalk and drought tolerant. Mature height and spread: 1.2m x 30cm. Hardiness: H6.
Verbascum 'Pink Domino'		A semi-evergreen perennial with rosettes of large purple-green leaves. Spikes of deep rose-pink flowers are produced from early to late summer. Plant in full sun, in poor, alkaline, well-drained soils. Good for chalk and drought tolerant. Mature height and spread: 1.2m x 30cm. Hardiness: H6.
Verbascum chaixii 'Album'		A rosette-forming, semi-evergreen perennial with long stalked, grey-hairy mid-green basal leaves and short stalked, more rounded leaves along the flower stem. White, saucer-shaped flowers with mauve centres are produced along the flower stem from mid to late summer. Plant in full sun, in poor, alkaline, well-drained soils. Good for chalk and drought tolerant. Mature height and spread: 1.2m x 45cm. Hardiness: H6.
Verbascum phoeniceum 'Rosetta'		A rosette forming biennial or short-lived perennial with ovate, veined, dark green basal leaves. Spikes of saucer-shaped, cherry-pink flowers are produced in late spring and early summer. Plant in full sun, in poor, alkaline, well-drained soils. Good for chalk and drought tolerant. Mature height and spread: to 1.2m x 45cm. Hardiness: H6.
Verbascum phoeniceum 'Violetta'		A rosette forming biennial or short-lived perennial with ovate, veined, dark green basal leaves. Spikes of saucer-shaped, deep violet-purple flowers are produced in late spring and early summer. Plant in full sun, in poor, alkaline, well-drained soils. Good for chalk and drought tolerant. Mature height and spread: to 1.2m x 45cm. Hardiness: H6.
Verbena 'Triffids Purple Haze'		
Verbena bonariensis	Tall stems, clusters of bright purple flowers. Full sun. H.1.8-2m.	A tall, upright herbaceous perennial with narrow, oblong, rough leaves at the base. Spikes of flat heads of bright lilac-purple flowers are produced throughout summer. Plant in full sun, in moist, but well-drained soil. Will self-seed freely in gravelly soil. Mature height and spread: 2m x 45cm. Hardiness: H4.
Verbena bonariensis 'Lollipop' PBR		
Verbena hastata 'Pink Spires'		An upright, clump-forming perennial with pointed, toothed green-purple leaves and purple stems. Panicles of small, pink flowers are produced from early summer to early autumn. Plant in full sun, in moist, but well-drained soil. Will self-seed freely in gravelly soil. Mature height and spread: to 1.5m x 60cm. Hardiness: H4.

Verbena hastata 'White Spires'		An upright, clump-forming perennial with pointed, toothed green leaves. Panicles of small, white flowers are produced from early summer to early autumn. Plant in full sun, in moist, but well-drained soil. Will self-seed freely in gravelly soil. Mature height and spread: to 1.5m x 60cm. Hardiness: H4.
Verbena hastata f. rosea		
Verbena macdougalii 'Lavender Spires'	Tall, similar to V bonariensis, but with branched spikes of lavender flowers. H1.6m	A tall, upright, clump-forming perennial with lance-shaped, serrated, green leaves. Branching spikes of deep lavender coloured flowers are produced from midsummer to autumn. Plant in full sun, in well-drained soil. Mature height and spread: 1.6m x 60cm. Hardiness: H4.
Verbena officinalis 'Bampton'	Spikes of purplish pink flowers, purple leaves. H.50-80cm	
Vernonia arkansana (Arkansas Ironweed)		
Vernonia lettermannii		
Veronica gentianoides		
Veronica longifolia 'Blauriesin'		

Veronica prostrata		
Veronica 'Shirley Blue'		
Veronica spicata 'Alba'	Spikes of tiny pure white flowers from early to late summer. H.45-60cm	A clump-forming herbaceous perennial with oblong to lance-shaped greyish-green leaves. Spikes of tiny white, star-shaped flowers are produced from early to late summer. Ideally plant in full sun or partial shade, in moist, but well drained soil. Mature height and spread: 45-60cm x 45cm. Hardiness: H4.
Veronica spicata 'Rotfuchs' (Spiked Speedwell) (Synonym Veronica spicata 'Red Fox)		A clump-forming herbaceous perennial with narrow green leaves. Spikes of tiny deep pink, star-shaped flowers are produced from early to late summer. Plant in full sun or partial shade, in any reasonable well drained soil. Approximate height and spread: 30-35cm x 30cm. Hardiness: H4.
Veronicastrum virginicum		An upright herbaceous perennial with long, pointed leaves. Tall spikes of pinkish white or blueish purple flowers are produced from midsummer. Plant in full sun, in humus-rich, moist soil. Mature height and spread: 2m x 45cm. Hardiness: H7.
Veronicastrum virginicum 'Diane' (Culver's Root)	Spikes of white flowers. H150cm	An upright herbaceous perennial with long, pointed leaves. Tall spikes of tiny white flowers are produced from midsummer to autumn. Seedheads are architectural when left over winter. Plant in full sun, in humus-rich, moist soil which doesn't dry out completely in summer. Approximate height and spread: 150cm x 45cm. Hardiness: H7.
Veronicastrum virginicum 'Fascination'	Spikes of lavender flowers. H1.5m	An upright herbaceous perennial with long, pointed leaves. Tall spikes of lavender coloured flowers are produced from midsummer. Plant in full sun, in humus-rich, moist soil. Mature height and spread: 1.2-1.5m x 45cm. Hardiness: H7.
Veronicastrum virginicum 'Album'		

Veronicastrum virginicum f. roseum 'Pink Glow'	Spikes of pale pink flowers. H1.2m	An upright herbaceous perennial with long, pointed leaves. Tall spikes of pale pink flowers are produced from midsummer. Plant in full sun, in humus-rich, moist soil. Mature height and spread: 1.2m x 50cm. Hardiness: H7.
Veronicastrum virginicum 'Lavendelturm'	Lavender flower spikes. Earlier than others. H 1.5m	
Veronicastrum virginicum 'Erica'		
Vinca difformis		
Vinca difformis 'Jenny Pym'		
Vinca major		
Vinca minor		
Vinca minor 'Atropurpurea'		A ground cover, sub-shrub with glossy, dark green leaves. Dark purple-plum flowers are produced in spring. Good for ground cover. Plant in dappled or full shade, in moist well-drained soil. Mature height and spread: 10-20cm x indeterminate spread. Hardiness: H6.
Vinca minor 'Azurea Flore Pleno'		A ground cover, sub-shrub with glossy, dark green leaves. Double, blue-purple flowers are produced in spring. Good for ground cover. Plant in dappled or full shade, in moist well-drained soil. Mature height and spread: 10-20cm x indeterminate spread. Hardiness: H6.

Vinca minor 'Gertrude Jekyll'		A compact ground cover, sub-shrub with glossy, dark green leaves. White flowers are produced in spring. Good for ground cover. Plant in dappled or full shade, in moist well-drained soil. Mature height and spread: 10-20cm x indeterminate spread. Hardiness: H6.
Vinca minor 'Ralph Shugert'		A ground cover, sub-shrub with glossy, dark green leaves with cream/white edges. Periwinkle blue flowers are produced in spring. Plant in dappled or full shade, in moist well-drained soil. Mature height and spread: 10-20cm x indeterminate spread. Hardiness: H6.
Vinca minor f. alba		A compact ground cover, sub-shrub with glossy, dark green leaves. White flowers are produced from spring to autumn. Plant in dappled or full shade, in moist well-drained soil. Will grow in dry shade. Mature height and spread: 10-20cm x indeterminate spread. Hardiness: H6.
Viola 'Belmont Blue' (syn. Boughton Blue)		
Viola cornuta Alba Group	Spreading. White flowers. H15cm	A spreading evergreen perennial with narrow green leaves. White flowers with long spur or 'horn' are produced from early summer to autumn. They come from grassland in the Pyrenees. Ideally plant in partial shade, in most soils, except waterlogged. Approximate mature height and spread: 15cm x 40cm. Hardiness: H5, down to -15°C.
Viola riviniana Purpurea Group		
Zizia aptera		

<u>Annuals/ Biennials</u>	Label description+nursery	
---------------------------	---------------------------	--

	notes	
Ammi majus		A hardy annual with pinnate, light green leaves, divided into finely toothed leaflets. Umbels of white flowers, like delicate lacework, are produced in summer. Plant in sun or partial shade, in any moist, but well-drained soil. Mature height and spread: 80cm x 30cm. Hardiness: H6.
Antirrhinum majus 'Appleblossom' (Snapdragon)		A branched half-hardy annual/short-lived perennial with a woody base and bright green leaves. Upright stems of 2 lipped flowers in shades of white, pink and soft peach are produced over a long period from early summer to autumn. Ideally plant in full sun, in any well-drained soil. Mature height and spread: up to 90cm x 45cm. Hardiness: H2.
Antirrhinum majus 'Black Prince' (Snapdragon)		A branched half-hardy annual/short-lived perennial with a woody base and deep red leaves. Upright stems of 2 lipped burgundy flowers are produced over a long period from early summer to autumn. Ideally plant in full sun, in any well-drained soil. Mature height and spread: up to 45cm x 45cm. Hardiness: H2.
Antirrhinum majus 'Canary Bird' (Snapdragon)		Canary Yellow
Antirrhinum majus 'The Rose'		Pink with white throat to the flower
Borago officinalis (Borage)		A robust, branching hardy annual with bristly leaves. Cymes of 5-petalled, star-shaped clear blue flowers are produced freely throughout summer. Plant in full sun or partial shade, in any reasonably drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H5.
Borago officinalis f. alba (White Borage)		A robust, branching hardy annual with bristly leaves. Cymes of 5-petalled, star-shaped white flowers are produced freely throughout summer. Plant in full sun or partial shade, in any reasonably drained soil. Mature height and spread: 60cm x 45cm. Hardiness: H5.
Bupleurum rotundifolium 'Griffithii'		A bushy, hardy annual or short-lived perennial with glaucous, mid-green leaves that clasp around the stem and are slightly pink-flushed when young. Umbels of yellowish green bracts surrounding tiny yellow flowers are produced in summer. Plant in full sun, in any well-drained soil. Mature height and spread: 45-60cm x 30cm. Hardiness: H5.
Calendula 'Indian Prince'		Deep orange with red edges to petals
Calendula officinalis 'Snow Princess'		Pale yellow
Centaurea cyanus (Cornflower)		Wild blue cornflower
Centaurea cyanus 'Black Ball' (Cornflower)		An upright annual with narrow, lance-shaped, green leaves. Long stalks topped with dark maroon, thistle-like flowers are produced in late spring and summer. Ideally plant in full sun, in well-drained soil. Mature height and spread: 75cm x 20cm. Hardiness: H6.
Centaurea cyanus 'Classic Romantic' (Cornflower)		An upright annual with narrow, lance-shaped, green leaves. Long stalks topped with thistle-like flowers in shades of pink, white and rose-red are produced in late spring and summer. Ideally plant in full sun, in well-drained soil. Mature height and spread: 90cm x 20cm. Hardiness: H6.
Cerinthe major var. purpurascens		An erect annual with obovate-spoon-shaped grey-green leaves that are white spotted. In spring and summer, tubular purple flowers are produced, surrounded by purple bracts. Loved by bees in spring. May need some protection in harsh winters. Plant in sun or partial shade, in poor, well-drained soil. Good for chalk. Mature height and spread: to 60cm x 30cm. Hardiness: H3.
Cosmos 'Fizzy Rose Picotee'		Pink and white

Cosmos 'Purity'		A erect, branching annual with frothy, fine green foliage. Single, saucer shaped white flowers are produced in abundance from midsummer to the first frosts. Plant in full sun, in any moist, well-drained soil. Mature height and spread: 1.2m x 75cm. Hardiness: H3.
Cosmos 'Sonata Pink'		Pink
Cosmos 'Xanthos'		A erect, branching annual with frothy, fine green foliage. Single, saucer shaped lemon-yellow flowers which fade to white at the edges, are produced in abundance from midsummer to the first frosts. Plant in full sun, in any moist, well-drained soil. Mature height and spread: 60cm x 75cm. Hardiness: H3.
Cosmos bipinnatus 'Antiquity'		A erect, branching annual with frothy, fine green foliage. Single, saucer shaped burgundy-red flowers which age to bronze-salmon pink are produced in abundance from midsummer to the first frosts. Plant in full sun, in any moist, well-drained soil. Mature height and spread: 40m x 45cm. Hardiness: H3.
Cosmos bipinnatus 'Apricotta'		Apricot
Cosmos bipinnatus 'Dazzler'		A erect, branching annual with frothy, fine green foliage. Single, saucer shaped carmine-pink flowers are produced in abundance from midsummer to the first frosts. Plant in full sun, in any moist, well-drained soil. Mature height and spread: 1m x 75cm. Hardiness: H3.
Cosmos bipinnatus 'Rubenza' AGM		A erect, branching annual with frothy, fine green foliage. Single, saucer shaped deep red, velvety flowers which age to pink, are produced in abundance from midsummer to the first frosts. Plant in full sun, in any moist, well-drained soil. Mature height and spread: 75cm x 50cm. Hardiness: H3.
Cosmos 'Cupcakes White'		White, cupped flowers with frilly edges
Cynoglossum amabile AGM		An upright, bushy annual or biennial with grey-green obovate to lance-shaped, hairy leaves. Cymes of sky blue forget-me-not type flowers are produced in late summer. Plant in full sun or partial shade, in moderately fertile, well-drained soil. Mature height and spread: 50cm x 30cm. Hardiness: H5.
Daucus carota		A hardy biennial with feathery, green leaves. Umbels of white flowers with tiny purple spots in the centres, are produced atop tall stems. This has attractive seedheads and is a great cut flower. Plant in full sun, in any well-drained soil. Mature height and spread: 90cm x 40cm. Hardiness: H4.
Daucus carota 'Dara'		A hardy biennial with feathery, green leaves. Umbels of white flowers, that age to pink, then burgundy, are produced atop tall stems. This has attractive seedheads and is a great cut flower. Plant in full sun, in any well-drained soil. Mature height and spread: 1.2m x 40cm. Hardiness: H4.
Dianthus Barbatus (Sweet William) 'Auricula Eyed Mix'		A bushy, short lived perennial/biennial with light green or green and red tinged, lance shaped leaves. Clusters of fragrant, single flowers in a mixture of pale pink, dark pink, red and white are produced on long stems in late spring and early summer. Very good for cutting. Plant in full sun, in well drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 45cm x 30cm. Hardiness: H7.
Dianthus barbatus (Sweet William) 'Crown Double Mixed'		A bushy, short lived perennial/biennial with light green or green and red tinged, lance shaped leaves. Clusters of fragrant, double flowers in a mixture of pale pink, dark pink, red and white are produced on long stems in late spring and early summer. Very good for cutting. Plant in full sun, in well drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Dianthus barbatus 'Albus'		A bushy, short lived perennial/biennial with green, lance shaped leaves. Clusters of fragrant, white flowers are produced on long stems in late spring and early summer. Very good for cutting. Plant in full sun, in well drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 50cm x 30cm. Hardiness: H7.
Dianthus barbatus 'Scarlet Beauty'		A bushy, short lived perennial/biennial with green and red tinged, lance shaped leaves. Clusters of fragrant, scarlet flowers are produced on long stems in late spring and early summer. Very good for cutting. Plant in

		full sun, in well drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 60cm x 30cm. Hardiness: H7.
Dianthus barbatus 'Sooty'		A bushy, short lived perennial/biennial with dark green lance shaped leaves, ageing to bronze-purple. Clusters of fragrant, maroon-black are produced on long stems in late spring and early summer. Very good for cutting. Plant in full sun, in well drained, neutral to alkaline soil. Good for chalk. Mature height and spread: 40cm x 30cm. Hardiness: H7.
Erysimum cheiri 'Ivory White'		
Erysimum cheiri 'Ruby Gem'		
Erysimum cheiri 'Scarlet Bedder'		
Gypsophila elegans 'Covent Garden' (Baby's Breath)		A branching annual with small, lance-shaped grey-green leaves. Frothy, loose clusters of small, star-shaped white flowers are produced from mid to late summer. Good as cut flowers. Ideally plant in full sun, in well-drained alkaline soil. Good for chalk. Mature height and spread: 50cm x 30cm. Hardiness: H5.
Gypsophila elegans 'Kermesina' (Baby's Breath)		A branching annual with small, lance-shaped grey-green leaves. Frothy, loose clusters of small, star-shaped, dark pink flowers are produced from mid to late summer. Good as cut flowers. Ideally plant in full sun, in well-drained alkaline soil. Good for chalk. Mature height and spread: 50-60cm x 30cm. Hardiness: H5.
Hesperis matronalis. White (Sweet Rocket)		A rosette-forming biennial or short lived perennial with hairy, dark green leaves. Clusters of white, four-petalled flowers are produced from spring to midsummer. Loved by insects. Plant in sun or partial shade, in fertile, moist, but well-drained soil. Good for chalky, alkaline soils. Mature height and spread: 90cm x 45cm. Hardiness: H6.
Lathyrus odoratus (Sweet Pea) 'Royal Navy Blue'		A climbing hardy annual with pairs of ovate-elliptic mid-green leaves. Racemes of 2-4, scented, navy blue flowers are produced on long stems from summer to early autumn. Plant in full sun, in humus-rich, fertile, well-drained soil. Mature height: to 2.4m. Hardiness: H3. Can be planted in a sheltered spot in autumn, or kept under glass.
Lathyrus odoratus (Sweet Pea) 'Winston Churchill'		Red
Lathyrus odoratus 'Cupani'		A climbing hardy annual with pairs of ovate-elliptic mid-green leaves. The original sweet pea, introduced by monk Francis Cupani in 1699. Racemes of 2, scented, purple-blue and maroon bi-coloured flowers are produced on long stems from summer to early autumn. Plant in full sun, in humus-rich, fertile, well-drained soil. Mature height: to 1.8m. Hardiness: H4. Can be planted in autumn, or kept under glass.
Lathyrus odoratus 'Dorothy-Eckford'		A climbing hardy annual with pairs of ovate-elliptic mid-green leaves. Racemes of 3, scented, pure white flowers are produced on long stems from summer to early autumn. Plant in full sun, in humus-rich, fertile, well-drained soil. Mature height: to 2.4m. Hardiness: H3. Can be planted in a sheltered spot in autumn, or kept under glass.
Lathyrus odoratus 'Royal Crimson'		A climbing hardy annual with pairs of ovate-elliptic mid-green leaves. Racemes of 2-4, scented, crimson flowers are produced on long stems from summer to early autumn. Plant in full sun, in humus-rich, fertile, well-drained soil. Mature height: to 2.4m. Hardiness: H3. Can be planted in a sheltered spot in autumn, or kept under glass.

Lathyrus odoratus Mixed. (Sweet Pea)		
Lunaria annua (Honesty)		An annual or biennial with toothed, heart-shaped green leaves. Open clusters of purple flowers are produced on stems in late spring and summer. The flat seed pods are translucent and good for dried flower arrangements. Ideally plant in full sun or partial shade, in moist, but well-drained soil. Mature height and spread: up to 90cm x 30cm. Hardiness: H6.
Lunaria annua 'Chedglow'		
Lunaria annua 'Corfu Blue'		
Myosotis alpestris. White (Forget-Me-Not)		A clump-forming, biennial or short lived perennial with oblong-lance-shaped, bright green leaves. Dense cymes of small white flowers are produced from spring to early summer. Will seed readily. Plant in full sun or partial shade, in any moderate, well-drained soil. Mature height and spread: 20cm x 15cm. Hardiness: H6.
Nicotiana langsdorfii AGM		A well-branched annual with a rosette of mid-green basal leaves. Nodding, tubular, apple-green flowers are produced throughout summer. Plant in full sun or partial shade, in moist, but well drained soil. Mature height and spread: to 1.5m x 35cm. Hardiness: H2.
Nigella damascena 'Miss Jekyll' (Love-in-a-mist)	JOP	Blue flowered
Nigella damascena 'Albion Black Pod' (Love-in-a-mist)		White flowers with purple seedpods
Nigella damascena 'Miss Jekyll Rose'		Pink flowered
Nigella damascena 'Mulberry Rose' (Love-in-a-mist)		An annual with finely divided, feathery, bright green leaves. Creamy pink flowers that age to rose pink, with a ruff of fine foliage around them, are produced in summer. Plant in full sun, in any well-drained soil. Mature height and spread: to 45cm x 25cm. Hardiness: H3.
Orlaya grandiflora		A hardy annual with pinnate, light green leaves. Flat umbels of white flowers, with inner petals being small and outers being larger, are produced from summer to early autumn. Plant in full sun, in any well-drained soil. Mature height and spread: 50cm-1m x 50cm. Hardiness: H7.
Scabiosa stellata 'Ping Pong'		
Sweet Pea 'Beaujolais'		Maroon
Sweet Pea 'Jilly'		White
Sweet Pea 'Mrs Bernard Jones'		Pink
Sweet Pea 'Oxford Blue'		Blue
Tagetes patula 'Burning Embers'		Red with orange outline to petals
Tithonia rotundifolia 'Torch'		Orange
Visnaga daucoides (Ammi visnaga) 'Green Mist'		An upright hardy annual with feathery, light green leaves. Umbels of flowers that start lime-green and open to white, are produced in summer. Plant in full sun or partial shade, in any moist, but well-drained soil. Mature height and spread: 1.2m x 50cm. Hardiness: H6.

<u>Shrubs, Climbers, Trees and Hedging plants</u>	Label description+nursery notes	Most of our shrubs and climbers are sold in 2, 3 or 5 litre pots.	Bare root hedging available during winter months
Abelia 'Edward Goucher'			
Abelia x grandiflora		An evergreen or semi-evergreen shrub with arching branches with small, glossy green leaves. White flowers, flushed with pink are produced from mid-summer to autumn. Ideally plant in full sun, in well drained soil, in a spot that is sheltered from cold winds. Mature height and spread: 3m x 4m. Hardiness: H5.	
Abelia x grandiflora 'Kaleidoscope'		Abelia x grandiflora 'Kaleidoscope' is an, evergreen shrub with arching branches. It has small leaves which are lime green in spring, turning darker with wide golden yellow leaf margins in summer and turning orange and red in autumn. White flowers, flushed with pink are produced from mid-summer to autumn. Plant in full sun, in well drained soil, ideally in a spot that is sheltered from cold winds. Mature height and spread: 1.5m x 2m. Hardiness: H4	
Abeliophyllum distichum (White Forsythia)		A open, spreading, deciduous shrub with ovate, matt, dark green leaves which often turn purple in autumn. Small, cross-shaped, fragrant, white or pink-tinged flowers are produced in late winter and early spring on previous year's growth. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 1.5m x 1.5m. Hardiness: H6.	
Abies nordmanniana (Nordman Fir)		An upright evergreen tree with tiered branches made up of densely arranged, glossy, dark green needle-like leaves which have white undersides. Ovoid-cylindrical greenish brown cones are produced on mature trees in spring and summer. Ideally plant in full sun, in fertile, moist, but well-drained soil. Mature height and spread: up to 40m x 6m. Hardiness: H7.	
Abutilon megapotamicum	Not currently in production	An evergreen or semi-evergreen shrub with arching branches of lance-shaped, bright green leaves. Hanging, bell-shaped red and yellow flowers are produced from summer to autumn. Plant in full sun, in well-drained, moderately fertile soil. Mature height and spread: 2m x 2m. Hardiness: H3.	

Acer campestre (Field Maple)		A deciduous tree with green, rounded, 5-lobed leaves which are downy on the undersides and turn a rich yellow colour in autumn. Clusters of green flowers are produced in spring, followed by winged seeds which ripen to red. Good for chalky soils and often grown in native mixed hedges. Ideally plant in full sun, or partial shade, in fertile, moist, well-drained soil, but will tolerate chalk. Mature height and spread: 10m x 8m. Hardiness: H6.
Acer griseum	Not currently in production	
Acer palmatum 'Atropurpureum'		A rounded, deciduous shrub or small tree with deeply cut red-purple leaves, which turn brilliant red in autumn. Tiny red flowers are followed by red-winged seeds in late summer. Plant in partial shade, away from cold winds, in fertile, moist, well-drained soil. Mature height and spread: 9m x 4m. Hardiness: H6
Acer palmatum 'Crimson Queen'		
Acer palmatum 'Orange Dream'		
Acer platanoides 'Crimson King'		
Acer rubrum 'Scanlon'		
Acer rubrum 'Brandywine'		
Aesculus hippocastanum (Horse Chestnut)		A vigorous, spreading, rounded deciduous tree with rounded palmate leaves. Upright clusters of white flowers which age to have pink marks, are produced in late spring and early summer. Large seeds, known as conkers, are contained in spiky husks. Ideally plant in full sun or partial shade, in deep, fertile soil. Mature height and spread: 25m x 20m. Hardiness: H7.
Aktinidia kolomikta		
Amelanchier lamarckii		An upright, deciduous shrub or small tree with oblong leaves that turn from bronze with white hairs, to green, then red throughout the year. Racemes of white flowers are produced in mid-spring, followed by purple-black fruit. Plant in acidic, fertile soil in full sun or partial shade. Mature height and spread: 10m x 12m. Hardiness: H7.
Amelanchier x grandiflora 'Ballerina'	Not currently in production	A deciduous, spreading, shrubby tree with oval, glossy green leaves which are bronze tinted when young, turning red and purple in autumn. Many arching clusters of white flowers are produced in spring and early summer, followed by sweet, juicy fruit which is red, then turns purplish black. Ideally plant in full sun or partial shade, in acidic, fertile soil. Mature height and spread: 6m x 8m. Hardiness: H7.
Amelanchier canadensis		A deciduous, upright, shrub large shrub or small tree with oval mid-green leaves which are bronze and hairy when young, green in summer and turning yellow, orange, then red in autumn. Upright clusters of white flowers are produced in spring and early summer, followed by sweet, juicy fruit which is red, then turns purplish black. Ideally plant in full sun or partial shade, in acidic, fertile soil. Mature height and spread: 6m x 3m. Hardiness: H7.

Amelanchier canadensis 'Glenn Form'		
Ampelopsis brevipedunculata 'Elegans'		Variegated climber with white berries which turn green and purple-blue
Aralia elata		
Arbutus unedo		
Aucuba japonica 'Crotonifolia' AGM		An rounded, evergreen shrub with large elliptic to ovate, glossy green leaves with yellow speckles. A female variety , which produces small red-purple flowers in spring, followed by bright red berries. Plant in partial shade, in any soil that is not waterlogged. Mature height and spread: 2.5m x 2.5m. Hardiness: H5.
Aucuba japonica 'Golden King' AGM		An rounded, evergreen shrub with large elliptic to ovate, glossy green leaves with striking yellow speckles. A male variety , which produces small red-purple flowers in spring. Plant in partial shade, in any soil that is not waterlogged. Mature height and spread: 2.5m x 2.5m. Hardiness: H5.
Aucuba japonica 'Rozannie'		A rounded, dense, evergreen shrub. Large, elliptic to ovate, dark green leaves are produced, with slight serration to them. Small red-purple flowers are produced in mid-spring and are bisexual, with female flowers producing red berries. Plant in sun, partial shade or shade, in any soil, as long as it isn't waterlogged. Mature height and spread: 1m x 1m. Hardiness: H5.
Aucuba japonica 'Variegata'		An rounded, evergreen shrub with large elliptic to ovate, glossy green leaves with creamy-yellow speckles. A female variety , which produces small red-purple flowers in spring, followed by bright red berries. Ideally plant in partial shade, in any soil that is not waterlogged. Mature height and spread: 2m x 2.5m. Hardiness: H5.
Azara microphylla 'Variegata'		A slow growing, upright, evergreen large shrub or tree with small, cream edged dark green leaves. Tiny vanilla-scented greenish yellow flowers are produced in late winter. Plant in a sheltered spot in full sun or partial shade, in moist, fertile, humus-rich soil. Will tolerate full shade. Mature height and spread, 6m x 3m. Hardiness: H4.
Azara serrata		An evergreen shrub with small, oval, dark green leaves. Groups of yellow, scented flowers are produced in summer. In hot summers, berries may be produced. Plant in a sheltered spot in full sun or partial shade, in fertile soil. Mature height and spread, 4m x 3m. Hardiness: H4.
Berberis atropurpurea 'Helmond Pillar'	Not currently in production	
Berberis darwinii (Darwin's Barberry)		An evergreen shrub with upright growth and spiny, dark green leaves. Long clusters of orange flowers are produced in spring and sometimes again in autumn. Blue-black fruit follow. Plant in full sun or partial shade in any soil as long as it isn't waterlogged. Mature height and spread: 3m x 3m. Hardiness: H5.
Berberis thunbergii		A dense, rounded, deciduous shrub with small, fresh green leaves that turn orange and red in autumn. Groups of yellow flowers are produced in spring, followed by glossy red fruit. Plant in full sun or partial shade in any soil. This is a good plant for hedging. Mature height and spread: 1m x 2.5m. Hardiness: H7.
Berberis thunbergii 'Aurea'		

Berberis thunbergii f. atropurpurea 'Atropurpurea Nana' (Japanese Barberry)		A dense, very compact, deciduous shrub with small, red-purple leaves and spiny stems. Groups of yellow flowers are produced in spring, followed by glossy red fruit. Plant in full sun or partial shade in any soil. Mature height and spread: 45cm x 75cm. Hardiness: H7.
Berberis verruculosa		A compact, slow-growing, evergreen shrub with arching shoots bearing small, glossy, dark green spiny leaves which are grey-white underneath. Small, golden yellow, cup-shaped flowers are produced singly along branches in late spring, followed by dark purple berries. Plant in full sun or partial shade in any soil. Mature height and spread: 1.5m x 1.5m.
Betula pendula		An upright, narrow tree with pendent branches of small, diamond-shaped green leaves, which turn bright yellow in autumn. Male catkins are produced in early spring. Plant in full sun or partial shade, in any moist, but well-drained soil. Mature height and spread: up to 25m x 10m. Hardiness: H7.
Betula pendula 'Karaca'		
Betula pendula ssp. pendula 'Tristis'		
Betula utilis 'Snow Queen'		
Betula utilis subsp. utilis 'Dark Ness'		
Brachyglottis 'Sunshine'		
Buddleja 'Lochin' AGM		A spreading, vigorous, deciduous shrub with long arching shoots of white-hairy mid-green leaves. Spikes of fragrant, violet-blue flowers with orange eyes are produced in late summer to autumn. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 2.5m x 3m. Hardiness: H5.
Buddleja 'Pink Delight' AGM		A deciduous shrub with lance-shaped grey-green leaves. Spikes of bright pink flowers with orange eyes are produced from mid to late summer. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 1.8m x 2m. Hardiness: H5.
Buddleja 'Snow White'	Not currently in production	Buddleja 'Snow White' is a deciduous shrub with more compact growth than other buddlejas and does not self-seed. Silver-green leaves are produced in spring, followed by large plumes of white flowers throughout summer. This shrub is great for a smaller space, where other buddlejas would grow too large. Plant in full sun or partial shade in free draining,
Buddleja alternifolia		Buddleja alternifolia is a deciduous shrub with arching branches. It's leaves are narrow and green or silvery-green. Clusters of lilac coloured flowers with wonderful scent are produced in early summer on the previous season's growth. This shrub can be grown as a bush or trained as a standard, allowing it's branches to arch gracefully. Plant in full sun, in fertile, well drained soil. Mature height and spread: 4m x 4m. Hardiness: H6
Buddleja davidii 'Black Knight' AGM		A fast growing, deciduous shrub with grey-green leaves and large spikes of dark purple-blue flowers during summer, that bees and butterflies adore. If cut back hard, height and spread can be kept under control. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 3m x 5m. Hardiness: H6.
Buddleja davidii 'Royal Red' AGM		A fast growing, deciduous shrub with grey-green leaves and large spikes of scented purple-red flowers to 50cm long produced during summer. Loved by bees and butterflies. If cut back hard, height and spread can be kept under control. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 2.5m x 2.5m. Hardiness: H6.

Buddleja davidii 'White Profusion' AGM		A fast growing, deciduous shrub with grey-green leaves and large spikes of scented white flowers with yellow eyes during summer. Loved by bees and butterflies. If cut back hard, height and spread can be kept under control. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 3m x 4m. Hardiness: H6.
Buddleja globosa	Not currently in production	
Callicarpa bodinieri var. giraldii 'Profusion' (Beautyberry) AGM		A bushy, upright, deciduous shrub with dark green leaves which are bronze when young and turn pink in autumn. Clusters of small pink flowers are produced in midsummer, followed by purple berries which persist on branches into winter. Ideally plant in sun or dappled shade, in any well-drained soil. Mature height and spread: 3m x 2.5m. Hardiness: H6.
Calluna vulgaris (Heather)	Not currently in production	A variable, evergreen shrub with small, dark green leaves, which can be hairy. Dark magenta, white or pink flowers are produced from late summer to late autumn. Plant in full sun, in well-drained, humus-rich, acid soil. Mature height and spread: 60cm x 75cm. Hardiness: H7.
Calycanthus 'Aphrodite'		
Carpinus betulus (Hornbeam) AGM		A deciduous, upright tree/hedging plant with ovate, slightly toothed, mid-green leaves which turn yellow to orange in autumn. Catkins are produced in spring. Can be hard pruned and trimmed as a hedge. Plant in moderately fertile, well-drained soil in full sun or partial shade. Mature height and spread (if not trimmed): 25m x 20m. Hardiness: H7.
Carpinus betulus 'Frans Fontaine'		
Carpinus betulus 'Frans Fontaine'		
Caryopteris x clandonensis 'Dark Knight'		Caryopteris x cland. 'Dark Knight' is a deciduous, mound forming shrub. Small, green-grey, slightly serrated leaves are produced in spring, followed by dark blue flowers in late summer. It is a favourite with bees! Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Caryopteris x clandonensis 'Worcester Gold'		A deciduous, mound forming shrub. Small, warm yellow, slightly serrated leaves are produced in spring, followed by lavender-blue flowers in late summer. It is a favourite with bees! Plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Caryopteris x clandonensis Weeping form		A compact, deciduous shrub with a slightly weeping form with arching branches and small silvery grey leaves. Clusters of royal blue flowers are produced over a long period throughout late summer. Ideally plant in full sun, in well drained, moderately fertile soil. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Caryopteris GOOD AS GOLD		
Ceanothus 'Autumnal Blue'		
Ceanothus 'Blue Mound'		An evergreen, mound-forming shrub with small, finely toothed, dark green leaves. Dark blue flowers are produced in late spring in large groups. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread, 1.5 x 2m. Hardiness: H4.
Ceanothus 'Concha' AGM		A dense, evergreen shrub with arching branches of finely toothed, dark green leaves. Reddish purple buds open to clusters of blue flowers in late spring. Plant in full sun, in well drained, moderately fertile soil. Mature height and spread, 3m x 3m. Hardiness: H4.

Ceanothus thyrsiflorus var. repens (Californian Lilac) AGM		A low, spreading evergreen shrub with small, glossy, dark green leaves. Light blue flowers are produced in clusters in spring and summer. If grown against a wall it will be much taller. Ideally plant in full sun, in well drained, moderately fertile soil. Mature height and spread, 1m x 2.5m. Hardiness: H4.
Ceratostigma griffithii		A rounded, evergreen or semi-evergreen shrub with bristly red stems with small, green leaves with purple margins, which turn red in autumn and winter. Small bright blue flowers are produced in clusters from late summer to autumn. Plant in full sun, in moderate, moist but well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Ceratostigma willmottianum AGM		An open-branched, deciduous shrub with bristly green stems and green leaves with purple margins which turn red in autumn. Clusters of pale to mid-blue flowers are produced from late summer to autumn. Plant in full sun, in moderate, moist but well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Cercidiphyllum japonicum (Katsura Tree)	JOP	
Cercis canadensis 'Ruby Falls'		
Cercis canadensis 'Forest Pansy'		
Cercis canadensis 'Forest Pansy'		
Cercis siliquastrum 'Bodnant'		
Chaenomelea speciosa 'Geisha Girl'		
Chaenomeles cathayensis	Not currently in production	A vigorous, upright, deciduous shrub with lance-shaped, mid-green leaves, which are often red when young. White-pale pink flowers are produced in clusters in spring, followed by yellow-green fruit. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 3m x 3m. Hardiness: H6.
Chaenomeles japonica		A spreading, deciduous shrub with small, rounded mid-green leaves and thorny stems. Clusters of red-orange flowers are produced in spring, followed by yellow or yellow-red fruit. This plant can be trained as a wall shrub. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 1m x 2m. Hardiness: H6.
Chaenomeles speciosa 'Nivalis'		A vigorous, wide spreading deciduous shrub with spiny branches and glossy, oval, dark green leaves. Clusters of cup-shaped, pure white flowers are produced in spring on bare branches, followed by fragrant green-yellow fruits in autumn. Ideally plant in full sun or partial shade, in well-drained soil. Mature height and spread: 2m x 2.5m. Hardiness: H6.
Chaenomeles x superba 'Crimson and Gold'		A rounded, spreading shrub with spiny branches, bearing glossy, ovate-oblong, mid-green leaves. Clusters of cup-shaped, dark red flowers with golden yellow anthers are produced from spring to summer. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 1.5m x 2m. Hardiness: H6.
Chaenomeles x superba 'Jet Trail' (Japanese Quince, Japonica)		A compact, spreading shrub with spiny branches and glossy, oval, mid-green leaves. Clusters of cup-shaped, pure white flowers are produced in spring on bare branches, followed by fragrant yellow fruits in autumn. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 1m x 1.2m. Hardiness: H6.
Chaenomeles x superba 'Orange Trail' (Japanese Quince, Japonica)		A rounded, spreading shrub with spiny branches and glossy, oval, mid-green leaves. Clusters of cup-shaped, orange flowers are produced in spring, followed by fragrant yellow fruits in autumn. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H6.

Chaenomeles x superba 'Pink Lady' AGM		A rounded, spreading shrub with spiny branches, bearing glossy, ovate-oblong, mid-green leaves. Clusters of cup-shaped, dark pink flowers are produced in early spring. Plant in full sun or partial shade, in well-drained soil. Mature height and spread: 1.5m x 2m. Hardiness: H6.
Chaenomeles x superba 'Lemon and Lime'		
Chamaecyparis lawsoniana 'Elwoodii'	JOP	
Chamaecyparis lawsoniana 'Golden Pot'		An evergreen, columnal conifer with bright yellow-gold scale-like foliage. Can be trimmed to shape and size, but do not cut into old wood. Plant in full sun or shade, preferably moist, well-drained soil. Chalk tolerant. Mature height and spread, 2m x 1m. Hardiness: H6.
Chamaecyparis lawsoniana 'Pembury Blue'		An evergreen, columnar, cone-shaped conifer with bright blue-grey, scale-like foliage. Small, reddish brown cones are produced. Can be trimmed to shape and size, but do not cut into old wood. Plant in full sun or shade, preferably moist, well-drained soil. Chalk tolerant. Mature height and spread, 15m x 5m. Hardiness: H6.
Chimonanthus praecox (Wintersweet)		A deciduous shrub with an upright, branched habit. Leaves are lance-shaped and glossy dark green. In winter, highly fragrant spider-like yellow flowers with purple/brown centres are produced at the shoots of last summer's shoots. Ideally plant in full sun, in any well-drained soil. Mature height and spread: 4m x 3m. Hardiness: H5.
Choisya 'Aztec Gold'		
Choisya ternata	JOP	
Choisya ternata 'Sundance'		A compact, evergreen shrub with bright yellow, narrow leaves. In partial shade leaves are yellow-green. Fragrant, white flowers are sometimes produced. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 2.5m x 2.5m. Hardiness, H4.
Choisya x dewitteana 'Aztec Pearl' AGM		An elegant, compact, rounded evergreen shrub with fragrant, divided, green leaves. Clusters of fragrant white flowers are produced in late spring, often reflowering in late summer. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 2m x 2m. Hardiness, H4.
Choisya x dewittiana WHITE DAZZLER PBR		
Choisya x dewittiana WHITE DAZZLER PBR		
Cistus pulverulatus 'Sunset'	JOP	
Cistus x argenteus 'Silver Pink'		
Cistus x argenteus 'Silver Pink'		

Cistus x hybridus (Syn. C. corbariensis)	JOP	A bushy, dense, evergreen shrub with slightly wavy green leaves. Thin-petalled pure white flowers are produced from red buds in early summer. Plant in full sun, in poor or moderately fertile, well drained soil. Drought tolerant. Mature height and spread: 1m x 1.5m. Hardiness: H4.
Cistus x lenis 'Grayswood Pink'		An evergreen, low growing, spreading shrub with grey-green leaves. Papery flowers that are pink with white centres are produced in summer. Plant in full sun, in poor or moderately fertile, well drained soil. Mature height and spread: 40cm x 60cm. Hardiness: H4.
Cistus x purpureus (Rock Rose) AGM (Synonym Cistus 'Betty Taudevin')		A rounded, evergreen shrub with upright shoots and narrowly oblong, slightly wavy, dark green leaves. Papery, crinkled, pale pink flowers with maroon inners are produced in summer. Plant in full sun, in poor or moderately fertile, well drained soil. Mature height and spread: 1m x 1m. Hardiness: H4.
Cistus x purpureus 'Alan Fradd'	JOP	
Clematis 'Blue Boy'		
Clematis 'Gravetye Beauty'		
Clematis 'Kiri Te Kanwa'		
Clematis 'Mrs N. Thompson'	Not currently in production	A compact climber with mid-green, divided leaves. Deep violet flowers with scarlet stripes down the centre of each petal are produced in early summer. Group 2- flowers on previous season's growth. Prune lightly in winter, removing damaged stems. Plant in full sun or partial shade, plant roots in shade. Will grow in a north-facing site, but flowers best in full sun. Plant in fertile, moist but well-drained soil. Mature height and spread: 2.5m x 1m. Hardiness: H6.
Clematis 'Pink Flamingo' AGM		A deciduous climber with mid-green, divided leaves. Pale pink, nodding, bell-shaped, semi-double flowers with dark petal bases and creamy white inners are produced in spring and again in summer. Group 1- flowers on previous season's growth. Prune lightly after flowering. Plant in full sun, with roots in shade. Plant in fertile, moist but well-drained soil. Mature height and spread: 2-4m x 1.5m. Hardiness: H6.
Clematis 'Prince Charles'		
Clematis 'Radar Love'		A deciduous climber with dark green, divided leaves. Nodding, canary yellow flowers are produced in late spring and summer, followed by feathery seed heads. Group 3- flowers on new growth. Prune hard before growth begins in spring. Plant in full sun, with roots in shade, in fertile, moist but well-drained soil. Mature height and spread: 2-3m x 1.5m.
Clematis 'Rouge Cardinal'	Not currently in production	A deciduous climber with divided, mid-green leaves. Large, velvety crimson flowers are produced in midsummer. Group 3- flowers on new growth. Prune hard before growth begins in spring. Plant in full sun or partial shade, plant roots in shade. Will grow in a north-facing site, but flowers best in full sun. Plant in fertile, moist but well-drained soil. Mature height and spread: 2-3m x 1.5m.
Clematis 'Appleblossom'		
Clematis armandii 'Appleblossom'		

Clematis Bees' Jubilee'	Not currently in production	A deciduous climber with divided, mid-green leaves. Large, deep pink flowers with a darker central stripe to each petal are produced in late spring and early summer and often again in late summer. Group 2- flowers on previous season's growth. Prune lightly in winter, removing damaged stems. Plant in partial shade, plant roots in shade. Plant in fertile, moist but
Clematis 'Blue Dancer'		
Clematis 'Blue Dancer'		
Clematis 'Broughton Star'		
Clematis 'Broughton Star'		
Clematis Cezanne		
Clematis cirrhosa 'Jingle Bells'		
Clematis cirrhosa var. purpurascens 'Freckles' AGM	Not currently in production	An evergreen climbing clematis with lobed, toothed glossy dark green leaves, tinged bronze in winter. Creamy pink, cup-shaped flowers with red speckling inside are produced in late winter and early spring. Group 1- cut back immediately after flowering to tidy, if needed. Ideally plant in full sun or partial shade, in a slightly sheltered position. Plant in fertile, moist but well-drained soil, keeping the base shaded and cool. Mature height and spread: 2.5-4m x 1.5m. Hardiness: H4.
Clematis cirrhosa 'Wisley Cream'		
Clematis cirrhosa 'Wisley Cream'		
Clematis 'Comtesse de Bouchaud'		
Clematis 'Comtesse de Bouchaud'		
Clematis 'Constance'		
Clematis 'Constance'		

Clematis 'Etoile Violette'		
Clematis 'Forget-me-not'		
Clematis 'Forget-me-not'		
Clematis Giselle		
Clematis 'Guernsey Cream'		
Clematis 'Guernsey Cream'		
Clematis 'Huldine'		
Clematis 'Jackmanii'		
Clematis Josephine		
Clematis 'Madame Julie Correvan'		
Clematis montana 'Marjorie'		A vigorous, evergreen climber with bronze tinted leaves. Semi-double, creamy pink flowers are produced in late spring and early summer. Group 1 - cut back immediately after flowering to tidy, if needed. Plant in full sun or partial shade. Will grow in a north-facing site, but flowers best in full sun. Plant in fertile, moist but well-drained soil. Mature height and spread: 6m
Clematis montana Rubens		
Clematis montana var. alba		
Clematis montana var. alba		
Clematis 'Polish Spirit'		

Clematis 'Polish Spirit'		
Clematis Purpurea Plena Elegans'		
Clematis 'Rhapsody'		
Clematis 'Ruby Wedding'		
Clematis 'Ruby Wedding'		
Clematis spooneri	JOP	
Clematis tangutica		
Clematis tangutica		
Clematis The Countess of Wessex		
Clematis Tsukio		
Clematis 'Ville de Lyon'		
Clematis 'Ville de Lyon'		
Clematis 'Warsaw Nike'		
Clematis 'Willy'		
Cornus alba 'Aurea'		A clump-forming, deciduous shrub with red young stems in winter. Pointed oval, yellow leaves, which turn pinkish in late summer, are produced in spring, followed by white flower heads. Coppice annually or every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 3m x 3m. Hardiness: H7.

Cornus alba 'Elegantissima'		A clump-forming, deciduous shrub with dark red young stems in winter. Pointed oval, grey-green leaves with creamy white margins are produced in spring, followed by white flower heads. Coppice annually or every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 3m x 3m. Hardiness: H7.
Cornus alba 'Gouchaultii'	Not currently in production	A clump-forming, deciduous shrub with red young stems in winter. Pointed oval, dark green leaves with yellow margins, are produced in spring, followed by white flower heads. Coppice annually or every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 3m x 3m. Hardiness: H7.
Cornus alba 'Kesselringii'		Black stems
Cornus alba 'Sibirica'		A clump-forming, deciduous shrub with bright red young stems in winter. Pointed oval, dark green leaves, which turn red in autumn, are produced in spring, followed by white flower heads. Coppice annually or every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 3m x 3m. Hardiness: H7.
Cornus alba 'Spaethii'		
Cornus alternifolia 'Argentea'		
Cornus alternifolia 'Argentea'		
Cornus kousa 'Satomi'		
Cornus kousa 'Teutonia'		
Cornus mas (Cornelian Cherry)		A deciduous, spreading shrub or small tree with ovate, dark green leaves. Small, bright yellow flowers are produced in clusters in winter, followed by bright red fruit in autumn. Plant in full sun or part-shade in moist, well drained soil. Will also tolerate dry soils once established. Mature height and spread: 5m x 5m. Hardiness: H6.
Cornus sanguinea	JOP	
Cornus sanguinea 'Annie's Winter Orange'		
Cornus sanguinea 'Midwinter Fire'	JOP	
Cornus sanguinea 'Winter Beauty'		An upright, deciduous shrub with winter stems that are pale yellow at the base and red/orange at the tip. Oval, yellow-green leaves are produced in spring, followed by white flower heads. Autumn leaf colour change is good for added interest. Coppice every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 2m x 2m. Hardiness: H6.

Cornus sericea 'White Gold'		
Cornus sericea 'Cardinal'	JOP	
Cornus sericea 'Flaviramea' AGM		A clump-forming, deciduous shrub with bright yellow-green young stems in winter. Pointed oval, mid-green leaves are produced in spring, followed by white flower heads. Coppice annually or every 2 nd year to keep stems bright. Plant in full sun, in any moist soil. Mature height and spread: 2m x 4m. Hardiness: H7.
Cornus sericea 'Hedgerows Gold'		
Corokia x virgata 'Frosted Chocolate'		An upright shrub with small spoon-shaped leaves. This variety has attractive green leaves with golden yellow margins. Small, fragrant yellow flowers are produced in spring, followed by orange berries. This shrub makes a good hedging plant. Plant in full sun, in fertile, well drained soil. Mature height and spread: 2 x 1.2m. Hardiness: H4.
Corokia x virgata 'Red Wonder'		An upright shrub with small spoon-shaped, glossy, dark green leaves. Small, fragrant yellow flowers are produced in spring, followed by a profusion of red berries. This shrub makes a good hedging plant. Plant in full sun, in fertile, well drained soil. Mature height and spread: 2 x 1.2m. Hardiness: H4.
Coryloopsis pauciflora	Not currently in production	
Coryloopsis spicata	JOP	
Corylus avellana (Hazel)		Common Hazel (Corylus avellana) grows as a small tree or can be coppiced to form a large shrub. It produces long, golden catkins in late winter, before bright green, heart-shaped leaves emerge in spring. Edible hazelnuts are produced in autumn. Mature height and spread, 5m x 5m.
Corylus avellana 'Red Majestic'		
Corylus avellana 'Contorta'		
Corylus maxima 'Purpurea'		A deciduous, upright shrub or small tree with dark purple, rounded leaves. Yellow catkins, tinged purple, are produced in winter, followed by nuts. Plant in full sun or partial shade, in fertile, well drained soil. Mature height and spread: 6m x 5m. Hardiness: H6.
Cotinus 'Grace'		A bushy, vigorous, deciduous shrub or small tree, with oval, purple leaves which turn a brilliant translucent red in autumn. Panicles of tiny flowers are produced in summer, which look like plumes of smoke. Plant in full sun, in moderately fertile, moist, but well-drained soil. Mature height and spread: to 6m x to 5m. Hardiness: H5.
Cotinus coggygria 'Golden Spirit' PBR	Not currently in production	

Cotinus coggygria 'Lilla'		
Cotinus coggygria 'Royal Purple'	JOP	
Cotinus coggygria 'Young Lady' PBR	Not currently in production	
Cotoneaster horizontalis		Cotoneasters are favoured for their winter berries. C. horizontalis is a deciduous spreading shrub with branches forming a herringbone pattern. It is perfect for growing against a wall or fence. Small, glossy, dark green leaves are produced in spring and turn red in autumn. White-pink flowers are produced in spring, followed by bright red berries in autumn and winter. Bees love the flowers and birds enjoy the berries. Mature height and spread, 1m x 1.5m. Hardiness: H7
Cotoneaster lacteus		A dense, evergreen shrub with arching branches bearing obovate or elliptic, dark green, deeply veined leaves with a yellow-white felt underneath. Cymes of milky white flowers are produced in spring, followed by red berries. Can be grown as a hedge. Plant in full sun or partial shade in any well drained, moderately fertile soil. Mature height and spread: 4m x 4m.
Cotoneaster microphyllus		Cotoneasters are favoured for their winter berries. This cotoneaster is a small, evergreen shrub with small glossy green leaves. White flowers are produced in spring, followed by red berries in autumn and winter which are particularly enjoyed by wildlife. Plant in full sun or partial shade in any well drained, moderately fertile soil. Mature height and spread, 1m x
Cotoneaster nauoianensis 'Berried Treasure'	Not currently in production	
Cotoneaster procumbens 'Queen of Carpets'		C. procumbens 'Queen of Carpets' is a low growing, evergreen shrub with dark green leaves, which are larger than some other C procumbens varieties. The undersides of leaves are hairy and slightly white. Delicate, white flowers are produced in spring and ripen to form pink-crimson berries in autumn and winter. Bees love the flowers! Plant in full sun in any well
Cotoneaster simonsii	Not currently in production	Cotoneasters are favoured for their winter berries. This hardy, upright deciduous or semi-evergreen shrub has dark green, glossy leaves and bears bright red berries during autumn and winter. Plant in full sun in well drained, fertile soil. Mature height and spread, 8ft X 6ft. Hardiness: H6
Cotoneaster x suecicus 'Coral Beauty'		Cotoneasters are favoured for their attractive winter berries. C. x suecicus 'Coral Beauty' is a mound forming, evergreen shrub with dense, arching branches bearing small, glossy, dark green leaves. White flowers are produced in summer, followed by bright orange berries which last into winter. Bees love the flowers! Mature height and spread, 1m x 2m.
Crataegus monogyna (Hawthorn)		A rounded, deciduous shrub, hedge or tree with dark green, diamond-shaped, deeply lobed leaves in spiny branches. Heads of white flowers are produced in spring, followed by red berries. Makes a very good hedging plant. Plant in full sun or partial shade, in any soil that does not become waterlogged. Mature height and spread: 10m x 8m (if grown as a tree).
Crataegus persimilis 'Prunifolia Splendens'		
Crataegus x media 'Paul's Scarlet'		
Cryptomeria japonica 'Elegans'	JOP	

Cryptomeria japonica 'Golden Promise' (Japanese Cedar)		A dwarf, mound forming conifer with pale yellow leaves in spring, with red-purple tinges during winter. Spherical cones are produced. Plant in full sun or partial shade, in any soil. Mature height and spread: 1m x 0.75m. Hardiness: H6.
Cryptomeria japonica 'Spiralis'		
Cytisus x praecox 'Albus'		
Daphna transatlantica ETERNAL FRAGRANCE		
Daphne bhoula 'Jacqueline Postill'		
Daphne gemmata 'Royal Crown'		
Daphne odora		
Daphne odora 'Aureomarginata'	Not currently in production	
Daphne pontica	Not currently in production	An evergreen, spreading shrub with medium, glossy, dark green leaves. Clusters of highly scented, green-yellow flowers are produced in spring. Plant in shade, in fertile, well drained soil that does not dry out. Mature height and spread: 1m x 1.5m. Hardiness: H5.
Deutzia crenata 'Pride of Rochester' AGM		A bushy, arching, deciduous shrub with ovate, dark green leaves. Cylindrical panicles of small, double, scented, pink-tinged white flowers are produced in early and midsummer. Loved by bees. Plant in full sun, in any moderately fertile soil. Mature height and spread: 1.5m x 2m. Hardiness: H5.
Deutzia gracilis 'Nikko' (D. crenata var. nakiana 'Nikko')		
Deutzia scabra 'Candidissima'		
Deutzia x hybrida 'Mont Rose'		A bushy, upright, deciduous shrub with ovate, dark green leaves. Panicles of small, star-shaped, mallow-pink flowers with wavy petals, darker outer petals and yellow centres, are produced in early summer. Loved by bees. Plant in full sun, in any moderately fertile soil. Mature height and spread: 2.5m x 1.2m. Hardiness: H5.
Elaeagnus 'Quicksilver'		
Elaeagnus angustifolia	JOP	

Elaeagnus x submacrophylla (Formerly Elaeagnus x ebbingei)		A dense, vigorous, evergreen shrub with oval-pointed, leathery leaves that are glossy, dark green above and silver beneath. Highly scented, creamy white flowers are produced in autumn. Makes a good hedging plant. Plant in full sun or partial shade, in fertile, well drained soil. Mature height and spread: 4m x 4m. Hardiness: H5.
Elaeagnus x submacrophylla 'Limelight'	JOP	
Erica darleyensis 'Jenny Porter'		
Erica darleyensis 'White Perfection'		
Erica x darleyensis 'Ghost Hills'		
Erica x darleyensis 'Ghost Hills'		
Erica x darleyensis 'Kramer's Red'		
Erica x darleyensis 'Kramer's Red'		
Escallonia 'Appleblossom'		Escallonia 'Appleblossom' is a compact, bushy, evergreen shrub with dark green, glossy leaves. Apple-blossom pink flowers are produced in early summer. This shrub makes a great evergreen hedge and bees enjoy the flowers! Plant full sun, in well drained, fertile soil.
Escallonia 'Donard Seedling'		Escallonia 'Donard Seedling' is a vigorous, evergreen shrub with arching branches of small, dark green leaves. White-pink flowers are produced in abundance from early to mid-summer. This shrub makes a good evergreen hedge, if trimmed regularly and bees enjoy the flowers! Plant full sun, in well drained, fertile soil.
Euonymus alatus	JOP	
Euonymus alatus 'Compactus'	JOP	
Euonymus bungeanus		
Euonymus europaeus (European/Common Spindle)	JOP	

Euonymus europaeus 'Red Cascade' (European/Common Spindle)		A broad shrub or small tree with oval, green leaves that turn red in autumn. Clusters of flowers produce scarlet fruit and orange seeds in autumn. This plant can be used in a large border or on its own as a specimen tree. Plant in full sun or partial shade, in well drained soil. Mature height and spread: 3 x 2.5m. Hardiness: H6.
Euonymus fortunei 'Emerald 'n' Gold' AGM		A compact shrub with bright green leaves with golden edges, tinged pink in winter. It has a variety of garden uses. It can be grown as a free standing shrub, trimmed as a piece of topiary or grown as a hedge. Plant in full sun or partial shade, in any well drained soil. Mature height and spread, 60 x 90cm. Hardiness: H5
Euonymus fortunei 'Emerald Gaiety' AGM		This Euonymus is a compact, bushy shrub with white variegated leaf edges and leaves which are tinged pink in winter. It can be grown as a free standing shrub, trimmed as a piece of topiary or grown as a hedge. Will climb if grown against a wall or fence. It prefers a position in full sun, which will bring out the best leaf colour and moist, well drained soil. Mature height and spread, 1m x 1.5m. Hardiness: H5
Euonymus fortunei 'Kewensis'	JOP	Ground cover, small dark green leaves
Euonymus japonicus 'Bravo'	JOP	
Euonymus japonicus 'Green Rocket'		A bushy, evergreen shrub with small oval, glossy dark green leaves that are slightly toothed. Small, spherical pink-white fruit are sometimes produced. It makes a good substitute for Box (Buxus). Plant in full sun or partial shade, in well drained soil. Mature height and spread: 1m x 50cm. Hardiness: H5.
Euonymus japonicus 'Green Spire'	JOP	
Exochorda x macrantha 'The Bride' (Pear Bush)		A compact, arching, deciduous shrub with small, rounded, light green leaves. Racemes of white flowers are produced in spring and early summer. Plant in full sun or partial shade, in fertile, moist but well drained soil. Dislikes shallow chalk. Mature height and spread: 2m x 3m. Hardiness: H6.
Fagus sylvatica (Common Beech)		A spreading deciduous shrub, hedging plant or tree with rounded oval, wavy, glossy green leaves. In autumn, leaves turn coppery brown and remain on the plant if clipped as a hedge. Regular trimming will create a dense hedge. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: up to 30m x 15m (if grown as a tree). Hardiness: H6.
Fagus sylvatica Atropurpureum Group		
Fagus sylvatica var. heterophylla 'Aspleniifolia'. Fern-leaved Beech		
Fagus sylvatica var. heterophylla 'Aspleniifolia'. Fern-leaved Beech		
Fargesia murielae (Umbrella Bamboo)	Not currently in production	A clump-forming bamboo with white powdery, then yellow-green, then yellow stems and lance-shaped, bright green leaves. Plant in full sun or partial shade, in fertile, moisture-retentive soil. Will tolerate wind. Mature height and spread: 4m x 1.5m or more, Hardiness: H5.
Fargesia murielae 'Simba'	JOP	

Fatsia japonica AGM (Aralia/Castor Oil Plant)		A spreading, rounded shrub with thick stems, which bear large, glossy, dark green, deeply lobed leaves. Creamy white flowers are produced large clustered umbels in autumn, followed by small black fruit. Plant in a sheltered spot in light shade, in fertile, moist but well-drained soil. Mature height and spread: 1.5-4m x 1.5-4m. Hardiness: H5.
Forsythia suspensa 'Hewitt's Gold'	Not currently in production	
Forsythia x intermedia 'Lynwood Variety' AGM		An upright, deciduous shrub with bright green, oval-lance shaped leaves. Stems are covered in groups of golden yellow flowers in spring, before leaves emerge. In autumn the leaves turn wonderful shades of purple, red and yellow. Plant in full sun or partial shade, in any soil that is not waterlogged or very dry. Mature height and spread, 3m x 3m. Hardiness: H5
Frangula alnus (Alder Buckthorn)	JOP	
Fuchsia 'Ricartonii' AGM	JOP	
Fuchsia 'Genii'	JOP	
Fuchsia 'Grayrigg'	Not currently in production	
Fuchsia 'Hawkshead'	JOP	
Fuchsia magellanica var. molinae	JOP Not currently in production	
Fushcia 'Tom Thumb'		
Fushia 'Dying Embers'		A deciduous shrub with small dark green leaves which have a purple veins. Flowers hang down and are glossy with very deep aubergine inners, capped by crimson coloured outer sepals. Flowers throughout summer and autumn. In very cold winters the upper branches may die back, but new shoots should emerge from the base. Plant in partial shade, in any well-drained soil with some summer moisture. Approximate height and spread: 60-70cm x 70cm. Hardiness: H4, down to -10°C.
Garrrya elliptica		A dense, upright, evergreen shrub or small tree with dark green or grey oblong-elliptic leaves with wavy margins. Silk tassel-like, grey-green catkins are produced from midwinter to early spring. Plant in full sun or partial shade, in moderately fertile, well-drained soil. Mature height and spread: 4m x 4m. Hardiness: H4.

Ginkgo biloba 'Blagon'		
Ginkgo biloba 'Menhir' PBR. Maidenhair Tree		
Ginkgo biloba 'Menhir' PBR. Maidenhair Tree		
Ginkgo biloba		
Griselinia littoralis		An dense, evergreen shrub with ovate-oblong, glossy, bright apple-green leaves. Suitable for coastal areas and good for growing as a hedge. Plant in full sun, in well-drained soil. Mature height and spread, 8m x 5m. Hardiness, H5.
Griselinia littoralis 'Variegata'		An dense, evergreen shrub with ovate, glossy, bright apple-green leaves with irregular creamy white margins and grey-green streaks. Suitable for coastal areas and good for growing as a hedge. Plant in full sun, in well-drained soil. Mature height and spread, 3m x 2m. Hardiness, H4.
Haleisa carolina Monticola Group		
Hamamelis virginiana (Virginian Witchazel)		An upright, deciduous shrub with broadly oval, light green leaves, which turn yellow in autumn. Small, spidery, yellow flowers are produced in autumn, as the leaves begin to fall. Plant in full sun or partial shade, in moist, but well-drained soil. Dislikes solid chalk, but will tolerate deep topsoil over chalk. Mature height and spread: 4m x 4m. Hardiness: H6.
Hamamelis x intermedia 'Arnold Promise'		
Hamamelis x intermedia 'Diane'		
Hamamelis x intermedia 'Pallida'		
Hedera colchica 'Sulphur Heart'		A vigorous climber with leathery, elongated, heart shaped leaves that are mid-green with creamy yellow variegation. Mature plants produce clusters of small green flowers, followed by black seeds. It is popular with pollinators and birds. Suitable for screening and wall growing. Plant in full sun or partial shade, preferably in moist, humus-rich soil, but they grow
Hedera helix 'Clotted Cream'		A vigorous climber with large, 5-lobed, bright yellow leaves. Mature plants produce clusters of small green flowers, followed by black seeds. It is popular with pollinators and birds. Suitable for screening and wall growing. Plant in full sun for the best colour, preferably in moist, humus-rich soil, but they grow in a range of soils. Mature height: 2m. Hardiness: H5.
Hedera helix 'Erecta'		
Heptacodium miconiodes		

Hydrangea 'Preziosa' AGM		An upright deciduous shrub with broad, glossy, mid-green leaves, bronze when young and red in autumn. Rounded heads of rose-pink flowers, turning reddish-purple with age are produced on dark stems in late summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 1.5m x 1.5m. Hardiness, H4.
Hydrangea arborescens 'Annabelle'		A rounded, deciduous shrub with long stalked, broad, green leaves that are paler underneath. Spherical heads, to 20cm across, made up of small, white flowers are produced in summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 2.5m x 2.5m. Hardiness: H6.
Hydrangea aspera 'Hot Chocolate'		
Hydrangea aspera 'Rosemary Foster'		
Hydrangea aspera 'Macrophylla'		
Hydrangea aspera Villosa Group	JOP	
Hydrangea hydrangeioides var. hydrangeoides 'Roseum' (Formerly Schizophragma)		
Hydrangea macrophylla 'Ayesha'		A deciduous, mophead type with broad light green leaves which are slightly serrated. Lilac-like, small, pale pink to pale blue flowers are produced from mid to late summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 1.5m x 2m. Hardiness: H5.
Hydrangea macrophylla 'King George'		A deciduous, mophead Hydrangea with broad, slightly serrated, light green leaves. Large heads of long lasting, red-pink flowers are produced in summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 2m x 1.5m. Hardiness, H5.
Hydrangea macrophylla 'Lanarth White'		A deciduous, lacecap type Hydrangea with broad light green leaves which are slightly serrated. Large pure white flower heads, with pink-blue inner flowers, are produced from mid to late summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 1.5m x 1.5m. Hardiness: H5.
Hydrangea macrophylla 'Mariesii'		A deciduous, lacecap type Hydrangea with broad light green leaves which are slightly serrated. Large, domed lace-cap type flower heads are produced from mid to late summer and are pale pink in alkaline soil and pale blue in acid soil. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 1.2m x 1.2m. Hardiness, H5.
Hydrangea macrophylla Madame Emile Mouillère' AGM		A deciduous, mophead Hydrangea with broad, light green leaves. Round heads of long lasting, white flowers with slightly serrated edges are produced in summer and can be tinged pink in full sun. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread, 1.8m x 1.5m. Hardiness, H5.
Hydrangea macrophylla. White from Nanny Joan		
Hydrangea paniculata 'Kyushu'		White flowers, medium sized, 1.2-2m tall.

Hydrangea paniculata 'Kyushu'		
Hydrangea paniculata 'Phantom'		A vigorous, upright, deciduous shrub with oval-pointed, toothed, green leaves. Large conical groups of flowers are produced, that go from white in spring, through to pink and then wine-red in autumn. Leaves give great autumn colour change! Plant in full sun or partial shade, in moist, well-drained soil. Grows well on clay. Mature height and spread, 2m x
Hydrangea paniculata 'Tardiva'		A vigorous, upright, deciduous shrub with oval-pointed, toothed, green leaves on red-tinted stems. Large conical groups of creamy white flowers are produced in late summer and autumn. A later flowering variety. Leaves give great autumn colour change! Plant in full sun or partial shade, in moist, well-drained soil. Grows well on clay. Mature height and spread, 2.5m x
Hydrangea paniculata 'Wim's Red' PBR		A vigorous, upright, deciduous shrub with oval-pointed, toothed, green leaves on red-tinted stems. Large conical groups of creamy white flowers that age to pink are produced in late summer and autumn. Leaves give great autumn colour change! Plant in full sun or partial shade, in moist, well-drained soil. Grows well on clay. Mature height and spread, 3m x 2.5m.
Hydrangea paniculata 'Limelight' PBR	JOP	
Hydrangea paniculata 'Vanille Fraise' PBR	JOP	
Hydrangea petiolaris (formerly Hydrangea anomala ssp. Petiolaris)	JOP	
Hydrangea petiolaris var. Cordifolia (Formerly Hydrangea anomala var. Cordifolia)		A deciduous, climbing hydrangea with small, mid-green leaves, which turn yellow before falling in autumn. Leaves are smaller than H. petiolaris. Slightly domed heads of white flowers are produced in summer. Leaves give great autumn colour change! Plant in full sun or partial shade, in moist, well-drained soil. Mature height, 12m. Hardiness: H5.
Hydrangea quercifolia	JOP	
Hydrangea seemanii	Not currently in production	A woody, evergreen climber with elliptic to lance-shaped, leathery, mid-green leaves. Clings by aerial roots. Heads of white flowers are produced in summer. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread: up to 10m. Hardiness: H4.
Hydrangea serrata 'Grayswood'		
Hydrangea serrata 'Magic Sunset'		
Hydrangea serrata 'Summer Glow'		
Hydrangea serrata 'Chiba Cherry Lips'	Not currently in production	

Hypericum olympicum 'Citrinum'	Not currently in production	
Hypericum x hidcoteensis 'Hidcote'		Hypericum x hidcoteensis 'Hidcote' is a bushy, evergreen or semi evergreen shrub with mid-green leaves. Large numbers of golden yellow, cup shaped flowers are produced for a long period during summer. This plant is good for planting as a low flowering hedge. Plant in sun or partial shade in moderately fertile, moist but well drained soil. Height and spread, 1.2m
Ilex aquifolium 'Alaska'		
Ilex aquifolium 'Alaska'?		
Ilex aquifolium 'Argentea Marginata'		An upright, evergreen shrub or tree. Leaves are glossy, dark green with cream-white edges and spines. This is a female variety and produces many bright red berries. Plant in full sun, in moist, well drained soil. Mature height and spread, 15m x 4m. Hardiness: H6.
Ilex aquifolium mixed		
Ilex aquifolium myrtifolia		A small-leaved, upright holly with flat, dark green spiny leaves. This is a male variety, so does not produce berries. This variety makes a good hedging plant. Mature height and spread, 4m x 2.5m. Hardiness: H6.
Ilex aquifolium- selected females		An upright, evergreen shrub or tree with glossy, dark green, spiny leaves. Female plants produce white flowers in spring, followed by red berries. An excellent hedging or specimen plant. Plant in full sun, in moist, well drained soil. Mature height and spread, up to 25m x 8m. Hardiness: H6.
Ilex crenata 'Convexa'	Not currently in production	A compact, evergreen shrub with purple-green stems and small, glossy, curved, yellowish green leaves. Flowers are sometimes produced, followed by small black berries. This shrub makes a good alternative to Box (Buxus). Plant in full sun, in well-drained, humus-rich soil. Mature height and spread, 1m x 1.5m. Hardiness: H6.
Ilex crenata 'Golden Gem'	Not currently in production	A compact, evergreen shrub with small, glossy, yellow leaves which turn to yellow-green in summer. Flowers are sometimes produced, followed by small black berries. This shrub makes a good alternative to Box (Buxus). Plant in full sun, in well-drained, humus-rich soil. Mature height and spread, 1.1m x 1.3m. Hardiness, H6.
Ilex x altaclerensis 'Golden King'		Leaves are spiny, grey-green with wide, gold edges. This is a female variety and produces bright red berries. All-golden growth is often produced. Plant in full sun, in moist, well-drained soil. Mature height and spread, 6m x 2m. Hardiness: H6.
Ilex x altaclerensis 'Lawsoniana' (Golden/Variegated Holly)		A compact, female tree or shrub with yellow-streaked green stems bearing oblong to ovate leaves that are light green with irregular gold splashes. Red-brown berries are produced in autumn. Plant in full sun, in moist, well-drained soil. Partial shade is tolerated, but will produce more green growth. Mature height and spread, up to 6m. Hardiness: H6.
Ilex x koehneana 'Chestnut Leaf' (Chestnut-leaved Holly)		An evergreen shrub with a narrow, conical habit when young and sweeping habit when mature. Olive-green stems bear large, glossy, olive-green leaves with spiny edges. Large red berries are produced in autumn. Plant in full sun, in well-drained, humus-rich soil. Mature height and spread, up to 12m x 5m. Hardiness, H5.
Ilex x meserveae 'Blue Angel'		A relatively compact, slow-growing, evergreen shrub with dark purple stems. Leaves are glossy, blue-green with spines. This is a female variety and produces glossy red berries. Plant in full sun, in moist, well-drained soil. Mature height and spread, 2.5m x 2m. Hardiness: H7.
Indigofera amblyantha		

Indigofera heterantha	Not currently in production	
Indigofera- maybe amblyantha		
Indigofera- maybe amblyantha		
Itea illicifolia		An evergreen shrub with upright, then spreading, arching stems of spiny, dark green leaves. Small white flowers are produced in long, catkin-like flower stems in summer and give interest through to winter. This plant makes a good wall shrub. Plant in moist, but well-drained soil, in a sheltered position. Mature height and spread, 4m x 3m. Hardiness: H5.
Jasminum beesianum (Red Jasmine)		A semi-evergreen, twining climber with dark green leaves. Small, lightly fragrant pink-red flowers are produced in early and midsummer. In cold winters it may be deciduous. Ideally plant in full sun, in fertile, well-drained soil. Mature height and spread: 5m x 4m. Hardiness: H5.
Jasminum mesnyi (Primrose/Japanese Jasmine)		An evergreen shrub/climber with arching branches or deep green leaves that will climb if supported. Semi-double, bright yellow flowers are produced in spring. Plant in full sun, in fertile, well-drained soil. Needs a sunny fence or wall for protection. Mature height and spread, 3m x 1.5m. Hardiness: H3.
Jasminum nudiflorum		A deciduous shrub with arching stems. Green leaves are produced in spring, turning yellow and dropping in autumn. In winter and early spring, bright yellow flowers are produced on bare stems. This plant can be grown as a wall shrub, hedge or as ground cover. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 3m x 3m. Hardiness: H5.
Jasminum officinale		A vigorous, twining, usually deciduous climber. Leaves, made up of leaflets, are mid-green. Clusters of white, highly fragrant flowers often tinged pink on the outside, are produced in summer and autumn. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: to 15m. Hardiness: H5.
Jasminum officinale 'Clotted Cream' PBR		A vigorous, twining climber which can remain evergreen in mild winters. Leaves, made up of pinnate leaflets, are mid-green. Clusters of cream, sweetly scented flowers are produced in summer and autumn and are larger than other varieties. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height (if untrimmed): 12m. Hardiness: H5.
Jasminum officinale 'Inverleith'		
Jasminum officinalis f. affine		
Jasminum x stephanense		A vigorous, twining, deciduous climber. Green leaves, which may be divided into leaflets are produced in spring, followed by pale pink flowers in midsummer. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height: 5m. Hardiness: H5.
Juniper communis female		
Juniperus squamata 'Blue Star'		

Juniperus x pfitzeriana 'Old Gold'		An evergreen, spreading shrub with bronze-yellow, scale-like leaves. Branches grow at a 45° angle from the main stem and eventually form tiers. Dark, round fruits are produced. Plant in full sun or partial shade, in any well drained soil. Mature height and spread, 1.5m x 2.5m. Hardiness, H6.
Kerria japonica	Not currently in production	
Kolkwitzia amabilis 'Pink Cloud'		
Laurus nobilis		An upright, evergreen large shrub with narrow, fragrant, dark green, glossy leaves. Yellow-green flowers are produced in clusters in spring. A good hedging plant. Plant in full sun or partial shade, in fertile, moist but well-drained soil, sheltered from cold winds. Mature height and spread: up to 12m x 10m. Hardiness: H4.
Laurus nobilis 'Aurea'		An upright, evergreen large shrub with narrow, fragrant, golden yellow, glossy leaves that are brightest in winter and spring. Yellow-green flowers are produced in clusters in spring. A good hedging plant. Plant in full sun or partial shade, in fertile, moist but well-drained soil, sheltered from cold winds. Mature height and spread: up to 8m x 4m. Hardiness: H4.
Lavandula angustifolia 'Alba'		
Lavandula angustifolia 'Arctic Snow'	White flowers. H 45cm	
Lavandula angustifolia 'Arctic Snow'		
Lavandula angustifolia 'Ashdown Forest'		A compact evergreen shrub with silvery-grey leaves and highly fragrant, pale purple flowers produced on stalks in mid-summer. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 50cm x 50cm. Hardiness: H5.
Lavandula angustifolia 'Hidcote Pink'		A compact shrub with silvery grey leaves and highly fragrant, pink flowers produced on long stalks in mid-summer. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 60cm x 60cm. Hardiness: H5.
Lavandula angustifolia 'Hidcote' AGM		A compact shrub with silvery grey leaves and highly fragrant, dark purple flowers produced on long stalks in mid-summer. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 60cm x 75cm. Hardiness: H5.
Lavandula angustifolia 'Little Lady'	Light blue flowers. H40cm	A compact, evergreen shrub with silver/grey leaves and highly fragrant, light blue flowers produced on long stalks in mid-summer. Low growing, so good for hedging. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 40cm x 40cm. Hardiness: H5.
Lavandula angustifolia 'Munstead'		A compact shrub with silver/grey leaves and highly fragrant, blue-purple flowers produced on long stalks in mid-summer. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 45cm x 60cm. Hardiness: H5.
Lavandula angustifolia 'Rosea'	Pale pink flowers. H50-70cm	A compact, evergreen shrub with silver/grey leaves and highly fragrant, pale pink flowers produced on long stalks in mid-summer. Low growing, so good for hedging. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 75cm x 75cm. Hardiness: H5.
Lavandula 'Grosso'		

Lavandula x intermedia 'Edelweiss'		A rounded shrub with branching stems with narrow, aromatic, grey-green leaves. Long stems bear spikes of white flowers in summer. Loved by bees. Ideally plant in full sun, in any well-drained soil. Thrives in poor, chalky soils. Mature height and spread: 50cm x 45cm. Hardiness: H5.
Malva x clementii 'Bredon Springs' (Tree Mallow. Formerly Lavatera x clementii 'Bredon Springs')		A vigorous semi-evergreen shrub with round, mid-green leaves with toothed edges. Spikes of large dusky pink, mauve-flushed flowers are produced on strong stems throughout summer. Plant in full sun, in well-drained soil. Mature height and spread: 1-2 x 1-2m. Hardiness: H5.
Ligustrum ovalifolium		
Ligustrum ovalifolium 'Argenteum' (Silver/Variegated Privet)		An upright, vigorous evergreen or semi-evergreen shrub with oval, green leaves edged with cream. White flowers are produced in clusters in midsummer, followed by shiny black fruit. This shrub makes a very good hedging plant and can be trimmed to keep it contained. Plant in full sun, in well-drained soil. Mature height and spread, 4m x 4m. Hardiness, H5.
Ligustrum vulgare (Common Privet)		An upright, vigorous evergreen or semi-evergreen shrub with narrowly oval, green leaves. White flowers are produced in clusters in midsummer, followed by shiny black fruit. This shrub makes a very good hedging plant and can be trimmed to keep it contained. Plant in full sun, in well-drained soil. Mature height and spread, 3m x 3m. Hardiness, H6.
Liquidambar styraciflua 'Slender Silhouette'		
Liquidambar styraciflua 'Stared'		
Lonicera climbing type flowers, herbaceous scrambling habit		
Lonicera fragrantissima		A semi-evergreen, upright shrub with delicate, sweetly fragrant white flowers appearing in late winter. Light green foliage follows in spring. This shrub prefers a position in full sun or light shade with moist, well drained soil and can be trained along a fence or a wall if desired. Mature height and spread, 2m x 3m. Hardiness: H6.
Lonicera henryi (Henry's Honeysuckle)		A vigorous, woody, evergreen climber with long, oblong glossy leaves that are dark green. Tubular, yellow throated purple-red flowers are produced in early and midsummer, followed by purple-black berries. Ideally plant in partial shade, in moist, well-drained soil. Also grows well in full on chalk we find. Mature height and spread: 10m x 1m or more.
Lonicera japonica 'Hall's Prolific'		A vigorous, woody, evergreen or semi-evergreen climber with ovate, dark green leaves. Tubular, highly fragrant flowers are produced during spring and summer which open white and age to yellow and are followed by blue-black berries. Plant in full or partial shade, in any reasonable, well-drained soil. Mature height and spread (if untrimmed): 4 x 3m. Hardiness:
Lonicera korolkowii		
Lonicera ligustrina 'Lemon Beauty'		A bushy evergreen shrub with small, mid-green leaves with broad yellow edges. Small creamy white flowers are produced in spring, followed by purple berries. Makes a good evergreen hedge. Plant in full sun or partial shade, in well-drained soil. Mature height and spread, 1m x 1m. Hardiness: H5.
Lonicera ligustrina var. yunnanensis (Shrubby/Hedging Honeysuckle. Formerly L. nitida)		-A bushy evergreen shrub with small, dark green leaves. Small creamy white flowers are produced in spring, followed by purple berries. Makes a good evergreen hedge. Can be trimmed easily. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread, 3.5m x 3m. Hardiness: H6. 'Maigrün' is a smaller variety, 1-1.5m tall.

Lonicera ligustrina var. yunnanensis 'Baggesens Gold'		A bushy evergreen shrub with small, bright yellow leaves. Small, tubular, creamy white flowers are produced in spring, followed by small purple-blue berries. Plant in full sun or partial shade, in well-drained soil. Leaves are more yellow in sun. Mature height and spread, 1.5m x 1.5m. Hardiness: H5
Lonicera ligustrina var. yunnanensis 'Maigrun'		
Lonicera nitida 'Lime Twist'		A bushy evergreen shrub with small, cream and lime green variegated leaves. Small, tubular, creamy white flowers are produced in spring, followed by small purple-blue berries. Plant in full sun or partial shade, in well-drained soil. Mature height and spread, 3m x 3m. Hardiness: H6
Lonicera nitida 'Tidy Tips'		A bushy, evergreen shrub with very small, dark green leaves. Small creamy white flowers are produced in spring, followed by purple berries. Makes a good Box (Buxus) alternative. Plant in full sun or partial shade, in well-drained soil. Mature height and spread, up to 1.2m x up to 1.2m. Hardiness: H6.
Lonicera periclymenum		
Lonicera periclymenum 'Belgica'		
Lonicera periclymenum 'Graham Thomas'		A vigorous, woody, deciduous climber with oval or ovate mid-green leaves. Groups of highly fragrant, tubular flowers that open cream and age to yellow are produced in mid- and late summer, followed by bright red berries. Plant in full or partial shade, in moist, well-drained soil. Mature height (if untrimmed): 7m. Hardiness: H6.
Lonicera periclymenum 'Munster'	Not currently in production	A vigorous, woody, deciduous climber with oval or ovate mid-green leaves. Groups of highly fragrant, tubular, creamy white and pink flowers are produced in mid- and late summer, followed by bright red berries. Plant in full or partial shade, in moist, well-drained soil. Mature height (if untrimmed): 7m. Hardiness: H6.
Lonicera periclymenum 'Serotina'		A vigorous, woody, deciduous climber with oval, mid-green leaves. Groups of highly fragrant, tubular flowers which are red/purple on the outside and creamy yellow inside, produced in late summer and autumn followed by bright red berries. Plant in full or partial shade, in moist, well-drained soil. Mature height (if untrimmed): 7m. Hardiness: H6.
Lonicera periclymenum. Pale yellow with pink flush		
Lonicera pileata 'Silver Beauty'		
Lonicera 'Silver Beauty'		
Lonicera syringantha (Lilac-flowered Honeysuckle)		A bushy deciduous shrub with small, pointed-oval, grey-green leaves. Small pink, tubular flowers that are highly scented are produced in late spring- early summer, followed by red berries. Plant in full sun or partial shade, in moist, well-drained soil. Mature height and spread: 2.5m x 2m. Hardiness: H6.
Lonicera x brownii 'Dropmoor Scarlet'	Not currently in production	A deciduous or semi-evergreen, woody climber with ovate, blue-green leaves. Groups of trumpet shaped, scarlet flowers are produced in summer, followed by red berries. Plant in full or partial shade, in moist, well-drained soil. Mature height: 4m. Hardiness: H5.

Lonicera x purpusii 'Winter Beauty'		
Luma apiculata (Myrtle)	Not currently in production	A vigorous, upright, bushy shrub with cinnamon brown and white, flaking bark and small, leathery, aromatic, dark green leaves. Small cup-shaped, white flowers are produced from midsummer to mid-autumn, followed by black-purple berries. Plant in full sun or partial shade, in a sheltered position in well-drained, fertile soil. Mature height and spread, if grown as a tree: 10 x 10m. Hardiness: H4.
Luma apiculata 'Glanleam Gold'		A upright, bushy evergreen shrub with cinnamon brown and white, flaking bark and small, aromatic, cream and dark green variegated leaves. Small cup-shaped, white flowers are produced from midsummer to mid-autumn, followed by black-purple berries. Plant in full sun or partial shade, in a sheltered position in well-drained, fertile soil. Can be trimmed to shape. Approximate height and spread, 3m x 3m. Hardiness: H4.
Magnolia 'Daphne'		
Magnolia 'Galaxy'		
Magnolia 'Genie' PBR		
Magnolia grandiflora 'Kay Parris'		
Magnolia 'Joli Pompon'		
Magnolia stellata		
Mahonia aquifolium		
Mahonia eurybracteata subsp. ganpinensis 'Soft Caress'		
Mahonia bealei		An upright, evergreen shrub with blue-green leaves made up of spiny leaflets. Stout spikes of fragrant pale yellow flowers are produced in spring, followed by dusty blue-purple berries. Plant in full or partial shade, in fertile, humus-rich, well-drained soil. Mature height and spread, 2m x 3m. Hardiness: H5.
Mahonia nitens 'Cabaret'		

Mahonia x media 'Charity'		An erect shrub with dark green, pinnate leaves made up of sharply toothed leaflets. Upright, densely clustered spikes of bright yellow flowers are produced from late autumn to late winter. Seedling originally from Slieve Donard Nursery, N. Ireland. Slightly taller and flowers slightly earlier than 'Winter Sun'. Plant in full or partial shade, in fertile, humus-rich, well-drained soil, but they tolerate most soils. Mature height and spread, 2m x 3m. Hardiness: H5.
Mahonia x media 'Winter Sun'		Slightly shorter, later flowering and brighter yellow flowers than 'Charity'
Malus 'Cardinal' ('Princeton Cardinal')		
Malus 'Comtesse de Paris'		
Malus ioensis 'Fimbriata'		
Malus 'Laura'		
Malus transitoria		
Malus transitoria 'Golden Raindrops'. Cut leaved Crab Apple		
Malus x robusta 'Red Sentinel'		
Malus x zumi 'Golden Hornet'		
Nandina domestica		An evergreen or semi-evergreen, upright shrub with soft, pointed leaves made up of smaller leaflets. Leaves are mainly green, but are red when young and during winter months. Star shaped, white flowers are produced in mid-summer. Plant in full sun, in moist, well-drained soil. Mature height and spread: 5m x 4m. Hardiness: H5.
Nandina domestica 'Firepower'		
Olearia macrodonta 'Major'		A vigorous, upright, large evergreen shrub with holly-like, pointed, dark green leaves which are felted underneath. Large corymbs of fragrant, white, daisy-like flowers are produced in summer. Plant in a sheltered spot, in full sun, in fertile, well-drained soil. Mature height and spread: 6m x 5m. Hardiness: H4.
Osmanthus delavayi		

Osmanthus heterophyllus ‘Goshiki’		An evergreen shrub with holly-like, cream-yellow and green variegated leaves. Young leaves are pinkish bronze. Fragrant, white, trumpet shaped flowers are produced in late summer. Small black fruit follows. Plant in sun or partial shade, in fertile, well-drained soil. Mature height and spread, 2m x 2m. Hardiness: H5.
Osmanthus heterophyllus ‘Purpureus’ (Holly Olive)		A dense evergreen shrub with holly-like, dark green leaves that are dark black-purple when young. Fragrant, white, trumpet shaped flowers are produced in late summer. Small black fruit follows. Plant in sun or partial shade, in fertile, well-drained soil. Mature height and spread, 2-3m x 5m. Hardiness: H5.
Osmanthus heterophyllus ‘Variegatus’		An evergreen shrub with holly-like, cream-yellow and green variegated leaves.
Osmanthus x burkwoodii (Burkwood’s Osmanthus)		A dense, rounded, evergreen shrub with small, oval, dark green leaves. Small, tubular, highly fragrant white flowers are produced in spring. Plant in sun or partial shade, in fertile, well-drained soil. Mature height and spread, 3m x 3m. Hardiness: H5.
Ostrya carpinifolia		
Parrotia persica ‘Bella’		
Parrotia persica ‘Persian Spire’		
Parrotia persica 'Vanessa'		
Parthenocissus henryana. Chinese Virginia Creeper		
Parthenocissus quinquefolia (Virginia Creeper)		A vigorous, woody, deciduous climber with mid-green, palmate leaves made up of leaflets, which turn bright red in autumn. Plant in sun or shade, in any well-drained soil. Mature height and spread: 15m or more. Hardiness: H6.
Parthenocissus tricuspidata (Boston Ivy)	Not currently in production	
Parthenocissus tricuspidata ‘Veitchii’		
Passiflora caerulea (Passion Flower)		A fast-growing climber with green leaves divided into narrow leaflets. Bowl shaped, white or pink tinged flowers with blue or purple inners are produced from summer to autumn, followed by orange-yellow fruit. Plant in full sun or partial shade, in moist, well-drained soil. Mature height: 10m. Hardiness: H4.
Passiflora caerulea ‘Constance Elliot’		A fast-growing, evergreen climber with green leaves divided into narrow leaflets. Bowl shaped, fragrant, white flowers are produced from summer to autumn, followed by orange-yellow fruit. Plant in full sun or partial shade, in moist, well-drained soil. Mature height: 10m. Hardiness: H4.
Philadelphus ‘Belle Etoile’		

Philadelphus 'Lemoinei'		
Philadelphus 'Manteau d'Hermine'		A compact, bushy, deciduous shrub with arching branches. Mid-green leaves are produced in spring , followed by highly fragrant, double, creamy white flowers in early to mid-summer. Plant in full sun or partial shade, in any well drained soil. Mature height and spread: 75cm x 1.5m. Hardiness: H6.
Philadelphus 'Virginal'		
Philadelphus coronarius 'Aureus'		
Philadelphus. White from Nanny		
Phillyrea angustifolia		
Phlomis fruticosa		
Phormium 'Jester'		
Phormium 'Jester'		
Phormium 'Black Velvet'	Not currently in production	
Phormium tenax		A clump-forming plant with upright, linear, leaves up to 2m long which are dark green above and blue-green underneath. Panicles of dull red tubular flowers held on purple stems are produced in summer. Plant in full sun, in fertile, moist but well-drained soil. Mature height and spread: to 4m (flower spike) x 2m. Hardiness: H5.
Phormium tenax 'Purpureum'	Not currently in production	A clump-forming plant with upright, linear, coppery purple leaves up to 2m long. Panicles of dull red tubular flowers held on purple stems are produced in summer. Plant in full sun, in fertile, moist but well-drained soil. Mature height and spread: to 4m (flower spike) x 2m. Hardiness: H5.
Phormium Yellow and Green		
Photinia x fraseri 'Canivily'		A slightly more compact variety than 'Red Robin', this is an upright, evergreen shrub with striking, dark red young elliptic/lance-shaped leaves in late winter/early spring. Flat heads of white flowers are produced in spring. This shrub makes an excellent hedging plant, with the dark red foliage providing interest in winter/ spring. It can be trimmed to shape. Plant
Photinia x fraseri 'Little Red Robin'		An compact, upright, evergreen shrub with bright red young, elliptic/lance-shaped leaves in late winter/early spring. Flat heads of white flowers are produced in spring. More compact and smaller, even brighter red leaves than 'Red Robin' This shrub makes an excellent hedging plant. It can be trimmed to shape. Plant in full sun or partial shade, in moist, well-drained

Photinia x fraseri 'Red Robin'		An upright, evergreen shrub with striking, bright red young elliptic/lance-shaped leaves in late winter/early spring. Flat heads of white flowers are produced in spring. This shrub makes an excellent hedging plant, with the bright red foliage providing interest in winter/ spring. It can be trimmed to shape. Plant in full sun or partial shade, in moist, well-drained soil.
Physocarpus opulifolius 'Dart's Gold' (Ninebark)		A compact, dense, deciduous shrub with arching branches. Bright yellow-green, 3 lobed leaves are produced in spring, followed by clusters of white-pink flowers in early summer. Green-red fruit follow the flowers. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: 2m x 2.5m. Hardiness: H7.
Physocarpus opulifolius 'Diabolo' PBR. AGM (Ninebark)		A compact, dense, deciduous shrub with arching branches. Black-red, 3 lobed leaves are produced in spring, followed by white-pink flowers in early summer. Green-red fruit follow the flowers. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: 2.5m x 2.5m. Hardiness: H7.
Physocarpus opulifolius LADY IN RED		
Picea omorika (Serbian Spruce)		
Pieris 'Forest Flame'		
Pieris japonica 'Carnaval'	Not currently in production	A compact evergreen shrub with narrow, slightly toothed, dark green leaves with white margins that are deep red when young. White, heather-like flowers are produced in late winter and spring. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread, 1.2m x 1.5m. Hardiness, H5.
Pieris japonica 'Debutante'		
Pieris japonica 'Little Heath'	Not currently in production	A compact evergreen shrub with narrow, slightly toothed leaves that are flushed pink when young with silver leaf margins. White, heather-like flowers are produced in late winter and spring. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread, 60cm x 60cm. Hardiness, H5.
Pieris japonica 'Mountain Fire'	Not currently in production	A evergreen shrub with narrow, slightly toothed, green-chestnut-brown leaves that are red when young. White, heather-like flowers are produced in late winter and spring. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread, up to 4m x 3m. Hardiness, H5.
Pieris japonica 'Variegata'		
Pinus sylvestris		
Pinus wallichiana		
Pittosporum 'Silver Queen'	Not currently in production	
Pittosporum tenuifolium	Not currently in production	

Pittosporum tenuifolium ‘Abbotsbury Gold’	Not currently in production	A bushy, evergreen shrub with small, wavy, yellow leaves with irregular green edges. Black-red fragrant flowers are produced in spring and summer. Plant in full sun or partial shade, in fertile, moist but well-drained soil. Mature height and spread, 3m x 1.5cm. Hardiness: H4.
Pittosporum tenuifolium ‘Tom Thumb’	Not currently in production	A bushy, mound forming, evergreen shrub with small, wavy, bronze-purple leaves. Black-red fragrant flowers are produced in spring and summer. Plant in full sun or partial shade, in fertile, moist but well-drained soil. Mature height and spread, 1m x 60cm. Hardiness: H4.
Pittosporum tenuifolium ‘Trims Hedger’	Not currently in production	A bushy, upright, evergreen shrub with small, wavy, light green leaves. Black-red fragrant flowers are produced in spring and summer. This variety is very good for hedging. Plant in full sun or partial shade, in fertile, moist but well-drained soil. Mature height and spread, 3m x 2m. Hardiness: H4.
Pittosporum tenuifolium ‘Victoria’	Not currently in production	A bushy, mound forming, evergreen shrub with small, wavy, grey-green with white and pink edges. Black-red fragrant flowers are produced in spring and summer. Plant in full sun or partial shade, in fertile, moist but well-drained soil. Mature height and spread, 1m x 60cm. Hardiness: H4.
Pittosporum tenuifolium 'Golf Ball'	Not currently in production	
Pittosporum tenuifolium 'Nutty's Leprechaun'	Not currently in production	
Potentilla fruticosa ‘Abbotswood’	JOP	
Potentilla fruticosa ‘Dawdawn’		
Potentilla fruticosa ‘Elizabeth’	JOP	
Potentilla fruticosa ‘Pink Beauty’ PBR AGM		A compact, upright, bushy shrub with small, green leaves made up of narrow leaflets. Large deep pink flowers with bright yellow inners are produced throughout summer and early autumn. Plant in full sun, in any well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H7.
Potentilla fruticosa ‘Princess’		A compact, bushy shrub with small, green leaves made up of narrow leaflets. Pale pink flowers with bright yellow inners are produced throughout summer, with the flower edges bleaching to white in full sun. Plant in full sun, in any well-drained soil. Approximate height and spread: 60cm x 75cm. Hardiness: H7.
Potentilla fruticosa ‘Red Ace’		A compact, bushy shrub with small, green leaves made up of narrow leaflets. Bright red flowers, with bright yellow on the undersides of petals, are produced throughout summer, with the flowers fading in full sun. Plant in full sun, in any well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H7.
Potentilla fruticosa ‘Tangerine’		A compact, bushy shrub with small, green leaves made up of narrow leaflets. Yellow-copper orange flowers are produced throughout summer, with the flowers fading in full sun. Plant in full sun, in any well-drained soil. Mature height and spread: 1m x 1.5m. Hardiness: H7.
Potentilla fruticosa ‘Tilford Cream’	JOP	
Prunus ‘Fugenzo’		

Prunus 'Kiku Shidare Zakura'		
Prunus 'Amanogawa'		
Prunus 'Amanogawa'		
Prunus incisa 'Kojo-no-mai'		
Prunus incisa 'Kojo-no-mai'?		
Prunus 'Kanzan'	Not currently in production	
Prunus 'Kanzan'		
Prunus 'Kanzan'		
Prunus laurocerasus (Cherry Laurel)		A dense, evergreen shrub with large, glossy leaves that are dark green above and paler below. Fragrant, upright, white flowers are produced in late-spring, followed by red fruit. This shrub makes an excellent hedging plant. It can be trimmed to shape. Plant in full sun or partial shade, in any moist, well-drained soil. On shallow chalk, leaves may become yellow.
Prunus laurocerasus 'Otto Luyken'		
Prunus lusitanica (Portugal Laurel)		A dense, bushy, evergreen shrub with red stems and glossy, dark green leaves. Small, fragrant white flowers, grouped on stalks, are produced in early summer. Red fruit often follows. This is an excellent hedging plant that can be kept compact by regular trimming. Plant in full sun or partial shade, in any moist, well-drained soil. Mature height and spread: 5-7m, if left
Prunus lusitanica 'Angustifolia'		
Prunus lusitanica 'Angustifolia'		
Prunus 'Okame'		
Prunus padus		

Prunus 'Royal Burgundy'		
Prunus 'Royal Burgundy'		
Prunus serrula		
Prunus 'Snow Goose'		
Prunus 'Snow Showers'		
Prunus 'Snow Showers'		
Prunus spinosa (Blackthorn)		A dense, bushy deciduous shrub or tree with small, oval, dark green leaves. Heads of white flowers are produced in spring, followed by black-blue fruit (Sloes), which are often used to make gin or vodka. Makes a good hedging plant. Plant in full sun, in any moist, but well-drained soil. Mature height and spread: 5m (if grown as a tree) x 4m. Hardiness: H7.
Prunus x subhirtella 'Autumnalis'		
Prunus x subhirtella 'Autumnalis Rosea'		
Prunus x subhirtella 'Autumnalis Rosea'		
Pyracantha 'Mohave Silver'		An evergreen shrub with small dark green and silver variegated leaves. Flat heads of white flowers are produced in spring, followed by orange berries which last into autumn and winter. It can be trained against a wall or fence. Plant in full sun or partial shade in moist, well drained soil. Mature height and spread, 1.5m x 2m. Hardiness: H5.
Pyracantha 'Orange Glow'		An upright-spreading, spiny, evergreen shrub with glossy, dark green leaves. Flat heads of white flowers are produced in early summer, followed by orange-red berries. Makes a good hedging plant and can also be grown against a wall or fence. Plant in full sun or partial shade in moist, well drained soil. Mature height and spread, 3m x 3m. Hardiness: H6.
Pyracantha 'Orange Glow'		
Pyracantha 'Soleil d'Or'		An upright, spiny, evergreen shrub with red tinged shoots and glossy, dark green leaves. Flat heads of white flowers are produced in early summer, followed by golden yellow berries. Makes a good hedging plant and can also be grown against a wall or fence. Plant in full sun or partial shade in moist, well drained soil. Mature height and spread, 3m x 2.5m. Hardiness:
Pyracantha 'Teton' AGM		A vigorous, upright, spiny, evergreen shrub with glossy, wavy margined, bright green leaves. Flat heads of white flowers are produced in early summer, followed by yellow-orange berries. Makes a good hedging plant and can also be grown against a wall or fence. Plant in full sun or partial shade in moist, well drained soil. Mature height and spread, 5m x 3m. Hardiness:

Pyracantha coccinea 'Red Column'		An evergreen shrub with thorns and small green leaves. Flat heads of white flowers are produced in spring, followed by red berries which last into autumn and winter and are loved by birds. It can be trained against a wall or fence and makes a good hedging plant. Plant in full sun or partial shade in moist, well drained soil. Mature height and spread, 4m x 4m. Hardiness: H6.
Pyracantha 'Golden Charmer'		
Pyracantha SAPHYR JAUNE		
Pyrus calleryana 'Chanticleer'		
Pyrus salicifolia 'Pendula'. Weeping Silver Pear		
Pyrus salicifolia 'Pendula'. Weeping Silver Pear		
Quercus petraea (Sessile Oak)		A spreading, deciduous tree with ridged, grey bark. Leaves that are dark green and lobed, with yellow leaf stalks which are longer than in English Oak. Acorns are produced in autumn and are stalkless and directly attached to the twig. Plant in full sun or partial shade, in deep, fertile, well-drained soil. Mature height and spread: eventually 30m x 20m. Hardiness: H7
Quercus robur (English Oak)		A rugged, spreading, deciduous tree with fissured grey bark-brown bark. Dark green, many lobed leaves are produced in spring, followed by acorns in autumn. Plant in fertile, well-drained soil in sun or partial shade. Mature height and spread: 35m x 25m. Hardiness: H6.
Rhaphiolepis umbellata		A bushy, evergreen shrub with oval or lance-shaped, leathery, dark green leaves. Fragrant, white flowers, sometimes tinged pink, are produced in cone shapes in early summer. Plant in full sun, in moist, well-drained soil with shelter from cold winds. Mature height and spread, 1.5m x 1.5m. Hardiness, H4.
Rhododendron 'Rosebud' (Azalea type)		A compact, low growing evergreen azalea type rhododendron with small leaves. Double, rosebud-like rose-pink flowers are produced in mid-spring in groups. Ideally plant in dappled shade in moist, acidic soil. Will tolerate full sun if soil is moist. Mature height and spread 1m x 1m. Hardiness: H6.
Ribes alpinum		A compact, mound forming deciduous shrub with smooth stems and lobed, mid-green leaves. Green-yellow, bell-shaped flowers are produced in spring in upright clusters. Male and female flowers are produced on separate plants. Female flowers are followed by dark red fruits. Plant in full sun, in fertile, well drained soil. Mature height and spread: 60cm x
Ribes laurifolium (Laurel-leaved flowering currant)		An evergreen shrub with leathery, dark green leaves. Groups of cup-shaped, green-cream flowers are produced in late winter, with the female flowers producing berries that turn from red to black. Plant in sun or partial shade, in fertile, well-drained soil. Mature height and spread, 1m x 1.5m. Hardiness: H5.
Ribes laurifolium 'Mrs Amy Doncaster' (Laurel-leaved flowering currant)		
Ribes odoratum		An erect, deciduous shrub with hairy young shoots and 3-5 lobed, bright green leaves, which turn red and purple in autumn. Small, tubular, fragrant yellow flowers are produced in pendent racemes in mid and late spring, followed by black berries. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 2m x 2m. Hardiness: H6.

Ribes sanguineum ‘Elkington’s White’		An upright, deciduous shrub with rounded toothed, light green leaves that are slightly hairy and smell of blackcurrant. Creamy-white flowers are produced from pale pink buds in spring, followed by blue-black fruit. Plant in full sun, in fertile, well-drained soil. Approximate height and spread, 2m x 1.5m. Hardiness: H6
Ribes sanguineum ‘King Edward VII’		An upright, deciduous shrub with rounded toothed, light green leaves that are slightly hairy. Dark pink/red flowers, pendulous flowers are produced in spring, followed by blue-black fruit. Great for pollinators. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 1.5m x 1.5m. Hardiness: H6.
Ribes sanguineum ‘White Icicle’		An upright, deciduous shrub with rounded toothed, light green leaves that are slightly hairy. Creamy-white flowers are produced in spring, followed by blue-black fruit. Plant in full sun, in fertile, well-drained soil. Mature height and spread, 2m x 2m. Hardiness: H6
Ribes x gordonianum		
Robinia pseudoacacia ‘Frisia’		
Rosa ‘Felicia’		
Rosa ‘Madge’		
Rosa ‘The Fairy’		
Rosa 'Ballerina'		
Rosa canina		
Rosa 'Francois Juranville'	Not currently in production	
Rosa glauca		
Rosa 'Kent'		
Rosa 'Mermaid'	Not currently in production	

Rosa rugosa		
Rosa rugosa 'Alba'		
Rosa 'The Fairy'		
Rosa x odorata 'Bengal Crimson'		Crimson coloured, single flowers. Scented. Flowers over a long period from late spring to autumn.
Rubus cockburnianus		A dense, spreading, deciduous shrub with arching, prickly stems with a bright white bloom on them in winter. Dark green leaves made up of ovate leaflets are produced in spring and are white and hairy underneath. Racemes of saucer-shaped, purple flowers are produced in summer, followed by black berries. Plant in full sun, in moderately fertile, well-drained soil.
Rubus cockburnianus 'Golden Vale'		
Salix alba		This willow is a fast growing species, which can be grown as a spreading tree or coppiced for its stem colour. The leaves are dull green, with blue undersides when young. Yellow male catkins and yellow-green female catkins are produced in spring, as the leaves emerge. Young stems are grey-brown.
Salix alba var. vitellina		This willow has bright golden yellow young stems. It can be grown as a spreading tree or coppiced for its stem colour. The leaves are dull green, with blue undersides when young. Yellow male catkins and yellow-green female catkins are produced in spring, as the leaves emerge.
Salix alba var. vitellina 'Britzensis'		
<i>Salix alba</i> var. <i>vitellina</i> 'Chermesina'		This willow is a male clone of <i>Salix alba</i> and can be grown as a spreading tree or coppiced for its stem colour. The leaves are dull green, with blue undersides when young. Yellow male catkins are produced in spring, as the leaves emerge. Young stems are carmine red.
Salix alba var. vitellina 'Yelverton' AGM		
Salix babylonica var. Pekinensis 'Tortuosa'		This twisted willow adds interesting shape to any garden. It has acid green new growth in spring, which turns to bright yellow in winter once the leaves fall. Height and spread, 15m x 8m.
Salix boeckii		
Salix candida		This willow has large furry leaves and thick furry stems. It forms a tall, woody shrub if left uncoppiced. It has mahogany brown stems and produces ornamental soft catkins in spring. It can be coppiced to encourage straight stems to be produced.
Salix cinerea (Grey Willow)		This willow has large, grey, oval shaped leaves. It forms a tall shrub, or small tree if uncoppiced. Stems are grey-brown, with yellow-red young growth. Soft or furry ornamental catkins are produced in spring, referred to as 'pussy willows'. Coppicing will encourage young, straight stems for winter colour.

Salix daphnoides 'Continental Purple' (Violet Willow)		This fast growing willow has dark green, narrow, slightly serrated leaves. It is an upright shrub, turning into a spreading tree if left uncoppiced. Young stems are dark purple. Silky grey catkins are produced in late winter. Coppicing will encourage young, straight stems for winter colour.
Salix daphnoides 'Deep Purple'		This fast growing willow has dark green, narrow, slightly serrated leaves. It is an upright shrub, which will turn into a spreading tree if left uncoppiced. Young stems are a wonderful dark purple colour, with older wood turning grey-green. Annual coppicing will produce straight stems with the best winter colour.
Salix elaeagnos subsp. Angustifolia (S. rosmarinifolia)		
Salix fragilis (Crack Willow)		Taking its name from the noise that the breaking branches make, this willow can form a spreading tree, or can be coppiced for its stem colour. Finely toothed, dark green leaves with paler undersides are produced with green catkins in spring. Young stems are olive brown.
Salix fragilis var. decipiens (White Welsh Willow)		This willow has thin, dark green leaves and forms an upright shrub, turning into a spreading tree if left uncoppiced. The young stems are pale, with older wood turning a darker olive brown. Annual coppicing will produce straight stems with the best winter colour
Salix gracilistyla 'Mount Aso'		
Salix irrorata. Blue Stemmed Willow		
Salix myrsinifolia (Formerly S. nigricans) (Black Willow)		The brilliant black stems of this willow make it a favourite. Leaves are dark green, with catkins produced in spring. Young stems are dark black, with a purple tint. Annual coppicing will produce straight stems with the best winter colour. Height, 10m.
Salix Oriental Shrubby Willow		This tall, elegant willow is thought to originate from China, but its exact origin is unknown. It has bright green to red stems, which give fantastic colour in winter. Long silver catkins are produced in spring, followed by narrow green leaves. It can reach 3m tall, with little branching, making it good for weaving.
Salix pentandra (Bay Willow)		This willow produces glossy dark green leaves in spring, with catkins produced in early summer. Young stems are brown-green. If left uncoppiced, this willow will form a spreading shrub or small tree. Annual coppicing will produce straight stems with the best winter colour.
Salix purpurea 'Cohu Blue'		An elegant, arching, deciduous shrub with slender, blue-green leaves and blue-purple stems. In spring fluffy silver catkins are produced along the stems. Plant in full sun, in moist soil, avoiding shallow chalk. Coppice annually or every 2 nd year to control vigour. Mature height and spread: 2m x 2m (if coppiced). Hardiness: H6.
Salix purpurea 'Dicky Meadows'		The fine stems of 'Dicky Meadows' make this a popular willow for basket making. This willow has slender, blue-green leaves, with catkins produced in spring. Young stems are yellow with red tips in winter. If left uncoppiced, the plant will form a spreading shrub or upright tree, with arching stems. Annual coppicing will produce straight stems with the best
Salix purpurea 'Green Dicks'		The fine stems of 'Green Dicks' make this a popular willow for basket making. This willow has slender, blue-green leaves. Young stems are pale green-yellow, changing to a white-green in winter. If left uncoppiced, the plant will form a spreading shrub or upright tree, with arching stems. Annual coppicing will produce straight stems with the best winter colour.
Salix purpurea 'Nancy Saunders'		An elegant, arching, deciduous shrub with slender, grey-blue-green leaves and purple stems. In spring many small, silver, fluffy catkins are produced along the stems. Plant in full sun, in moist soil, avoiding shallow chalk. Coppice annually or every 2 nd year to control vigour. Mature height and spread: 2m x 2m (if coppiced). Hardiness: H6.
Salix purpurea x viminalis x rubra 'Harrisons'		This willow has green leaves with furry young growth. Small grey-blue catkins are formed in April. It forms a shrub or small tree if left uncoppiced. Young stems are mottled brown at the base, with burgundy-brown tips. Stems have little branching and can reach 8ft each year. Annual coppicing will produce straight stems with the best winter colour.

Salix pyrifolia (Balsam Willow)		S. pyrifolia is a willow with unusually shaped leaves, which are broader than other willow types. Young leaves are balsam scented in spring. Young leaf and tip growth is bright red in spring, turning green as it matures. Stems are russet-brown in winter, with plump bud scales. If left uncoppiced, the plant will form a spreading shrub, with arching stems. Annual
Salix sachalinensis 'Sekka'		Also known as Japanese fantail willow, this willow has interesting flattened stems, making it popular for flower arranging. It's leaves are held for a long period before dropping in early winter. Green leaves are produced in spring, after catkins which appear in February and turn from pink to yellow as they mature. Stems are red-brown and curve slightly. If left
Salix triandra 'Black Maul' (Almond Leaved Willow)		S. Triandra 'Black Maul' is a willow with great ornamental value, fragrance and is a favourite for basket making. Dark green, serrated leaves are produced in spring, with the undersides being lighter. New growth is dark purple-black and young stems are olive-brown. The leaves provide very bright autumn colour. If left uncoppiced, the plant will form a large shrub
Salix viminalis (Common Osier)		Traditionally used for basket making, this willow is robust and vigorous. Dark green leaves with grey, furry undersides are produced in spring. Catkins are produced in late winter, before leaves. Young stems are green-yellow. If left uncoppiced, the plant will form a large shrub or small tree. Annual coppicing will produce straighter stems with the best winter colour.
Sambucus nigra f. porphyrophylla 'Eva' (Black Lace) (PBR)		An upright, bushy, deciduous shrub with large, almost black leaves, made up of deeply cut leaflets. Large heads of pale pink flowers are produced in early summer, fading to grey-white and followed by black berries. Plant in full sun or partial shade, in fertile, moist but well-drained soil. Mature height and spread, 6m x 6m. Hardiness: H6.
Sambucus nigra f. porphyrophylla 'Gerda' (Black Beauty) PBR	JOP	
Sambucus racemosa 'Sutherland Gold'	Not currently in production	
Santolina chamaecyparissus		
Sarcococca confusa		A rounded, bushy shrub elliptic, glossy, dark green leaves. Clusters of highly fragrant white flowers are produced along stems in winter, followed by black berries. Plant in shade, in moist, well drained soil. Mature height and spread, 2m x 1m. Hardiness: H5.
Sarcococca hookeriana var. digyna 'Purple Stem'		A clump forming, evergreen, winter flowering shrub with slightly variegated leaves and purple stems. Cream-white flowers are produced during winter months and are highly fragrant. Plant in shade, in moist, well drained soil. Mature height and spread, 1.5m x 2m. Hardiness: H5.
Sarcococca hookeriana var. humilis?		
Sarcococca orientalis		
Sarcococca ruscifolia (Sweet/Christmas Box)		Sarcococca, also known as Christmas Box or Sweet Box, are known for their sweetly scented flowers. This Sarcococca is a dense, evergreen, bushy shrub. Arching stems bear glossy, ovate, dark green leaves. Fragrant white flowers are produced in winter, followed by red berries. This shrub makes a good plant for a container placed near the house, to allow the scent to be enjoyed in winter. Plant in any moist but well-drained, reasonable fertile soil in deep or partial shade.
Sarcococca ruscifolia var. chinensis 'Dragon's Gate'		

Sarcococca ruscifolia var. chinensis 'Dragon Gate'	Not currently in production	
Skimmia confusa 'Kew Green'	JOP	Green buds, opening to white flowers. Male variety.
Skimmia japonica 'Kew White'		
Skimmia japonica 'Rubella'		A compact, evergreen shrub with mid-sized, dark green, oval leaves to 10cm long, with red leaf edges. Dark red flower buds are produced in autumn, opening to fragrant, white-pink flowers in spring. This is a male form, so berries are not produced. Plant in shade, in fertile, humus-rich, moist but well-drained soil. If this shrub is planted in full sun, it may show
Solanum crispum 'Glasnevin'		
Solanum crispum 'Glasnevin'		
Solanum laxum 'Album'	Not currently in production	An evergreen or semi-evergreen climber with pointed, green leaves. Fragrant white flowers are produced in summer and autumn, followed by black fruit. Plant in full sun, in well drained soil. Tolerates chalky soil. Mature height: 6m. Hardiness: H4.
Sorbus aria 'Lutescens'		
Sorbus aucuparia		
Sorbus cashmiriana		
Sorbus 'Emberglow'		
Sorbus 'Emberglow'		
Sorbus vilmorinii		
Spiraea 'Little Princess'		
Spiraea 'Arguta'	JOP	

Spiraea japonica 'Goldflame'		A clump-forming, deciduous shrub with narrow, oval leaves that start orange-red, then turn bright yellow and age to mid-green. Pink bowl-shaped flowers are produced in clusters in mid- and late summer. Plant in full sun in fertile, moist, but well-drained soil. Mature height and spread: 90cm x 90cm. Hardiness: H6.
Spiraea japonica 'Antony Waterer'	JOP	
Spiraea nipponica 'Snowmound'	Not currently in production	An upright, deciduous shrub with arching stems of small, oval, dark green leaves. Many clusters of white flowers are produced in midsummer. Plant in full sun in fertile, moist, but well-drained soil. Mature height and spread: 1m x 1m. Hardiness: H6.
Spiraea thunbergii		
Syringa meyeri 'Palibin'	Not currently in production	A compact, rounded, deciduous shrub with oval, green leaves. Fragrant, lavender-pink flowers are produced in dense panicles in late spring and early summer. Plant in full sun, in fertile, humus rich, well-drained, alkaline soil. Grows well on chalk. Mature height and spread: 1.5m x 1.5m. Hardiness: H5.
Syringa pubescens subsp. microphylla		An erect, spreading, deciduous shrub with lance-shaped to oval leaves that are red-green when young, then dark green. Highly fragrant, lilac-pink flowers are produced in small panicles in early summer and often again in autumn. Plant in full sun, in fertile, humus rich, well-drained, alkaline soil. Grows well on chalk. Mature height and spread: 6m x 6m. Hardiness:
Syringa vulgaris (Lilac)		A spreading shrub or small tree with heart-shaped, mid-green leaves. Fragrant lilac flowers are produced in conical clusters from late spring to early summer. Plant in full sun, in fertile, humus rich, well-drained, alkaline soil. Grows well on chalk. Mature height and spread: to 7m x 7m. Hardiness: H6.
Syringa vulgaris 'Charles Joly'		
Syringa vulgaris 'Krasavista Moskv'y' (Beauty of Moscow)		
Syringa vulgaris 'Madame Lemoine'	JOP	
Syringa vulgaris 'Souvenir de Louis Spaeth'		
Taxus baccata		A dense evergreen shrub with slender, dark green leaves. Bark is scaly, purple-brown. Small male cones and bright red female fruits are formed. Very good for growing as a hedge and for topiary. Slow growing. Plant in sun or shade, in any well-drained soil. Mature height and spread, 15m x 10m. Hardiness: H7.
Taxus baccata 'Fastigiata Aurea'		
Taxus baccata 'Fastigiata Robusta'		

Taxus baccata 'Fastigiata Robusta'		
Teucrium fruticans	Not currently in production	
Thuja plicata		A dense, columnar, evergreen conifer with spreading branches of flat sprays of mid-dark green, scale-like leaves. Small cones are also produced. This plant makes a good hedging plant. Plant at 2ft spacing for hedging. Plant in full sun, in deep, moist but well-drained soil. Mature height and spread, up to 30m x 6m if untrimmed. Hardiness: H6.
Thuja plicata 'Collyer's Gold' (Western Red Cedar)		A dense, columnar, relatively slow growing conifer with golden yellow younger and bright green older foliage. Lower branches have a billowing habit and show red-brown bark. Small oblong cones are produced. Plant in full sun, in deep, moist but well-drained soil. Mature height and spread, 2m x 1m.
Trachelospermum asiaticum		
Trachelospermum jasminoides		
Trachelospermum jasminoides 'Variegata'		A woody, evergreen climber with pointed, oval leaves that are dark green and cream variegated. In winter leaves are flushed red and pink. White, star-shaped, fragrant flowers are produced in mid and late summer. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height: 9m. Hardiness: H4.
Trachelospermum jasminoides 'Waterwheel'	Not currently in production	
Vaccinium cylindraceum	Not currently in production	
Veronica (Hebe) 'Emerald Gem'. Synonym 'Green Globe'	JOP	
Veronica (Hebe) 'Oratia Beauty'	JOP	
Veronica (Hebe) ochracea 'James Stirling'	JOP	
Veronica (Hebe) odora (H. buxifolia)		A bushy, evergreen shrub with densely packed, small, glossy, dark green leaves. Groups of small white flowers are produced in early and midsummer. This Hebe resembles Box and can be used as a Box substitute, with the flowers making it more interesting. Plant in full sun or partial shade, in well drained soil. Mature height and spread: 1mx 1.5m. Hardiness:
Veronica (Hebe) pinguifolia 'Sutherlandii'	JOP	
Veronica (Hebe) 'Red Edge'	JOP	

Veronica (Hebe) 'Marjorie'		
Veronica (Hebe) rakaiensis		
Viburnum x carlcephalum	Not currently in production	
Viburnum carlesii		
Viburnum davidii	JOP	
Viburnum farreri		This viburnum is an upright shrub with dark green, oval leaves, which have a bronze tinge when young and turn to red-purple in autumn. Fragrant white flowers are borne in late autumn-winter, followed by bright red fruits. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread: 3m x 2.5m. Hardiness: H6
Viburnum harryanum	Not currently in production	An upright, bushy shrub with small, rounded, dark green leaves. Small, tubular, white flowers are produced in late spring, followed by black fruits. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 3m x 2.5m. Hardiness: H6.
Viburnum lantana		A vigorous, upright, deciduous shrub with broad, finely toothed, grey-green leaves which turn red in autumn. Small tubular white flowers are produced in loose domed cymes in late spring and early summer. Plant in full sun or partial shade, in any well-drained soil, likes chalk.. Mature height and spread: 5m x 4m. Hardiness: H7.
Viburnum opulus (Guelder Rose)		A vigorous, bushy, deciduous shrub with maple-like dark green leaves, which turn bright red in autumn. Flat heads of white flowers are produced in spring and early summer, followed by bright red berries. Plant in full sun or partial shade, in any moist, well-drained soil. Mature height and spread: 5m x 4m. Hardiness: H6. The variety 'Roseum' has balls of white
Viburnum opulus 'Roseum'		The variety 'Roseum' has balls of white flowers which are sterile, so produce no berries. Mature height and spread 3m x 4m. Hardiness: H6.
Viburnum plicatum f. tomentosum 'Mariesii'	JOP	
Viburnum tinus		
Viburnum tinus 'Eve Price'		A dense, evergreen shrub with dark green, oval leaves. It produces pale pink flower buds, opening to white flowers in late winter for a long period throughout spring. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 3m x 3m. Hardiness: H4
Viburnum tinus 'Gwenllian'		A compact, bushy shrub with dark green oval leaves. Broad heads of dark pink flower buds open to reveal white-pink flowers for a long period from late winter, followed by purple berries. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 2.5m x 2.5m. Hardiness: H4
Viburnum tinus 'Lisarose' PBR		A bushy shrub with dark green oval leaves. Broad heads of red-pink flower buds open to reveal white flowers for a long period from late winter and well into spring. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 2.5m x 2.5m. Hardiness: H4

Viburnum x bodnantense 'Dawn'		An upright, deciduous shrub with ovate to oblong, dark green, veined leaves. Clusters of heavily scented, tubular, dark pink flowers that age to white are produced from late autumn to spring on bare branches. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 3m x 2m. Hardiness: H6.
Viburnum x bodnantense 'Charles Lamont'	Not currently in production	
Viburnum x burkwoodii		An open, bushy, semi evergreen shrub with thick, dark green leaves with a pale underside. Tubular, fragrant white flowers are produced in spring, followed by fruit which turns from red to black. Plant in any moist, well drained soil in full sun or partial shade. Mature height and spread, 3m x 3m. Hardiness: H6.
Viburnum x burkwoodii 'Park Farm Hybrid'	JOP	
Viburnum x carlcephalum		
Vitis coignetiae. Crimson Glory Vine		
Weigela 'Bristol Ruby'	JOP	
Weigela 'Bristol Snowflake'		
Weigela 'Florida Variegata'	JOP	
Weigela 'Nana Variegata'		A deciduous, upright-rounded shrub with oval-pointed, dark green leaves with creamy yellow margins. Bell-shaped, Pale pink flowers are produced in early summer. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: 1-2m x 1-1.5m. Hardiness: H6.
Weigela 'Camouflage'		
Weigela florida 'Foliis Purpureis'		A deciduous, spreading shrub with arching stems of oval-pointed, bronze-green leaves. Funnel -shaped, dark pink flowers with pale pink insides are produced in late spring and summer. Plant in full sun or partial shade, in fertile, well-drained soil. Approximate height and spread: 1.5m x 1.5m. Hardiness: H6.
Weigela 'Looymansyi Aurea'		
Wisteria floribunda 'Alba'	JOP	

Wisteria sinensis		A vigorous, twining, deciduous climber with dark green leaves made up of many leaflets. Dense, pendulous spikes of fragrant lilac-blue flowers are produced in mid spring, sometimes followed by bean-like seed pods. Plant in full sun or partial shade, in fertile, well-drained soil. Mature height and spread: to 9m x indefinite. Hardiness: H6. - Wisteria sinensis f. alba is a fragrant white flowered form, with shorter flower spikes.
Wisteria sinensis 'Prolific'	JOP	
X Cupressocyparis leylandii		A dense, fast growing, evergreen shrub with flat sprays of dark green leaves. Dark brown female cones are produced. This is an excellent hedging plant, which can be compact with regular pruning. Plant in full sun or partial shade, in any well-drained soil. Mature height and spread: up to 35m x 4m, if left untrimmed. Regular trimming will contain growth.
